Metodologies Docents

The course is divided into parts:
- Theory classes
- Practical classes
- Self-study for doing exercises and activities.

In the theory classes, teachers will introduce the theoretical basis of the concepts, methods and results and illustrate them with examples appropriate to facilitate their understanding.

In the practical classes (in the classroom), teachers guide students in applying theoretical concepts to solve problems, always using critical reasoning. We propose that students solve exercises in and outside the classroom, to promote contact and use the basic tools needed to solve problems.

Students, independently, need to work on the materials provided by teachers and the outcomes of the sessions of exercises/problems, in order to fix and assimilate the concepts.

The teachers provide the syllabus and monitoring of activities (by ATENA).

Objectius d'aprenentatge de l'assignatura

The aim of this subject is to provide basic knowledge on building’s energy certification scenarios including the analysis of the energy consumption and energy saving measures. The course will be mainly concerned with the limitation of buildings’ energy demand and energy performance certification.

Dedicació total: 75 h
CONTINGUTS

Certificació energètica d'edificis

Descripció:
Introduction to energy consumption in buildings
Introduction to the related legal framework
LIDER: Software for Limitation of energy demand in buildings
CALENER: Software for Buildings' Energy certification of buildings
Examples of smart technologies integration (energy metering and sensor-actuator networks) in buildings

Activitats vinculades:
Project developed in small groups related to an energy certification and proposal of energy performance improvements. Each group will choose the building object of analysis.
During some sessions, small exercises will be conducted in the class individually or in small groups and some others will be virtual.

Dedicació: 75h
Grup gran/Teoria: 30h
Aprenentatge autònom: 45h

SISTEMA DE QUALIFICACIÓ

The final grade depends on the following assessment criteria:
- Project (part 1), weight: 35 %
- Project (part 2), weight: 35 %
- Class activities, weight: 30 %

Non-satisfactory results in the project will be able to be redirected by improving the project individually after highlighting weak points. All the students have the right to improve the project. The improved project will have to be delivered the day scheduled by the school within the period of final exams. Marks in the improved project can range from 0 to 10. Only the best mark will be taken into account.
