Course guide
820006 - I - Informatics

Unit in charge:	Barcelona East School of Engineering
Teaching unit:	723 - CS - Department of Computer Science.

Degree:	BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN ENERGY ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Compulsory subject).
	BACHELOR'S DEGREE IN MATERIALS ENGINEERING (Syllabus 2010). (Compulsory subject).

Academic year: 2023   **ECTS Credits:** 6.0   **Languages:** Catalan, Spanish, English

LECTURER

Coordinating lecturer:	JAVIER FARRERES DE LA MORENA - FERRAN JUAN BARUEL

Others:

Primer quadrimestre:
JOAN FRANCESC ALONSO LÓPEZ - Grup: M23, Grup: M41, Grup: M91
MARTHA IVÓN CÁRDENAS DOMÍNGUEZ - Grup: X11, Grup: X22
NEUS CATALA ROIG - Grup: M62, Grup: M73
JUAN LUIS ESTEBAN ÁNGELES - Grup: M33, Grup: M43, Grup: T12
JAVIER FARRERES DE LA MORENA - Grup: M31, Grup: M32, Grup: M33, Grup: M51, Grup: M52, Grup: M53, Grup: M81, Grup: M82, Grup: M83, Grup: X11, Grup: X12, Grup: X13
JOAQUIN GABARRÓ VALLÉS - Grup: M83, Grup: M92
PEDRO GOMIS ROMAN - Grup: T11, Grup: T21
FERRAN JUAN BARUEL - Grup: M21, Grup: M22, Grup: M23, Grup: M41, Grup: M42, Grup: M43, Grup: M61, Grup: M62, Grup: M63, Grup: M71, Grup: M72, Grup: M73, Grup: M91, Grup: M92, Grup: M93, Grup: X21, Grup: X22, Grup: X23
MARC LLUVA SERRA - Grup: X23
CRISTIAN MATA MIQUEL - Grup: M11, Grup: M31
FRANCISCO JOSÉ MUGICA ALVAREZ - Grup: X12, Grup: X21
SERGIO PAVON SALAMANCA - Grup: T21, Grup: T22, Grup: T23, Grup: X13
ANTONI PEREZ POCH - Grup: M11
ELVIRA PATRICIA PINO BLANCO - Grup: M22, Grup: M52, Grup: M72, Grup: M82, Grup: M93, Grup: T23
CARLES PLANUCH PRATS - Grup: T11, Grup: T12, Grup: T13
FERNANDO GUILLERMO SANABRIA ORTEGA - Grup: M21, Grup: M42
RAMON SANGÜESA SOLE - Grup: T22
MARIA JOSEFINA SIERRA SANTIBAÑEZ - Grup: M63, Grup: M81
JORGE TURMO BORRÁS - Grup: M32, Grup: M53, Grup: M61
SUSANA ADRIANA VELAZQUEZ LERMA - Grup: M51, Grup: M71

Segon quadrimestre:
JAVIER FARRERES DE LA MORENA - Grup: M23
PEDRO GOMIS ROMAN - Grup: M11, Grup: M12, Grup: M13
FERRAN JUAN BARUEL - Grup: M11, Grup: M21, Grup: M22, Grup: M23
CRISTIAN MATA MIQUEL - Grup: M13
FLAVIO PALMIERI - Grup: M12

SERGIO PAVON SALAMANCA - Grup: T11, Grup: T13
ELVIRA PATRICIA PINO BLANCO - Grup: M22
CARLES PLANUCH PRATS - Grup: T11, Grup: T12, Grup: T13

PRIOR SKILLS

There are no previous capacities.

REQUIREMENTS

No requirements.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
2. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Transversal:
1. EFFECTIVE USE OF INFORMATI0N RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

TEACHING METHODOLOGY

This subject consists of two weekly presential classes in a large group, and a 2-hour weekly session in the laboratory. During the large group classes, theoretical explanations will be combined with examples and active solving of exercises by the students. During the laboratory sessions the students will follow the laboratory teacher proposed activities.

LEARNING OBJECTIVES OF THE SUBJECT

At the end of the course, the student:
0. Learn the basics of hardware and operating systems.
1. Recognize and appropriately apply the iterative search and travel schemes in trouble small and medium size. For this:
    1. know the basic constituents of imperative languages: variables, types, expressions, statements.
    2. know the three basic algorithmic compositions and properties: sequential, alternative and iterative.
    3. Know and use the concept of data stream i their properties.
2. Can design and use functions. For this:
    1. Know and apply the parameterization.
3. Perform treatment programs sequences over:
    1. structured variables.
    2. files.
    3. input data.
4. It will be able to use external libraries own field of engineering. For this:
    1. Be familiar with standard software systems documentation.
    2. will be able to include and use the libraries in their programs.
Currently the programming language used as a base is a subset of Python, although the main aim is not in learning the details of language but in solving algorithmic problems and building structured programs.

STUDY LOAD

Type	Hours	Percentage
Hours small group	30,0	20.00
Hours large group	30,0	20.00
Self study	90,0	60.00

Total learning time: 150 h

CONTENTS

Chapter 1 - Basic concepts

Description:
Computer architecture: von Neumann model, computer elements.
Operative system: virtual machine, resources manager.

Specific objectives:
0. Learn the basics of hardware and operating systems.

Related activities:
Theoretical classes.

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 2h
Laboratory classes: 2h

Chapter 2 - Structured programming basics

Description:
Variables
Data types
Statements: assign, input, output
Expressions, operators and precedence
Variables, constants and data types.
Algorithm structure.
Elementary instructions: reading, writing, assigning.

Specific objectives:
1. Recognize and appropriately apply the iterative search and travel schemes in trouble small and medium size. For this:
   1. know the basic constituents of imperative languages: variables, types, expressions, statements.

Related activities:
Theoretical classes.
Practical classes
Activity 1: Assessments with computer
Activity 2: Written assessment
Activity 3: Use of external libraries

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 16h
Theory classes: 4h
Laboratory classes: 4h
Self study : 8h

Chapter 3- Compositions sequential, alternative and iterative

Description:
Concept of data sequence
Development of the algorithmic'structures resulting from the structured program theorem:
Sequential composition
Alternative composition
Iterative composition
Iterative schemes

Specific objectives:
1. Recognize and appropriately apply the iterative search and travel schemes in trouble small and medium size. For this:
    2. know the three basic algorithmic compositions and properties: sequential, alternative and iterative.
    3. Know and use the concept of data stream i their properties.

Related activities:
Theoretical classes.
Practical classes
Activity 1: Assessments with computer
Activity 2: Written assessment
Activity 3: Use of external libraries

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 20h
Theory classes: 4h
Laboratory classes: 6h
Self study : 10h

Chapter 4 - Functions and parameters

Description:
Input parameters
Output parameters
Dessign with functions

Specific objectives:
2. Can design and use functions. For this:
    1. Know and apply the parameterization.

Related activities:
Theoretical classes
Practical classes
Activity 1: Assessments with computer
Activity 2: Written assessment
Activity 3: Use of external libraries

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 14h
Theory classes: 2h
Laboratory classes: 4h
Self study : 8h

Chapter 5- Structured Types

Description:
String treatment
Homogeneus and heterogeneus lists treatment
Dictionaries
Files and data bases

Specific objectives:
1. Recognize and appropriately apply the iterative search and travel schemes in trouble small and medium size. For this:
    3. Know and use the concept of data stream i their properties.
3. Perform treatment programs sequences over:
    1. structured variables.
    2. files and databases.

Related activities:
Theoretical classes
Practical classes
Activity 1: Assessment with computer 2 and 3
Activity 2: Written assessment

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 39h
Theory classes: 9h
Laboratory classes: 8h
Self study : 22h

Chapter 6 - Sequencial Treatment Schemas

Description:
Concept of travel and search
Troubleshooting

Specific objectives:
1. Recognize and appropriately apply the iterative search and travel schemes in trouble small and medium size. For this:
    3. Know and use the concept of data stream i their properties.
3. Perform treatment programs sequences over:
    1. structured variables.
    2. files and databases.
    3. input data.

Related activities:
Theoretical classes
Practical classes
Activity 1: Assessments with computer
Activity 2: Written assessment

Related competencies :
CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.

Full-or-part-time: 36h
Theory classes: 8h
Laboratory classes: 6h
Self study : 22h

GRADING SYSTEM

The final note of the subject results from the following addition:
FN = 20% Exercise 1 + 20% Exercise 2 + 20% Exercise 3 + 35% Theory + 5% Competence

FN: final note

There is no final reassessment

EXAMINATION RULES.

· All activities are part of the continous assessment model of the subject. Therefore, students repeating this subject will not be allowed to save any part of their notes for the following term.
· If a student does not hand over an activity, it will be considered as non marked.
· Students will be allowed to consult a reference card of the programming language during the partial and final assessment exercises.
