210270 - MEB - From Rough Material to Design with Parametric Tools

**Coordinating unit:** 210 - ETSAB - Barcelona School of Architecture

**Teaching unit:** 735 - PA - Department of Architectural Design

**Academic year:** 2019

**Degree:**
- DEGREE IN ARCHITECTURE STUDIES (Syllabus 2014). (Teaching unit Optional)
- DEGREE IN ARCHITECTURE (Syllabus 2010). (Teaching unit Optional)

**ECTS credits:** 5

**Teaching languages:** Spanish, English

### Teaching staff

**Coordinator:** MARTA DOMÈNECH RODRÍGUEZ

**Others:** Primer quadrimestre:
- MARTA DOMÈNECH RODRÍGUEZ - 14

### Degree competences to which the subject contributes

**Basic:**
- CB1. Translation from Spanish slope
- CB2. Translation from Spanish slope
- CB3. Translation from Spanish slope
- CB4. Translation from Spanish slope
- CB5. Translation from Spanish slope

**Specific:**
- EP20. Translation from Spanish slope
- EP22. Translation from Spanish slope
- EP23. Translation from Spanish slope
- ET15. Translation from Spanish slope
- EP19. Translation from Spanish slope

**General:**
- CG4. Translation from Spanish slope
- CG1. Translation from Spanish slope
- CG2. Translation from Spanish slope

**Transversal:**
- CT1. Translation from Spanish slope
- CT2. Translation from Spanish slope
The main purpose of this course is the reintroduction of material thinking in the practice of the architectural project with new digital tools and through applied research.

The course will have a theoretical part and a practical one, in which the students will build a small vaulted pavilion in the schoolyard, projected by them.

During 2019-20, the materials to be used will be cork and earth.

**Learning objectives of the subject**

The main purpose of this course is the reintroduction of material thinking in the practice of the architectural project with new digital tools and through applied research.

The course will have a theoretical part and a practical one, in which the students will build a small vaulted pavilion in the schoolyard, projected by them.

During 2019-20, the materials to be used will be cork and earth.

Description:
1. Introduction. Designing with raw material:
   - The materiality in the architectural project.
   - Durability and productive cycle of natural materials used in architecture.
     (Course 2019/2020: Cork and earth)
   - Reasons to design with unprocessed materials: economic and environmental transformations.
2. Matter to design:
   - Cork
   - Earth
3. Introduction to parametric design tools and formal optimization:
   - Introduction to graphic statics and structural design.
   - Introduction to the new software of parametric design and formal optimization.
4. Development and construction of a small pavilion: Practice in parametric design + practice in the construction of the project.
