Teaching unit: 804 - CITM - Image Processing and Multimedia Technology Centre.

Degree: BACHELOR'S DEGREE IN VIDEO GAME DESIGN AND DEVELOPMENT (Syllabus 2014). (Compulsory subject).

Academic year: 2025 **ECTS Credits:** 6.0 **Languages:** English

LECTURER

Coordinating lecturer: Mas, Eudald

Others: Bañó, Joan-Francesc

TEACHING METHODOLOGY

- The lecturer will explain the new contents with references and exercises to the students. Students will have to study and prepare these exercises during the following days in order to put into practice and better understand the contents of the course.
- The course, in addition to the specific theory required, aims to be practical, focusing on "learning by doing" and on the knowledge of the tools needed to evaluate how a company works. Also the need for profitability that each video game (or product) must pursue and the notions of finance that will be useful to them in the future.
- Students will participate by commenting on real cases in the classroom.
- They will also learn what and how financial reporting is required to manage a company.
- It will be important for students to participate during the course in the creation of business plans, presentations to investors and budget control.
- At least 2 case studies will be conducted. The teacher will present the case and the students will have to develop it and explain it to the rest of the class, while the others comment.
- The oral presentations will be important to take the students out of their comfort zone and force them to synthesize and summarize information, very relevant also for their future as entrepreneurs or individual workers.

LEARNING OBJECTIVES OF THE SUBJECT

- To design business plans, reflecting financing, distribution and marketing strategies, in the field of video game design and development.
- To formulate strategies and techniques to improve the economic performance, positioning and online reputation of a video game company.
- To create budgets for the development and commercialization of a video game and finance a company.
- To identify the fundamentals of financial control, such as budgetary deviation, annual accounts, losses and gains, the balance sheet and how cash circulates in a company.

GRADING SYSTEM

- Presentation and partial delivery work: 30%.
- Presentation and final delivery work: 30%.
- Final exam: 30%.
- 10% of the final grade: Involvement and attitude of the student (execution of the whole course).

Students who have failed the curricular assessment will have the option of taking the re-evaluation exam. The grade of this exam will replace the grade of the final exam. In case of passing the subject, the maximum final grade will be 5.

Irregular actions that may lead to a significant variation of the grade of one or more students constitute a fraudulent performance of an evaluation act. This action entails the descriptive grade of failure and a numerical grade of 0 for the ordinary global evaluation of the course, without the right to re-evaluation.

If the lecturers have indications of the use of AI tools not allowed in the evaluation tests, they may summon the students concerned to an oral test or a meeting to verify the authorship.
