820149 - ASM - Actuators and Sensors for Mechatronics

Coordinating unit: 295 - EEBE - Barcelona East School of Engineering
Teaching unit: 709 - EE - Department of Electrical Engineering
Academic year: 2015
Degree: BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING
(Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING
(Syllabus 2009). (Teaching unit Optional)

ECTS credits: 6  Teaching languages: English

(Syllabus 2009). (Teaching unit Optional)

Teaching staff
Coordinator: Ramón Bargalló Perpiñà
Others: Jordi Sust

Opening hours
Timetable: UR1- BA17, usually I am on my room on mornings.

Prior skills
Some knowledge of:
- physical concepts: electromagnetism, mechanics.....
- Electrical circuits: DC, AC and transient analysis (Sistemas Electricos)
- Matlab (not compulsory, but recommended)

Requirements
Not necessary

Degree competences to which the subject contributes

Transversal:
1. TEAMWORK - Level 2. Contributing to the consolidation of a team by planning targets and working efficiently to favor communication, task assignment and cohesion.
2. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.

Teaching methodology
Theory sessions to show fundamental principles, Problem sessions to show how apply theory concepts to basic and advanced calculation, Practical sessions to train the student to use and postprocessing FE software to design electromechanical actuators and sensors. Every student must solve a set of homework exercises and design a sensor or actuator using these FE tools.

Learning objectives of the subject
Electromagnetism theory applied to actuators design.

<p>| Study load | Hours large group: | 30h | 20.00% |
|            | Hours medium group: | 0h  | 0.00%  |
|            | Hours small group:  | 15h | 10.00% |
|            | Guided activities:  | 15h | 10.00% |
|            | Self study:         | 90h | 60.00% |</p>
