Course guides  
220085 - INF - Fundamentals of Programming

Unit in charge: Terrassa School of Industrial, Aerospace and Audiovisual Engineering  
Teaching unit: 723 - CS - Department of Computer Science.

Degree: BACHELOR'S DEGREE IN INDUSTRIAL TECHNOLOGY ENGINEERING (Syllabus 2010). (Compulsory subject).

Academic year: 2021  
ECTS Credits: 6.0  
Languages: Catalan, Spanish

LECTURER

Coordinating lecturer: JOSEFINA LÓPEZ HERRERA  
MARTA GATIUS VILA

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. A basic understanding of the use and programming of computers, operating systems, databases and computer programs with applications in engineering

Transversal:
2. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 1. Planning oral communication, answering questions properly and writing straightforward texts that are spelt correctly and are grammatically coherent.

TEACHING METHODOLOGY

- Theory sessions
- Laboratory sessions
- Tasks and self-study exercises

The sessions consist of an exhibition explanation by the teacher of the contents of the content of the subject: theoretical basis, concepts, methods and results, illustrating them with examples appropriate to facilitate their understanding.

The working sessions will be practical in the classroom of two types:
- sessions in which the teacher guide students in analyzing data and solving problems by applying techniques concepts and theoretical results.
- Sessions Exam

The student will also be studied independently in order to assimilate the concepts and solving exercises (in on paper or computer). This student's work will be supported by online tools.
LEARNING OBJECTIVES OF THE SUBJECT

The main goal of the subject Computer Science is to learn to develop programs using a high level language. In order to pass the subject the student has to be able to:
- Learn the basic concept related to software and hardware: computers structure and operative systems.
- Learn the basic concepts for programming.
- Develop the ability to use basic tools and basic techniques of programming: algorithms and programs.
- Learn to design programs correctly: well-structured, efficient and readable.
- Learn to design data structures representing the data involved in a given problem.
- Design and develop a medium size program.
- Develop their ability to use abstraction in programming patterns to solve real problems.

Total learning time: 150 h

CONTENTS

1: INTRODUCTION TO COMPUTERS

Description:
1.1. Computer architecture.
1.2. Operating systems.
1.3. Computer programming.
1.4. Algorithms and programs.

Specific objectives:
- Define the terms "hardware" and "software".
- Understand the general structure of a computer.
- Understand what an operating system is.
- Name and describe the various types of operating systems.
- Know what a program is.
- Name various programming languages.
- Name and describe the various programming paradigms.
- Understand the basic requirements of a program.
- Name and describe the phases of software development.
- Understand what an algorithm is.

Related activities:
Activity 5, which corresponds to a group research and development project on an introductory topic.

Full-or-part-time: 11h
Laboratory classes: 2h
Self study: 9h
2. Basic programming concepts

Description:
2.1. Structure of a program.
2.2. Objects.
2.3. Expressions and operators.
2.4. Elementary actions.
2.5. Writing instructions.

Specific objectives:
- Properly use the objects in a program: constants and variables.
- Distinguish between correct and incorrect identifiers.
- Describe and use correctly the type of data available in the programming language as well as the defined operations.
- Describe the function of basic input and output actions and use them correctly.
- Understand assignment statements and use them correctly.
- Describe the structure of a program.
- Correctly develop a test suite.
- Determine whether the block structure of a program is correct.
- Correctly use alternative and iterative composition.
- Correctly build programs with objects, expressions, elementary actions and compositions.

Related activities:
- One type-1 activity: Individual continuous-assessment test spanning the various laboratory-group sessions.
- One or more type-2 activities: Individual take-home self-directed learning test.
- One or more type-3 activities: Individual take-home self-directed learning task.

Full-or-part-time: 28h
Laboratory classes: 10h
Self study: 18h
3. Subprogramms: Actions and functions

Description:
3.1. Actions.
3.2. Functions.
3.3. Parameter passing.
3.4. Library functions.

Specific objectives:
For students to:
- Determine whether a subroutine needs to be an action or a function.
- Send parameters by value and by reference.
- Define formal and actual parameters (arguments).
- Determine whether a formal parameter of an action or function is input, output or input/output.
- Write a program that uses library functions properly.
- Implement and use functions and actions properly.
- Detect and eliminate code repetition.
- Build programs correctly with the help of functions and actions.

Related activities:
- One type-1 activity: Individual continuous-assessment test spanning the various laboratory-group sessions.
- One or more type-2 activities: Individual take-home self-directed learning test.
- One or more type-3 activities: Individual take-home self-directed learning task.
- One phase of activity 4, the project.

Full-or-part-time: 27h
Laboratory classes: 10h
Self study : 17h

4. BASIC ALGORITHMS

Description:
4.1. Sequences.
4.2. Traversal techniques.
4.3. Search techniques.

Specific objectives:
Related activities:
- One type-1 activity: Individual continuous-assessment test spanning the various laboratory-group sessions.
- One or more type-2 activities: Individual take-home self-directed learning test.
- One or more type-3 activities: Individual take-home self-directed learning task.
- One phase of activity 4, the project.

Related activities:
- One type-1 activity: Individual continuous-assessment test spanning the various laboratory-group sessions.
- One or more type-2 activities: Individual take-home self-directed learning test.
- One or more type-3 activities: Individual take-home self-directed learning task.
- One phase of activity 4, the project.

Full-or-part-time: 26h
Laboratory classes: 10h
Self study : 16h
5. Structured type

Description:
5.1. Tuples.
5.2. Tables.
5.3. Traversal and search techniques in tables.
5.4. Sorting and search algorithms.

Specific objectives:
- Write the declaration of a tuple and a table.
- Correctly declare tuple and table variables and access the declarations properly.
- Correctly use pass-by-value and pass-by-reference evaluation with tuples and tables.
- Generate partially filled tables.
- Write code that inserts and removes items in a variable-length table.
- Understand and correctly use some sorting algorithms.

Related activities:
- One type-1 activity: Individual continuous-assessment test spanning the various laboratory-group sessions.
- One or more type-2 activities: Individual take-home self-directed learning test.
- One or more type-3 activities: Individual take-home self-directed learning task.
- One phase of activity 4, the project.

Full-or-part-time: 31h
Laboratory classes: 14h
Self study : 17h

6. Design descending

Description:
6.1. Top-down design of data structures.
6.2. Top-down design of processes.

Specific objectives:
- Design an efficient data structure for a given problem.
- Correctly access complex data structures.
- Given a complex problem, carry out top-down design using subroutines.

Related activities:
- Completion of activity 4, the project.

Full-or-part-time: 27h
Laboratory classes: 14h
Self study : 13h
# ACTIVITIES

## ACTIVITY 1: LABORATORY CONTROLS

**Description:**
Independent work in the classroom to cover all the specific learning objectives of the subject.
Professors corrections.

**Specific objectives:**
At the end of the activity, the student must have achieved specific objectives of the subject.

**Material:**
Topic notes available (PowerPoint).
Activity statement and the official correction criteria (rubric) available.

**Delivery:**
Resolution of the exercise by the student. The activities of type 1 represent 20% of the laboratory assessment.

GRADING SYSTEM

- First examination: 20%
- Second examination: 30%
- Control laboratory sessions: 20%
- Application/practicals: 10%
- Final Project: 20%

As part of the evaluation of the project it is included here the evaluation of the common skills

EXAMINATION RULES.

- Any of the control laboratory not performed, will be considered as non-marked
- In no case can any documentation or digital support be used in the partial or final test.
