

Course guide 280715 - 280715 - Advenced Ship's Manoeuvring

Last modified: 07/10/2024

Unit in charge: Teaching unit:	Barcelona School of Nautical Studies 742 - CEN - Department of Nautical Sciences and Engineering.		
Degree:	MASTER'S DEGREE IN NAUTICAL SCIENCE AND MARITIME TRANSPORT MANAGEMENT (Syllabus 2016). (Compulsory subject).		
Academic year: 2024	ECTS Credits: 5.0	Languages: Spanish, English	
LECTURER			

Coordinating lecturer:	JORGE MONCUNILL MARIMÓN
	Primer quadrimestre: JORGE MONCUNILL MARIMÓN - Grup: ERAS, Grup: MNGTM
Others:	Primer quadrimestre: IMAD EL BALI EL BALI - Grup: ERAS, Grup: MNGTM JORGE MONCUNILL MARIMÓN - Grup: ERAS, Grup: MNGTM

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

CE9-MNGTM. Conocimiento del comportamiento del buque en la mar y de su maniobrabilidad.

Generical:

CG4-MNGTM. Capacitat per gestionar, planificar i coordinar la seguretat del vaixell i la protecció de les persones a bord CG16-MNGTM. (ENG) Capacidad para ejercer el practicaje portuario y el remolque marítimo CG21-MNGTM. (ENG) Capacidad para realizar tareas de investigación, desarrollo e innovación en el ámbito de su especialidad

Transversal:

CT5. FOREIGN LANGUAGE: Achieving a level of spoken and written proficiency in a foreign language, preferably English, that meets the needs of the profession and the labour market.

CT3. TEAMWORK: Being able to work in an interdisciplinary team, whether as a member or as a leader, with the aim of contributing to projects pragmatically and responsibly and making commitments in view of the resources that are available.

CT4. EFFECTIVE USE OF INFORMATION RESOURCES: Managing the acquisition, structuring, analysis and display of data and information in the chosen area of specialisation and critically assessing the results obtained.

TEACHING METHODOLOGY

- MD2. Participating expositive class
- MD4. Autonomous learning by resolution of exercises
- MD5. Learning based on problems/projects

LEARNING OBJECTIVES OF THE SUBJECT

Ensure that the student has the necessary knowledge/skills to understand the operation and handling of the different propulsion and steering equipments.

Ensure that the student has the necessary knowledge/skills to plan a berthing, unberthing and anchoring maneuver, taking into account: the equipment and maneuverability of the ship; the effect of wind and current; the effect of shallow waters, narrow channels and interaction between ships, and shipyard entrance.

Ensure that the student has a global vision of the maneuver with all its phases.

Ensure that the student is able to perform the proper maneuver in case of emergency, as well as a search and rescue maneuver.

On the other hand, one of the objectives of this subject is provide the knowledge, understanding and proficiency of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (complete competence: Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.1 manoeuvres when approaching pilot, stations and embarking or disembarking pilots, with due regard to weather, tide, headreach and stopping distances

.2 handling ship in rivers, estuaries and having regard to the effects of current, wind and restricted water on helm response

.3 application of constant rate of turn techniques

.4 manoeuvring in shallow water, including the reduction in underkeel clearance caused by squat, rolling and pitching

.5 interaction between passing ships and between own ship and nearby banks (canal effect)

.6 berthing and unberthing under various conditions of wind, tide and current with and without tugs

.7 ship and tug interaction

.8 use of propulsion and manoeuvring systems

.9 choice of anchorage $1\frac{3}{4}$ anchoring with one or two anchors in limited anchorages and factors involved in determining the length of anchor cable to be used

.10 dragging anchor; clearing fouled anchors

.11 drydocking, both with and without damage

.12 management and handling of ships in heavy weather, including assisting a ship or aircraft in distress 134 towing operations 134 means of keeping an unmanageable ship out of trough of the sea, lessening drift and use of oil

.13 precautions in manoeuvring to launch rescue boats or survival craft in bad weather

.14 methods of taking on board survivors from rescue boats and survival craft

.15 ability to determine the manoeuvring and propulsion characteristics of common types of ships, with special reference to stopping distances and turning circles at various draughts and speeds

.16 importance of navigating at reduced speed to avoid damage caused by own ship's bow wave and stern wave

.17 practical measures to be taken when navigating in or near ice or in conditions of ice accumulation on board

.18 use of, and manoeuvring in and near, traffic separation schemes and in vessel traffic service (VTS) areas

STUDY LOAD

Туре	Hours	Percentage
Self study	80,0	64.00
Hours large group	45,0	36.00

Total learning time: 125 h

CONTENTS

Theme 1: Revision of principles of maneuver

Description:

Revision of principles of maneuver: turning circle, stopping tracks, pivot point, effects of the rudder and propeller. Effect of the wind and current, and effect/handling of two propellers and two rudders.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.1 manoeuvres when approaching pilot, stations and embarking or disembarking pilots, with due regard to weather, tide, headreach and stopping distances

.2 handling ship in rivers, estuaries and having regard to the effects of current, wind and restricted water on helm response

.3 application of constant rate of turn techniques

.6 berthing and unberthing under various conditions of wind, tide and current with and without tugs

.8 use of propulsion and manoeuvring systems

.9 choice of anchorage¹³/₄ anchoring with one or two anchors in limited anchorages and factors involved in determining the length of anchor cable to be used

Full-or-part-time: 33h 20m

Self study : 33h 20m

Theme 2: Main maneuvers in conventional vessels

Description:

Main manouvers for berthing and unberthing in conventional ships (practices in simulator). Main manoeuvers for anchoring, picking up and ship to ship in conventional ships, in different circumsatnces, and berthing to a buoy.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.1 manoeuvres when approaching pilot, stations and embarking or disembarking pilots, with due regard to weather, tide, headreach and stopping distances

.2 handling ship in rivers, estuaries and having regard to the effects of current, wind and restricted water on helm response

.3 application of constant rate of turn techniques

.6 berthing and unberthing under various conditions of wind, tide and current with and without tugs

.8 use of propulsion and manoeuvring systems

.9 choice of anchorage 1^{3} anchoring with one or two anchors in limited anchorages and factors involved in determining the length of anchor cable to be used

Related activities: Exercices

Full-or-part-time: 19h 27m Laboratory classes: 4h Self study : 15h 27m

Theme 3: Interactions

Description:

Effect of shallow watrer and narrow chanels (squat, bank) and interaction between ships.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.2 handling ship in rivers, estuaries and having regard to the effects of current, wind and restricted water on helm response

.4 manoeuvring in shallow water, including the reduction in underkeel clearance caused by squat, rolling and pitching

.5 interaction between passing ships and between own ship and nearby banks (canal effect)

Full-or-part-time: 8h 20m

Self study: 8h 20m

Theme 4: Ships equiped with: two propellers, two rudders, azimutal thrusters or waterjets

Description:

Azimutal thruster: mecanical (L-drive, Z-drive) and electrical (pods) transmission, and their handling. Waterjet propulsion and other kind of propulsors.

Maneuvers with ships equiped with two propellers, two rudders, azimutal thrusters and waterjets in simulator.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.1 manoeuvres when approaching pilot, stations and embarking or disembarking pilots, with due regard to weather, tide, headreach and stopping distances

.2 handling ship in rivers, estuaries and having regard to the effects of current, wind and restricted water on helm response .3 application of constant rate of turn techniques

.6 berthing and unberthing under various conditions of wind, tide and current with and without tugs

.8 use of propulsion and manoeuvring systems

Related activities:

Exercices

Full-or-part-time: 38h 53m Laboratory classes: 8h Self study : 30h 53m

Theme 5: Planning a maneuver with its phases

Description:

Planning a manoeuver, its phases, communication with traffic service and Pilots, and tug assistance.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.1 manoeuvres when approaching pilot, stations and embarking or disembarking pilots, with due regard to weather, tide,

headreach and stopping distances

.7 ship and tug interaction

.9 choice of anchorage 13 anchoring with one or two anchors in limited anchorages and factors involved in determining the length of anchor cable to be used

.10 dragging anchor; clearing fouled anchors

.11 drydocking, both with and without damage

.15 ability to determine the manoeuvring and propulsion characteristics of common types of ships, with special reference to stopping distances and turning circles at various draughts and speeds

.17 practical measures to be taken when navigating in or near ice or in conditions of ice accumulation on board

.18 use of, and manoeuvring in and near, traffic separation schemes and in vessel traffic service (VTS) areas

Full-or-part-time: 8h 20m Self study : 8h 20m

Theme 6: Emergencies

Description:

Keep proper course in fire; keep a heading in a blackout if it is possible; response in failure of any element (engine, rudder, rope, anchor).

Searc and recue: tracks for searching, MOB manouvers and rescue boat handling.

Specific objectives:

Knowledge, understanding and proficiency of part of the competence MANEUVER AND HANDLE A SHIP IN ALL CONDITIONS (Table A-II/2-10):

10.1. Manoeuvring and handling a ship in all conditions, including:

.12 management and handling of ships in heavy weather, including assisting a ship or aircraft in distress $1\frac{1}{4}$ towing operations $1\frac{1}{4}$ means of keeping an unmanageable ship out of trough of the sea, lessening drift and use of oil

.13 precautions in manoeuvring to launch rescue boats or survival craft in bad weather

.14 methods of taking on board survivors from rescue boats and survival craft

.16 importance of navigating at reduced speed to avoid damage caused by own ship's bow wave and stern wave

Full-or-part-time: 16h 40m

Self study : 16h 40m

GRADING SYSTEM

The final qualification is the sum of the following partial qualifications: Qfinal = 0,52*Qfe + 0,48*Qce Qfinal: Final qualification Qfe: Qualification of the final exam Qce: Qualification of the exercices (continuous evaluation)
