220003 - Business

**Coordinating unit:** 205 - ESEIAAT - Terrassa School of Industrial, Aerospace and Audiovisual Engineering

**Teaching unit:** 732 - OE - Department of Management

**Academic year:** 2018

**Degree:**
- BACHELOR'S DEGREE IN AEROSPACE TECHNOLOGY ENGINEERING (Syllabus 2010). (Teaching unit Compulsory)
- BACHELOR'S DEGREE IN AEROSPACE VEHICLE ENGINEERING (Syllabus 2010). (Teaching unit Compulsory)

**ECTS credits:** 6

**Teaching languages:** Catalan, Spanish

### Teaching staff

**Coordinator:** Simo Guzman, Pep

**Others:**
- Trullas Casasayas, Irene
- Resa Navarro, Javier

### Degree competences to which the subject contributes

**Specific:**
1. An adequate understanding of business concepts and the institutional and legal framework of companies. An understanding of business organisation and management

**Transversal:**
2. ENTREPRENEURSHIP AND INNOVATION - Level 1. Showing enterprise, acquiring basic knowledge about organizations and becoming familiar with the tools and techniques for generating ideas and managing organizations that make it possible to solve known problems and create opportunities.
220003 - Business

**Teaching methodology**

The course is divided into three parts:

* Theory classes
* Practical classes
* Self-study for doing exercises and activities.

In theory classes, teachers will introduce the theoretical basis of the concepts, methods and results illustrating them with examples appropriate to facilitate their understanding.

In practical classes (at the classroom), teachers guide students in applying theoretical concepts to solve problems, always basing critical reasoning. We propose that students solve exercises in and outside the classroom, to promote contact and use the basic tools needed to solve problems.

Students, independently, need work on material provided by teachers and the outcomes of the sessions of exercises and problems, in order to fix and assimilate the concepts.

Teachers provide a curriculum and monitoring of activities (by ATENEA).

**Learning objectives of the subject**

The course introduces the concepts, principles and basics of economics and management and organization of aeronautical enterprises. From the introduction of the strategy and planning concepts, the course covers the three main functions of a company: marketing, finance and operations.

</tbody>
</table>

Support materials:
- Formulation of the test.

Descriptions of the assignments due and their relation to the assessment:
Students will give their resolution.

Specific objectives:
The test must demonstrate that the student has acquired and assimilated the concepts.

PROJECT OF BUSINESS PLAN

<table>
<thead>
<tr>
<th>Description:</th>
<th>Hours: 31h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Groups of 4 students where they will apply the principles introduced in the aeronautical sector.</td>
<td>Theory classes: 1h</td>
</tr>
<tr>
<td></td>
<td>Self study: 30h</td>
</tr>
</tbody>
</table>

Support materials:
- Formulation of the exercise (ATENEA).
- Materials of the course.
- Official websites (Internet).
- Recommended textbooks.

Descriptions of the assignments due and their relation to the assessment:
The report of the activity is delivered in digital format.

Specific objectives:
Apply the principles introduced in Units.

Generic: Entrepreneurship and innovation (special assessment), Analysis and Synthesis, Efficient use of information resources, Teamwork, Autonomous learning, and Written communication.
Qualification system

The final score depends on four assessments:

- 1st mid-semester exam (ExPar1): 20%
- 2nd mid-semester exam (ExPar2): 20%
- Project (Proj): 45%
- Practices (Prac): 15%

Students will be able to improve their performance on the final exam (ExFin).

\[
\text{Qualification} = \text{Max} \left[ \text{ExFin}, (0.2 \times \text{ExPar1} + 0.2 \times \text{ExPar2} + 0.45 \times \text{Proj} + 0.15 \times \text{Prac}) \right]
\]

The generic skills are exceeded only by participating actively in the project.
