

Course guide

820535 - TFGQ - Bachelor's Thesis

Last modified: 14/06/2023

Unit in charge: Barcelona East School of Engineering
Teaching unit: 710 - EEL - Department of Electronic Engineering.

Degree: BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Project subject).

Academic year: 2023 **ECTS Credits:** 24.0 **Languages:** Catalan, Spanish, English

LECTURER

Coordinating lecturer: Velasco Quesada, Guillermo

Others:

PRIOR SKILLS

It is convenient to have passed all the compulsory subjects of the curriculum.

REQUIREMENTS

The Bachelor project will be carried out, as a general rule, in the last semester of the degree. The Project should be enrolled in the last semester of the degree, when the student has a maximum of 36 ECTS to be completed. Registering the Project is a prerequisite for enrollment.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

CEQUI-TFG. Original exercise to be carried out individually and to be presented and defended before a university commission, consisting of a project in the field of specific industrial engineering technologies of a professional nature in which the competences acquired in the courses of the integrate the competences acquired in the courses.

Transversal:

01 EIN N3. ENTREPRENEURSHIP AND INNOVATION - Level 3. Using knowledge and strategic skills to set up and manage projects. Applying systemic solutions to complex problems. Devising and managing innovation in organizations.

02 SCS N3. SUSTAINABILITY AND SOCIAL COMMITMENT - Level 3. Taking social, economic and environmental factors into account in the application of solutions. Undertaking projects that tie in with human development and sustainability.

04 COE N3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 3. Communicating clearly and efficiently in oral and written presentations. Adapting to audiences and communication aims by using suitable strategies and means.

06 URI N3. EFFECTIVE USE OF INFORMATION RESOURCES - Level 3. Planning and using the information necessary for an academic assignment (a final thesis, for example) based on a critical appraisal of the information resources used.

07 AAT N3. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

03 TLG. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.

TEACHING METHODOLOGY

Student activities led by the professor.
Reading teaching material, texts and articles related to the contents of the subject.
Student's autonomous work

LEARNING OBJECTIVES OF THE SUBJECT

To use tools and techniques for the engineering project management including planning, development and execution. To know and implement rules and specifications. To write text with correct structure to the communication objectives.

To introduce the assessment to the audience following the correct strategies and resources. To identify the need and type of communication register, the surrounding and services within the knowledge field and context.

To develop and implement projects from the original guidelines transmitted by the professor within the aspects written before. To have a proactive attitude that generate new opportunities within a commercial perspective. To be able to evaluate the economic cost (budget) of the different tasks in the project.

To be able to analyse and evaluate the social and environmental impact.

STUDY LOAD

Type	Hours	Percentage
Self study	524,0	87.33
Guided activities	76,0	12.67

Total learning time: 600 h

CONTENTS

Engineering project

Description:

Preliminary project, final project and viability. Phases and concepts.

Full-or-part-time: 55h

Guided activities: 25h

Self study : 30h

Technical documentation

Description:

Identify information needs and use collections, spaces and services to design and execute appropriate searches in the subject area.

Full-or-part-time: 55h

Guided activities: 25h

Self study : 30h

Project management

Description:

Carry out work based on basic guidelines, deciding how much time to devote to each section, including personal contributions and expanding sources of information.

Assess the economic cost of the different tasks involved in the work.

Full-or-part-time: 55h

Guided activities: 25h

Self study : 30h

Environmental and health and safety aspects of the project

Description:

Ability to analyse and assess social and environmental impact.

Full-or-part-time: 55h

Guided activities: 25h

Self study : 30h

Communication in projects

Description:

Writing texts with a structure appropriate to the communication objectives.

Full-or-part-time: 125h

Guided activities: 25h

Self study : 100h

Standardisation and regulation

Description:

Know and apply specifications, regulations and standards.

Full-or-part-time: 45h

Guided activities: 15h

Self study : 30h

Preparation of a final thesis as an integrative or synthesis exercise

Description:

Carrying out a project in the field of specific chemical engineering technologies of a professional nature in which the competences acquired throughout the studies are synthesised and integrated.

Full-or-part-time: 100h

Self study : 100h

Preparation of assessable activities

Description:

Prepare the presentation of texts and other material for the public presentation of the work carried out, taking into account appropriate strategies and means.

Full-or-part-time: 106h

Self study : 106h

Defence of the project

Description:

Preparation and public defence before the assigned university commission.

Full-or-part-time: 4h

Guided activities: 4h

GRADING SYSTEM

Evaluation from the presentation of a preliminary draft and a public presentation of the work before an assigned university commission. The commission will be take into account:

- Individual work
- Written and oral presentation related to the contents of the subject
- Written and oral presentation of the project before the commission that will assess the acquired competences knowledges and abilities.

EXAMINATION RULES.

In order to be able to present the work before the assigned commission, the final revision and authorization by the professor director of the final report is necessary.

The work must be presented according to the normalization established by the School. For this purpose, the student will find all the information and templates on the website of the School.
