## DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

---

**Specific:**

1. Design and manage applied experimentation procedures, particularly for determining thermodynamic and transport properties, and the modelling of phenomena and systems in the field of chemical engineering, such as fluid flow systems, heat and mass transfer operations and the kinetics of chemical reactions and reactors.

**Transversal:**

2. TEAMWORK - Level 3. Managing and making work groups effective. Resolving possible conflicts, valuing working with others, assessing the effectiveness of a team and presenting the final results.

### Design and evaluation of a pilot project

### Description:

It is about developing a specific practice including objectives, experimental design, data collection from all the groups of the course, data processing, elaboration/application of models, conclusions, discussion of results. It includes the follow-up meetings of the project and the public presentation of work and common discussion of the results obtained in two sessions.

Laboratory classes: 8h

Guided activities: 8h

Self study : 24h

## ACTIVITIES

---

### Continuous assessment 1 (Practices)

**Description:**

Each practice will involve the presentation of a corresponding group report with a weekly delivery periodicity. The evaluation of the report is joint for the whole group. The non face-to-face work of each group is reflected in the delivery of a weekly group summary document as well.

**Material:**

Notes, Digital Campus material.

**Delivery:**

Written report and Summary document per group. Weekly delivery.

**Full-or-part-time:** 100h

Laboratory classes: 40h

Self study: 60h

### Continuous Assessment 2 (Project)

**Description:**

Each project group will present a final report focused on an experiment (experimental project).

**Material:**

Notes, Digital Campus material

**Delivery:**

Written report by group + presentation

**Full-or-part-time:** 40h

Theory classes: 8h

Guided activities: 8h

Self study: 24h

### Final Examen

**Description:**

Evaluation of the knowledge acquired at the individual level through a final exam.

**Material:**

Practice reports, notes, etc.

**Full-or-part-time:** 2h

Theory classes: 2h
