

# Course guide 205112 - 205112 - Advanced Project Management

**Last modified:** 11/04/2025

**Unit in charge:** Terrassa School of Industrial, Aerospace and Audiovisual Engineering **Teaching unit:** 758 - EPC - Department of Project and Construction Engineering.

Degree: MASTER'S DEGREE IN TECHNOLOGY AND ENGINEERING MANAGEMENT (Syllabus 2016). (Optional

subject).

Academic year: 2025 ECTS Credits: 7.5 Languages: English

#### **LECTURER**

**Coordinating lecturer:** Gonçalves Ageitos, Maria

Others: Nicolau Martinez, Marc

### **DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES**

#### Specific:

CE06-MEM. The ability to optimally assign physical and financial resources in process and project management in technological settings.

CE07-MEM. The ability to manage processes and projects in technological settings subject to levels of uncertainty.

CE08-MEM. The ability to evaluate the results of process and project development in technological settings subject to levels of process uncertainty.

# Transversal:

CT1a. ENTREPRENEURSHIP AND INNOVATION: Being aware of and understanding how companies are organised and the principles that govern their activity, and being able to understand employment regulations and the relationships between planning, industrial and commercial strategies, quality and profit.

CT2. SUSTAINABILITY AND SOCIAL COMMITMENT: Being aware of and understanding the complexity of the economic and social phenomena typical of a welfare society, and being able to relate social welfare to globalisation and sustainability and to use technique, technology, economics and sustainability in a balanced and compatible manner.

CT3. TEAMWORK: Being able to work in an interdisciplinary team, whether as a member or as a leader, with the aim of contributing to projects pragmatically and responsibly and making commitments in view of the resources that are available.

#### **Basic:**

CB6. Knowledge and understanding that provides a basis or opportunity for originality in the development and/or application of ideas, often in a research context.

CB7. METMF\_The ability to apply the knowledge and problem-solving skills acquired in new or unfamiliar environments within wider (or multidisciplinary) contexts related to the area of study.

CB8. METMF\_The ability to integrate knowledge and deal with the complexity of making judgements on the basis of information that, albeit incomplete or limited, includes thoughts on the role played by social and ethical responsibility in the application of knowledge and judgement.

CB9. METMF\_The ability to communicate conclusions, and the knowledge and reasons that ultimately sustain these conclusions, to specialised and lay audiences in a clear and unambiguous way.

CB10-METP. Learning abilities that will enable students to keep studying in a largely self-directed or independent manner.

**Date:** 26/11/2025 **Page:** 1 / 3

# **TEACHING METHODOLOGY**

Lecture: Lecturers present concepts, principles and techniques, with the active participation of students.

Problem Based Learning: Lecturers and students resolve exercises and case studies through specific techniques related to the theoretical contents and principles of the course.

Project Based learning: Teams of students apply agile project management methodologies to develop their projects, solving complex problems through specific techniques related to the theoretical contents and principles of the course.

Self-study: Students diagnose their learning needs, in collaboration with the lecturers, and plan their own learning process.

# **LEARNING OBJECTIVES OF THE SUBJECT**

The course Advanced Project Management aims to introduce students to planning, organizing, securing and managing resources efficiently for the successful completion of specific project goals and objectives. Students will learn to design, manage and monitor international technology and engineering projects.

# **STUDY LOAD**

Туре	Hours	Percentage
Hours large group	30,0	16.00
Hours medium group	30,0	16.00
Self study	127,5	68.00

Total learning time: 187.5 h

# **CONTENTS**

### Module 1. Project life cycle and organization

### Description:

The goal of this module is to introduce the students to the project life cycle and organization, including the definition of different approaches for project management according to project characteristics.

### Specific objectives:

Life cycle of a project

Organizational structures and project management environment Project Management approaches: from agile to traditional

### **Related activities:**

In-class activities Group project

**Full-or-part-time:** 48h Theory classes: 9h Practical classes: 9h Self study: 30h

#### Module 2. Disruptive project management: baseline and design

### Description:

Within this module, the students will learn and apply disruptive management methods to define a baseline and validate their idea for a project. The hands-on sessions will combine theory and practice to master common tools and methods of design thinking, agile and lean management.

### **Specific objectives:**

Methods to identify user needs and generate ideas Value and feasibility Validation and priority

#### Related activities:

In-class activities Group project

Full-or-part-time: 57h 20m

Theory classes: 12h Practical classes: 12h Self study: 33h 20m

#### Module 3: Disruptive project management: solution definition

#### **Description:**

Within this module, the students will learn and apply disruptive management methods to define and refine the solution of their project. The hands-on sessions will combine theory and practice to master common tools and methods of design thinking, agile and lean management.

# Specific objectives:

How to refine and prioritize the features and functions of a proposed solution.

What are and how to create user stories.

Application of SCRUM to generate an optimum solution.

### Related activities:

In-class activities Group project

**Full-or-part-time:** 47h Theory classes: 9h Practical classes: 9h Self study: 29h

# **GRADING SYSTEM**

The final grade depends on the following three elements:

- $\ensuremath{^*}$  30%, In-class activities: Case Studies and procedural aspects
- \* 30%, In-class activities: Class discussions and attendance
- \* 40%, Group project: Project deliverables and presentation

**Date:** 26/11/2025 **Page:** 3 / 3
