220034 - Hydraulic Systems

Coordinating unit: 205 - ESEIAAT - Terrassa School of Industrial, Aerospace and Audiovisual Engineering
Teaching unit: 729 - MF - Department of Fluid Mechanics
Academic year: 2019
Degree: BACHELOR'S DEGREE IN AEROSPACE VEHICLE ENGINEERING (Syllabus 2010). (Teaching unit Compulsory)
ECTS credits: 4,5  Teaching languages: Catalan

Teaching staff
Coordinator: Salvador de las Heras
Others: Hipòlit Moreno - Francisco Arias

Requirements
It is considered essential to have passed the subject of Fluid Mechanics.

Degree competences to which the subject contributes

Specific:
2. GrEVA - An adequate understanding of the following, as applied to engineering: aircraft systems and automatic flight control systems in aerospace vehicles.

Transversal:
1. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.

Teaching methodology
- Lecture presenting the contents.
- Practical work.
- Independent work and study exercises.
- Preparation and assessable activities in groups.

Learning objectives of the subject

After completing the course, students must have achieved Level 3 (application) with general learning objectives:

Technology in the field of specialty
- Understand the scientific foundations
- Know how to use the technology and the necessary engineering professional performance
- Analyze specific situations, define problems, make decisions and implement plans of action in the search for solutions.
- Apply knowledge to real situations, managing resources appropriately.
- Interpret studies, reports, and analyze data numerically.
- Select and manage the information sources.
- Use existing tools as support.
- Working in a multidisciplinary team.
- Evaluate the integral, personal motivation, mobility.
communication
- Understand and speak with the proper terminology.
- Discuss and argue on various forums.

Technology transfer.
- Analyze and evaluate the environmental, social and ethical profession.
- Have a critical and innovative spirit.
- Retraining in new technological developments through continuous learning.

# Module 1: INTRODUCTION TO THE HYDRAULIC SYSTEMS

**Learning time:** 18h 30m  
Theory classes: 6h  
Laboratory classes: 2h  
Self study: 10h 30m

**Description:**  
1.1. Energy transfer systems (STE)  
1.2. STE by fluids (STEF)  
1.3. Fluid (types, classification, properties, etc.)  
1.4. Pros and cons of the STEF

**Related activities:**  
A - Autotests  
C1 - Controls  
E - Application Exercises  
EP1 - First exam

---

# Module 2: COMPONENTS OF A STEF

**Learning time:** 40h  
Theory classes: 10h  
Laboratory classes: 6h  
Self study: 24h

**Description:**  
2.1. Conceptual scheme of a STEF  
2.2. Pumps  
2.3. Actuators: rotary and linear motors (cylinders)  
2.4. Control elements (valves)  
2.5. Fluid conditioning elements

**Related activities:**  
A - Autotests  
C1 - Controls  
E - Application Exercises  
EP1 - First exam
### Module 4: SERVO HYDRAULIC VALVES AND DRIVE

<table>

## Planning of activities

| T - THEORY LESSONS | Hours: 44h  
Theory classes: 25h  
Self study: 19h |
|-------------------|-------------|

### ACTIVITY 1: A - AUTOTESTS

| Hours: 18h  
Self study: 18h |
|-----------------|

**Description:**
Evaluable autotests of 60 minutes to make as individual self-learning.

**Support materials:**  
Questionnaires in ATENEA

**Descriptions of the assignments due and their relation to the assessment:**
Activity assessable where the note is within 10% of the rating system of the subject.

**Specific objectives:**
Acquiring the ability to know, understand and apply knowledge of the basic principles of the modules / topics, individual work and time management.

| ACTIVITY 2: C1 - CONTROL | Hours: 4h  
Theory classes: 1h  
Self study: 3h |
|--------------------------|-------------|

**Description:**
Controls multiple choice evaluable 45 minutes to hours of theory and / or Individual problems where in groups of 2 people.

**Support materials:**
Formula sheet done by the students themselves on one side of A4 paper.

**Descriptions of the assignments due and their relation to the assessment:**
Activity assessable where the note is within 10% of the rating system of the subject.

**Specific objectives:**
Acquiring the ability to know, understand and apply knowledge of the basic principles of the modules / topics, individual or team work and time management. Upon completion of this activity, the student should be able to:
- Demonstrate the achievement of specific objectives related to the content of modules 1, 2 and 3

| ACTIVITY 3: C2 - CONTROL | Hours: 4h  
Theory classes: 1h  
Self study: 3h |
|--------------------------|-------------|

**Description:**
Controls multiple choice evaluable 45 minutes to hours of theory and / or Individual problems where in groups of 2 people.

**Support materials:**
Formula sheet done by the students themselves on one side of A4 paper.
ACTIVITY 4: E - APPLICATION EXERCISES

Description:
Application exercises (example of application), summaries of reading articles, book chapters, book report, summary of attendance at seminars and / or conferences. proposed by the / the teacher / s.

Support materials:
Collection of problems of the subject hanging in ATHENA. It can also be considered supplemental material.

Descriptions of the assignments due and their relation to the assessment:
Activity assessable where the note is within 10% of the rating system of the subject.

Specific objectives:
Acquiring the ability to know, understand and apply knowledge of the basic principles of the modules / topics, individual or team work and time management. Upon completion of this activity, the student should be able to:
- Demonstrate the achievement of specific objectives related to the content of modules 4 and 5

ACTIVITY 5: EP - FIRST EXAM

Description:
Exam to do individually.

Support materials:
Formula sheet used in controls.

Descriptions of the assignments due and their relation to the assessment:
The test is 30% of the final grade and will be the date, time and scheduled classroom. Deliver the final test time devoted to the activity.

Specific objectives:
Upon completion of this activity, the student should be able to:
- Demonstrate the achievement of specific objectives related to the content of modules 1, 2 and 4

EF - SECOND EXAM

Hours: 10h
Theory classes: 2h
Self study: 8h
Description:
Exam to do individually.

Support materials:
Formula sheet used in controls.

Descriptions of the assignments due and their relation to the assessment:
The test is 30% of the final grade and will be the date, time and scheduled classroom. Deliver the final test time devoted to the activity.

Specific objectives:
Upon completion of this activity, the student should be able to:
- Demonstrate the achievement of specific objectives related to the content of moduls 1, 2, 3 and 4.

Qualification system

- 1st Evaluation: midterm exam, weight: 30% (with the possibility of recovery test midterm)
- 2nd Evaluation: final exam, weight: 30%
- Controls (Type test hours of class theory and / or problems): 20%
- Autotests (type self-test individual)): 10%
- Practical exercises (proposed real applications, reading articles, chapters reading books, attending seminars and / or conferences, etc.): 10%

Regulations for carrying out activities

Individual autotests as independent learning.
Controls are multiple choice and will individually or in pairs with an approximate duration of 45 minutes. A formula sheet can be handmade form by students.
The exams consist of two exercises lasting approximately two hours.
