ECTS credits: 3
Teaching languages: English

Teaching staff
Coordinator: Pau Fernández

Prior skills
It is very important that students know a programming language like C++ or Java well.

Teaching methodology
The material will be taught through practical classes, alternating a presentation with slides with practical demonstrations in the form of tutorials. It is recommended that students bring their own laptops.

Learning objectives of the subject
The aim of the course is to introduce the student to the technologies behind web applications and make him able to develop small-scale web apps. The course touches all required concepts in a simplified way to enable students to understand the technology. It teaches HTML, CSS, , NodeJS and SQLite at a basic level so that a complete project can be built.
