200101 - FVC - Complex Variable Functions

Coordinating unit: 200 - FME - School of Mathematics and Statistics
Teaching unit: 749 - MAT - Department of Mathematics

Academic year: 2018
Degree: BACHELOR'S DEGREE IN MATHEMATICS (Syllabus 2009). (Teaching unit Compulsory)
ECTS credits: 7,5

Teaching languages: Catalan

Degree competences to which the subject contributes

Specific:
1. CE-2. Solve problems in Mathematics, through basic calculation skills, taking into account tools availability and the constraints of time and resources.
2. CE-3. Have the knowledge of specific programming languages and software.
3. CE-4. Have the ability to use computational tools as an aid to mathematical processes.

General:
4. CB-1. Demonstrate knowledge and understanding in Mathematics that is founded upon and extends that typically associated with Bachelor's level, and that provides a basis for originality in developing and applying ideas, often within a research context.
5. CB-2. Know how to apply their mathematical knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader or multidisciplinary contexts related to Mathematics.
6. CB-3. Have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information, but that include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements.
7. CG-1. Show knowledge and proficiency in the use of mathematical language.
8. CG-2. Construct rigorous proofs of some classical theorems in a variety of fields of Mathematics.
9. CG-3. Have the ability to define new mathematical objects in terms of others already known and ability to use these objects in different contexts.
10. CG-4. Translate into mathematical terms problems stated in non-mathematical language, and take advantage of this translation to solve them.
12. CG-6 Detect deficiencies in their own knowledge and pass them through critical reflection and choice of the best action to extend this knowledge.

Transversal:
11. SELF-DIRECTED LEARNING. Detecting gaps in one's knowledge and overcoming them through critical self-appraisal. Choosing the best path for broadening one's knowledge.
200101 - FVC - Complex Variable Functions

**Teaching methodology**

There are three one hour lectures and two one hour problem sessions per week.

**Learning objectives of the subject**

(Section not available)

**Study load**

<table>
<thead>
<tr>
<th>Total learning time: 187h 30m</th>
<th>Hours large group: 45h 24.00%</th>
<th>Hours medium group: 0h 0.00%</th>
<th>Hours small group: 30h 16.00%</th>
<th>Guided activities: 0h 0.00%</th>
<th>Self study: 112h 30m 60.00%</th>
</tr>
</thead>
</table>

There are three one hour lectures and two one hour problem sessions per week.
# Content

## The Complex Plane

*Learning time: 10h*
- Theory classes: 6h
- Practical classes: 4h

**Description:**

## Functions of a complex variable. Power series

*Learning time: 10h*
- Theory classes: 6h
- Practical classes: 4h

**Description:**

## Derivation. Holomorphic functions

*Learning time: 10h*
- Theory classes: 6h
- Practical classes: 4h

**Description:**

## Contour integral. Cauchy's theorems and applications

*Learning time: 10h*
- Theory classes: 6h
- Practical classes: 4h

**Description:**
There will be a mid-term exam (ME) and a final exam (FE). The final grade will be the maximum between the grade of FE and the mean grade of ME and FE.

An extra exam will take place on July for students that failed during the regular semester.
