295023 - ECMA - Materials Structure and Characterization

Coordinating unit: 295 - EEBE - Barcelona East School of Engineering
Teaching unit: 702 - CMEM - Department of Materials Science and Metallurgy
Academic year: 2017
Degree: BACHELOR'S DEGREE IN MATERIALS ENGINEERING (Syllabus 2010). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: Catalan, Spanish

Teaching staff
Coordinator: MARTA PEGUEROLES NEYRA
Others: Pegueroles Neyra, Marta

Degree competences to which the subject contributes

Specific:
1. Knowledge of science, technology and materials' chemistry fundamentals. Understanding the relation between microstructure, synthesis or processing and materials' properties.

Transversal:
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

Teaching methodology

Sessions will be taught in a theory, problems and laboratory practices format in which the subject's specific competencies will be introduced. Present directed activities to work on spoken and written communication and team work will take place. Autonomous learning and the solvent use of information resources by means of non-presence directed activities will also be encouraged.

Learning objectives of the subject

The subject's objective is that students acquire knowledge on the fundaments of material families, their structure and defects. In addition, students will have to know the different microstructural characterisation techniques as well as knowing to interpret results obtained by means of different techniques.

| **TOPIC I. Engineering materials** | 15h | Theory classes: 4h  
Laboratory classes: 1h  
Self study: 10h |
| **TOPIC II: Crystalline structures** | 35h | Theory classes: 9h  
Practical classes: 6h  
Self study: 20h |
| **TOPIC III: Crystalline defects** | 35h | Theory classes: 9h  
Laboratory classes: 6h  
Self study: 20h |

**Description:**
- **TOPIC I. Engineering materials**
  - Material science and engineering.
  - Types of materials: metals, ceramics and glasses, polymers, composite materials, semiconductors.
  - From structure to properties.

- **TOPIC II: Crystalline structures**
  - Unit cell.
  - Crystal systems.
  - Primary crystal structures (BCC, FCC, HCP)
  - Crystallographic directions and planes. Miller indices.

- **TOPIC III: Crystalline defects**
  - Defects in crystalline materials (point defects, linear defects, planar defects, volumetric defects)
  - Dislocations (Geometry of dislocations and Burgers vector)
  - Movement of dislocations (dislocation glide)
A student's grade will be:
Final Mark = 0.5 Final Exam + 0.3 Partial Exam + 0.2 Practices
If reassessment, the student's grade will be:
Final Mark = 0.8 Reassessment Exam + 0.2 Practices

**TOPIC IV: Analysis of crystal structures**

**Learning time:** 20h
- Theory classes: 7h
- Laboratory classes: 3h
- Self study: 10h

**Description:**
- Diffraction techniques: X-Ray Diffraction (properties and X-ray sources, formulation Bragg powder diffractometer)
- Spectroscopic techniques: Infrared Spectroscopy
- Identification and analysis of crystalline phases

**TOPIC V: Polymers' structure and characterisation**

**Learning time:** 20h
- Theory classes: 4h
- Laboratory classes: 1h
- Self study: 15h

**Description:**
- Obtaining polymers (polymerisation reactions). Average molecular mass and techniques to determine it.
- Architecture molecular (linear, ramified and reticulated) and polymer classification into thermoplastics, Thermostables and elastomers.
- Polymers' structure (amorphous and semicrystalline). Techniques to determine vitreous transmission temperature.
- Aggregation states.
- Copolymers.

**TOPIC VI: Experimental techniques to identify microstructures and defects**

**Learning time:** 25h
- Theory classes: 7h
- Laboratory classes: 3h
- Self study: 15h

**Description:**
- Optical metalography. Preparing samples. Grain size according to ASTM and determining the grain's diameter.
- Transmission electronic microscopy (TEM).
Bibliography

**Basic:**

**Complementary:**
