

# Help Us answering our Online Survey about: Requirements Reuse and Patterns

Cristina Palomares, Xavier Franch, Carme Quer

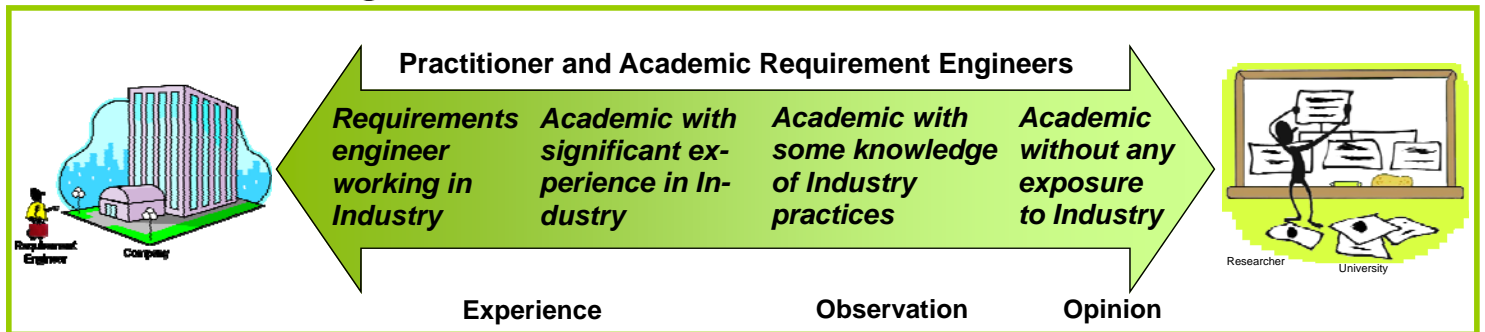

GESSE Research Group, Universitat Politècnica de Catalunya (UPC), Barcelona, Spain  
{cpalomares, franch, cquer}@essi.upc.edu

## Goals of the Survey

To know current requirements engineering practices related with essential aspects for the definition of requirement patterns.

To analyze the current and potential use of patterns in industry.

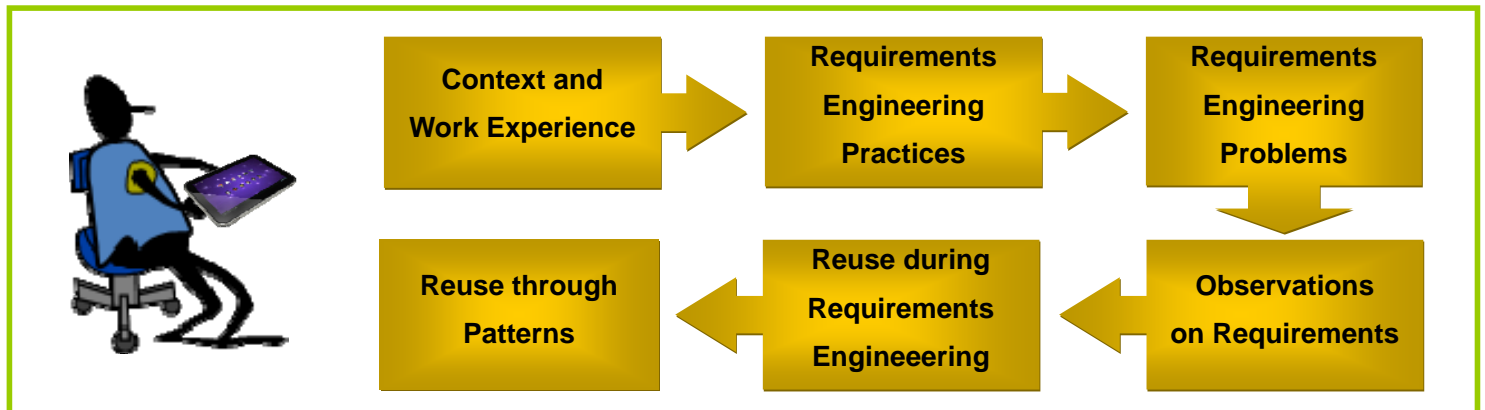

## Who is the target audience?

## Survey site

<http://www.upc.edu/gessi/PABRE/REFSQ2013-Survey.html>

## The flow of the Survey

## The research behind this Survey

**A Patterns Catalogue**

**The PABRE System**

- I manage the patterns catalogue.
- I decide which new patterns to add.
- I analyze the statistics of use of patterns, and use them to evolve the catalogue.
- I manage the classification schemas that may be used for browsing the catalogue.
- I manage projects.
- I generate the requirements specification document or the call for tenders document.
- I have to fulfill my needs.
- I agree with the Requirement Analyst on whether pattern covers some of my needs.

During the Reqs. Elicitation Meeting:

- I browse the patterns catalogue in order to elicit the requirements in a project.
- I look up the goal of a pattern to discuss with the client if it is relevant in their project.

**Try it!**

**Free Experimentation**  
If you want to explore our framework

**Guided Experimentation**  
If you want to use our framework in a specific project without any modification

**Assets Customization**  
If you want to customize: Patterns, Tools, or Methods

Your Organization

## PABRE: Patterns Based Requirements Elicitation
