

Project Idea	University	Project Description	Skills/Area of Interest
Podcast on ESG	UGA	Recording a series of podcast on ESGs, particularly ESG reporting to the EU Commission, with interviews of specialists. (This relates to sustainable management of companies in Europe)	Sustainable development, ESG, Refugees, Entrepreneurship, Economics and Management
Robot Competition	UGA	Participation in events where teams compete in robot matches. Seeking collaboration with a Unite! network partner university through the Seed Fund Initiative. More detailed project description in progress.	Robotics
Electric Motorcycle Competition in a World Championship	UPC - ESEIAAT	Designing, manufacturing and developing an electric competition motorcycle that speeds up to 210km/h and competes with different universities in the MotoStudent international championship, particularly in the VIII edition.	Mechanics, CFD, Electronics, Aerodynamics, Marketing...
Unite! Challenge on Digital Manufacturing	UPC	Challenge for Unite! Students proposed by Unite! SMEs for the design of an industrial part using digital manufacturing.	Digital Manufacturing, Design
Cooperation with Tororo (Uganda)	UPC - ESEIAAT	Cooperation with the Agururu school in Tororo. Teaching how to build wheel chairs with affordable materials, general carpentry, and other technical skills. Raising funds to provide necessary materials to the community.	Sustainable development, cooperation, engineering
International training program for students "Versatile Engineers of the future"	Wroclaw Tech	The project aims to provide training opportunities to students from UNITE! universities on various leadership, soft and those related to project management skills. The project would be based on the several-day "training camps" in the country of each partner. They would focus on three aspects: training, exchange of experiences between people from different student organizations, and getting to know what a given partner organization does on a daily basis.	Training courses, leadership
"Unite! Poster Contest on Architectural Energy for Sustainable Development"	Polito	This poster contest aims to get advanced ideas from bachelor, master and PhD students to make contributions to architectural energy for sustainable development. The main topics include architectural design in the energy aspect, green building with health, sustainable design in buildings, advanced methods for architectural energy, demonstration design projects, but not limited to these.	Architectural Design Sustainable Development Energy Efficiency Environmental Sustainability

Dronethon and flying competetion	Wroclaw Tech	We want to organize a drone hackathon (building and coding) at our place, and we are looking for a partner to conduct the competition as missions in their country.	Engineering, Drone technology
