310006 - Business Economics

Teaching methodology

The theoretical classes will consist on the master exposition by the professor of the theoretical contents of the subject (3 weekly hours. During the practical classes, the professor will present wordings or exercises of each topic so that the students, individually or in group solve them in class or at home. During these sessions there also will be solved these exercises, motivating the students involvement (2 weekly hours). Depending on the case, the students must upload the solved practices in Atenea so that the practice faculty can do the individual monitoring and correction.

- Theoretical method / master class: Oral exposition by the faculty of the subject contents.
- Participatory class: The students can take part in the class by means of short length activities.
- Resolution of problems and exercises: The students must carry out the suitable solutions by the implementation of information transformation procedures and the interpretation of the results.
- Case study: Intensive analysis of an incident, problem or real event with the purpose of undertand it, interpret it, solve it, generate hypothesis, corroborate data, reflect on it, complete the knowledge, diagnose it and sometimes rehearse the possible alternative solution methods.

Learning objectives of the subject

Business Economics gives to the student the notions and the elementary tools of the business management and decision making about economic and financial aspects, and its application to the resolution of a wide variety of problems. Furthermore, the subject gives the student the knowledge and the analytic ability to join construction companies, either managing and organising a small or medium sized ones or taking part in a team of a large or multinational company. The student will learn how to understand companies from different points of view: legal, economic and organizational, while the student acquires the abilities and requirements to deal with the job in the future.

- To know the necessities in the case of business growth. (Multinationals)

Content 4
- To have notions of commercial system: the market, its study and research, the functions of the marketing system, techniques and models, and the decision system of products, prices and publicity.

Content 5
- To have the ability to organize small business.
- To have the ability to participate as a member in a multidisciplinary teams in big companies.

Qualification system

The evaluation will take into account the final exam, the development of the practices and knowledge tests, and the Business Plan which the students (in limited groups) must hand over at the end of the course. Occasionally there will be other activities like visits, speeches, projections and debates that will also take into account.

The student must do the practices and knowledge tests individually and deliver them during the established period, as well as the synthesis work (Business Plan), being a required condition for the overcoming of the subject.

Final mark: 5% Knowledge tests + 10% Class practices + 20% Business Plan + 25% Midterm Exam + 40% Final Exam

Regulations for carrying out activities

. All the continuous evaluation activities must be delivered.
. The final exam will be done individually and by hand.
. The practices and works not delivered in the established dates won't have a mark. Mark 0 points.
Bibliography

Basic:

Others resources:

The student may have available the next material:
- Manual of the subject with all the theoretical explanations slides made in class.
- Statement of exercises and cases and their resolution published on campus Athena.
- Additional readings published on campus Atenea.
- Personalized attention of the teacher during the preparatory tutorials of the knowledge tests and final exam.
