

## Course guide

### 230650 - CN - Communication Networks

**Last modified:** 01/06/2023

**Unit in charge:** Barcelona School of Telecommunications Engineering  
**Teaching unit:** 744 - ENTEL - Department of Network Engineering.

**Degree:** MASTER'S DEGREE IN TELECOMMUNICATIONS ENGINEERING (Syllabus 2013). (Compulsory subject).  
MASTER'S DEGREE IN ADVANCED TELECOMMUNICATION TECHNOLOGIES (Syllabus 2019). (Optional subject).

**Academic year:** 2023    **ECTS Credits:** 5.0    **Languages:** English

#### LECTURER

---

**Coordinating lecturer:** Consultar aquí / See here:  
<https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/responsables-assignatura>

**Others:** Consultar aquí / See here:  
<https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/professorat-assignat-idioma>

#### PRIOR SKILLS

---

- Packet switched networks: datagram and virtual circuit oriented.
- Concepts as throughput, network efficiency and occupancy.
- Error control and compression mechanisms. Source coding. Channel coding.
- Medium Access Control algorithms: Aloha, CSMA-CD, CSMA-CA.
- Local Area Networks: Ethernet (hubs, switches, switching tables, spanning tree protocol, VLANs, flow control, autoconfiguration, implementations).
- Communication protocols: IPv4 (fragmentation, subnetting, supernetting, routing tables), ICMPv4, ARP, TCP (sliding window mechanism, flow and congestion algorithms), UDP, HTTP, DNS.
- Markov chains modelling. Queuing systems (Erlang-B, Erlang-C).
- To be familiarized with communication protocols analyzers: wireshark.
- Linux: medium level for operating system operation and advanced level on network interfaces configuration.

#### DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

---

**Specific:**

1. Ability to deal with the convergence, interoperability and design of heterogeneous networks with local, access and core networks, as well as with service integration (telephony, data, television and interactive services).
2. Ability to design and dimension transport, broadcast and distribution networks for multimedia signals
3. Ability to model, design, implement, manage, operate, administrate and maintain networks, services and contents
4. Ability to plan networks and decision-making about services and applications taking into account: quality of service, operational and direct costs, implementation plan, supervision, security processes, scalability and maintenance. Ability to manage and assure the quality during the development process
5. Ability to understand and to know how to apply the functioning and organization of the Internet, new generation Internet technologies and protocols, component models, middleware and services

#### Transversal:

6. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.

7. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

## TEACHING METHODOLOGY

- Lectures.
- Application classes.
- Individual work.
- Exercises.

## LEARNING OBJECTIVES OF THE SUBJECT

Learning objectives of the subject:

The aim of this course is to train students in access and core network technologies, both wired and wireless and understand the functioning and organization of the new generation Internet technologies, protocols, component models and services.

Learning results of the subject:

- Ability to specify, design networks, services, processes and applications of telecommunications in both fixed and mobile environments, personal, local or long distance, with different bandwidths, in multicast networks, including voice and data.
- Ability to apply both traffic engineering as planning tools, dimensioning and network analysis.
- Ability to analyse, model and implement new architectures, network protocols, communication interfaces and new network services and applications.
- Ability to implement and design the convergence and interoperability of heterogeneous networks considering local, access and core networks.

## STUDY LOAD

Type	Hours	Percentage
Self study	86,0	68.80
Hours large group	39,0	31.20

**Total learning time:** 125 h

## CONTENTS

### 1. Wireless local area networks

#### Description:

IEEE802.11 standard including versions, physical layer, MAC layer and access schemes (PCF and DCF), quality of service, power management, fairness and performance analysis

#### Full-or-part-time: 33h

Theory classes: 12h

Self study : 21h

## 2. Low-Rate Wireless Personal Networks

**Description:**

IEEE 802.15.4, ZigBee, 6LowPAN and Wireless Sensor Networks

**Full-or-part-time:** 10h

Theory classes: 4h

Self study : 6h

## 3. IPv6

**Description:**

IPv6, ICMPv6, autoconfiguration

**Full-or-part-time:** 10h

Theory classes: 4h

Self study : 6h

## 4. Routing

**Description:**

Routing algorithms

Interior Gateway Protocols: RIP, OSPF

Exterior Gateway Protocols: BGP4

Routing in MANET

**Full-or-part-time:** 10h

Theory classes: 4h

Self study : 6h

## 5. Network virtualization

**Description:**

Concepts and definitions

Modelling

Virtual Network Embedding

Metrics

Online and Online

**Full-or-part-time:** 12h

Theory classes: 4h

Self study : 8h

## 6. Network optimization

**Description:**

Network modelling: Notation, metrics

Optimization

**Full-or-part-time:** 9h

Theory classes: 3h

Self study : 6h

## 7. Core networks

### Description:

Basic concepts: Classification, traffic aggregation, service categories, QoS, control strategies, fair resources allocation. MPLS and SDN networks: Motivation, architecture, SDN controller, OpenFlow.

**Full-or-part-time:** 18h

Theory classes: 6h

Self study : 12h

## 8. Fixed access networks

### Description:

Basic concepts. Optical fiber access networks. Classification. GPON standard. Other access networks.

**Full-or-part-time:** 6h

Theory classes: 2h

Self study : 4h

## Final test

### Description:

Final test

**Full-or-part-time:** 17h

Theory classes: 2h 30m

Self study : 14h 30m

## GRADING SYSTEM

Final examination: 60%.

Individual assessments: 40%.
