Degree competences to which the subject contributes

Basic:
CB1. Students will be able to demonstrate their knowledge of a field of study that builds on secondary education and is usually found at a level that, while supported by advanced textbooks, also includes aspects that involve knowledge of the latest developments in the field of study.
CB2. Students will be able to apply their knowledge to their work or vocation in a professional manner and demonstrate that they possess the competencies that are typically demonstrated by elaborating and defending arguments and solving problems in the field of study.

Specific:
CE5. Spatial vision capacity and knowledge of graphic representation techniques, both by traditional methods of metric geometry and descriptive geometry, and by computer aided design applications.

Generical:
CG3. Knowledge of basic and technological subjects that will enable students to learn new methods and theories and that will endow them with the versatility needed to adapt to new situations.

Transversal:
1. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 1. Planning oral communication, answering questions properly and writing straightforward texts that are spelt correctly and are grammatically coherent.
2. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
3. TEAMWORK - Level 1. Working in a team and making positive contributions once the aims and group and individual responsibilities have been defined. Reaching joint decisions on the strategy to be followed.

Teaching methodology
MD1 Master class or lecture (EXP)
MD2 Problem solving and case study (RP)
MD4 Directed theoretical and practical work (TD)
MD5 Small-scale project, activity or assignment (PR)
MD7 Assessment activities (EV)

Learning objectives of the subject
OAG1. Facilitate and improve the capacity for abstraction.
OAG2. Develop and exercise spatial imagination.
OAG3. Introduce concepts, techniques and methodologies in the area of graphic expression in industrial engineering.
OAG4. Use and understand the graphics language typical of industry.
# 330505 - EG1 - Graphic Expression 1

## Study load

## Content

<table>
<thead>
<tr>
<th>Industrial standardisation</th>
<th>Learning time: 18h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Practical classes: 6h</td>
</tr>
<tr>
<td></td>
<td>Self study : 12h</td>
</tr>
</tbody>
</table>

**Description:**
- Freehand technical drawing.
- Obtaining standardised views.
- Treatments: cutaways and sections.
- Guidelines for industrial dimensioning.
- Screw threads and other standardised items.
- Graphic representation of industrial assemblies.

**Related activities:**
- CRO1, CRO2, PRA

**Specific objectives:**
- OAG1, OAG3, OAG4

<table>
<thead>
<tr>
<th>Geometry and wireframe</th>
<th>Learning time: 9h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Practical classes: 3h</td>
</tr>
<tr>
<td></td>
<td>Self study : 6h</td>
</tr>
</tbody>
</table>

**Description:**
- Geometric locus.
- Projections and representation systems: basic operational techniques.
- Points, lines and planes. Relative positions.
- Conditions of perpendicularity, parallelism and convergence.
- Distances.
- Angles

**Related activities:**
- PRA

**Specific objectives:**
- OAG1, OAG2
### Surfaces

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>PRA, PRO</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Specific objectives:</th>
</tr>
</thead>
<tbody>
<tr>
<td>OAG2, OAG4</td>
</tr>
</tbody>
</table>

**Learning time:** 7h 30m  
Practical classes: 2h 30m  
Self study: 5h
### Planning of activities

| **Classroom sketching (CRO1)** | **Hours:** 3h 30m  
**Theory classes:** 3h 30m |
|-------------------------------|---------------------|
| **Description:**              | Understanding axonometric views.  
First angle projection representation.  
Using drawing and representation tools.  
Result evaluation. |
| **Support materials:**        | Basic drawing/sketching tools |
| **Descriptions of the assignments due and their relation to the assessment:** | Paper. |
| **Specific objectives:**      | OAG1, OAG2, OAG3 y OAG4 |

| **Sketching and independent study (CRO2)** | **Hours:** 15h  
**Self study:** 15h |
|--------------------------------------------|---------------------|
| **Description:**                           | Understanding axonometric views.  
First angle projection representation.  
Using drawing and representation tools.  
Result evaluation. |
| **Support materials:**                     | Basic drawing/sketching tools |
| **Descriptions of the assignments due and their relation to the assessment:** | Paper. |
| **Specific objectives:**                   | OAG1, OAG2, OAG3 i OAG4 |

| **CAD activities (PRA)** | **Hours:** 38h 30m  
**Practical classes:** 18h  
**Self study:** 20h 30m |
|--------------------------|---------------------|
| **Description:**          | Representing objects, parts, assemblies and subassemblies with CAD tools.  
Obtaining drafts with all the necessary indications and symbols for a perfect understanding of parts and assemblies. |
| **Support materials:**    | PC, basic drawing and measuring tools. |
Descriptions of the assignments due and their relation to the assessment:
Atenea.

Specific objectives:
OAG2, OAG3 i OAG4

CAD design projects (PRO)  

Hours: 21h
Self study: 9h
Practical classes: 12h

Description:
Idea and approach.
Planning.
Sketching and calculation.
Parts and drafting.
Integration and assembly draft.
Oral presentation.

Support materials:
PC, basic drawing and measuring tools.

Descriptions of the assignments due and their relation to the assessment:
Atenea.

Specific objectives:
OAG2, OAG3 i OAG4

Qualification system

The mark is obtained by continuous assessment of the students' work.
- Individual theory activities: 9%
- Self-learning activities: 9%
- Individual CAD activities: 16%
- CAD assembly: 10%
- CAD project: 14%
- Individual standardisation test: 24%
- Individual special geometry and surfaces test: 18%
Regulations for carrying out activities

The practical exercises carried out on the computer will be sent using the platform Atenea in the state in which they are at the end of the class. They must be delivered the following week on paper or in the form indicated by the professor.

Handwritten practical exercises will be done on a sheet with a specific format. Some exercises will require the use of traditional tools, such as set squares, triangles, compasses and protractors.

Other previous generic skills and/or qualities applicable to any academic activity at the university are also required, including a spirit of sacrifice, neatness, capacity for synthesis, teamwork, respect for companions and the professor, and constancy.
