TEACHING METHODOLOGY

Go to Catalan or Spanish version.

LEARNING OBJECTIVES OF THE SUBJECT

The objective of the subject is to make known the processes, procedures and instruments linked to the office of the urban planner in the usual practice applied to urban planning, as a central instrument for the implementation of the urban project and construction of the city. We will make known the administrative context (where, how and when), the rules of governance (who decides and how) and citizen participation (how it is affected).

Critical capacity is acquired to: develop programs and define planning characteristics and objectives; conceive, draft and formulate urban plans at any scale, and the implementation mechanisms of the plan to be taken into account. The knowledge acquired will be applied in a unique comprehensive process applied to the workshop project.

STUDY LOAD

Type	Hours	Percentage
Hours large group	30,0	24.00
Self study	95,0	76.00

Total learning time: 125 h
