

## 295202 - ISA - Integration of Automatic Systems

Coordinating unit:	295 - EEBE - Barcelona East School of Engineering
Teaching unit:	707 - ESAIL - Department of Automatic Control
Academic year:	2017
Degree:	BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Teaching unit Optional) BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Teaching unit Optional) BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional) BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
ECTS credits:	6
Teaching languages:	Catalan, Spanish

### Teaching staff

Coordinator: Gámiz Caro, Javier Francisco

Others: Gamiz Caro, Juan  
Lluva Serra, Marc  
Guerra Paradas, Edmundo  
Lavèrnia Ferrer, David

### Requirements

Have studied the subject of Information Systems and Industrial Communication (SICIEIA)

### Degree competences to which the subject contributes

Specific:

- CEEIA-26. Understand automatic regulation and control techniques and their application to industrial automation.
- CEEIA-27. Understand the principles and applications of automated systems.
- CEEIA-28. Apply their knowledge to industrial informatics and communications.
- CEEIA-29. Design automatic control systems.

General:

- CG-03. (ENG) Conocimiento en materias básicas y tecnológicas, que les capacite para el aprendizaje de nuevos métodos y teorías y les dote de versatilidad para adaptarse a nuevas situaciones.
- CG-04. (ENG) Capacidad de resolver problemas con iniciativa, toma de decisiones, creatividad, razonamiento crítico y de comunicar y transmitir conocimientos, habilidades y destrezas en el campo de la Ingeniería Industrial.

Transversal:

- 07 AAT N3. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

## 295202 - ISA - Integration of Automatic Systems

### Learning objectives of the subject

Learn about the different technologies for production automation.  
 Meet and implements the various processes to be developed to when designing and implementing an automation project.  
 Design and known techniques of communication between applications in SCADA systems.  
 Apply criteria Industrial safety and prevention of occupational hazards in designing solutions to problems Automation  
 Select and know how to implement control methods in multidisciplinary applications.  
 Learn how to integrate PLCs, robots, vision equipment and SCADA systems for production automation.  
 They know how to run and monitor production processes in the plant (MES - Manufacturing Execution System)

### Study load

Total learning time: 150h	Hours large group:	15h	10.00%
	Hours medium group:	0h	0.00%
	Hours small group:	45h	30.00%
	Guided activities:	0h	0.00%
	Self study:	90h	60.00%

### Content

<p><b>AUTOMATED SYSTEMS INTEGRATION</b></p>	<p>Learning time: 150h          Theory classes: 15h          Laboratory classes: 45h          Self study : 90h</p>
<p>Description:          Advanced Programming Software Drivers PLC and Scada's          Process simulation techniques          intelligent field instrumentation          Communication techniques between applications (DDE and OPC).          advanced automation systems.          Evaluation and selection of equipment in flexible manufacturing systems.          Industrial systems perception.          Redundancy and security of computer systems automation.          Distributed control systems.          Deterministic systems.</p>
