820426 - FAB - Manufacturing

Degree competences to which the subject contributes

General Objectives
1. Knowledge of parts manufacturing.
2. Create the ability to control and verificate products.
3. Develop the ability to solve problems of metrology and manufacturing processes.
4. To know the rules to make the parts.
5. Ability to select the optimal manufacturing process of a piece.

Teaching staff
Coordinator: JOSE ANTONIO TRAVIESO RODRIGUEZ
Others: Jerez Mesa, Ramon
Arroyo Gonzalez, Ruben

Degree: BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Compulsory)
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: Catalan, Spanish

Teaching methodology
In the theory and problems classes we will present the items listed in this subject guide, and we'll propose issues and little exercises to do in the classroom and as homework.
For explanations will be used: the blackboard, transparencies, PowerPoint, CD-ROM, Flash Drive, Video and Multimedia Systems. Also in class we will show samples of parts, components and small tools related to the subject matter. The students will have notes and documentation in virtual space ATENEA UPC Campus.

Learning objectives of the subject

1. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

Specific:
CEMEC-19. Understand and apply graphic engineering techniques.

Transversal:
1. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

Qualification system

Parcial tests 35 % / Generic proficiency (Assessed through individual exercises deliverables): 10 % / Laboratories: 20 % / Final Test: 35 %

Regulations for carrying out activities

There are two parcial test. Each one of them is to evaluate topics 1 and 2 (1s test) and 3 and 4 (2d test). They will be develope in 1:30 hour. There are also a final test to evaluate the other topics, and at the same time you will do the Laboratories test. In this subject there are not re-evaluation exam
