Course guide
220129 - MDS - Motorbikes Design and Secrets

Unit in charge: Terrassa School of Industrial, Aerospace and Audiovisual Engineering
Teaching unit: 737 - RMEE - Department of Strength of Materials and Structural Engineering.

Degree: BACHELOR’S DEGREE IN AUDIOVISUAL SYSTEMS ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN TEXTILE TECHNOLOGY AND DESIGN ENGINEERING (Syllabus 2009). (Optional subject).
BACHELOR’S DEGREE IN AEROSPACE TECHNOLOGY ENGINEERING (Syllabus 2010). (Optional subject).
BACHELOR’S DEGREE IN AEROSPACE VEHICLE ENGINEERING (Syllabus 2010). (Optional subject).
BACHELOR’S DEGREE IN INDUSTRIAL DESIGN AND PRODUCT DEVELOPMENT ENGINEERING (Syllabus 2010). (Optional subject).
BACHELOR’S DEGREE IN INDUSTRIAL TECHNOLOGY ENGINEERING (Syllabus 2010). (Optional subject).

Academic year: 2023  ECTS Credits: 3.0  Languages: English

LECTURER

Coordinating lecturer: Rafael Weyler
Others: Alcalá Vergara, Daniel

TEACHING METHODOLOGY

The course is divided into parts:
Theory classes
The theoretical sessions will explain basic concepts of design and how the motorcycle and some of its components works. The explanations will include the motorcycle physics and dynamics and possible improvements through motorcycle and human interaction models.
Practical classes
Practical classes are done in order to understand the importance of the theoretical concepts. The students will get in touch with real machines and how they are designed, manufactured and tunned.

LEARNING OBJECTIVES OF THE SUBJECT

This course is intended to introduce students into the engineering applications from the user point of view and not as an engineer, who does not necessarily have such training. This course will focus on a highly technical and specialized automotive discipline such as motorcycling, in which almost everything is related to engineering. It is proposed to show the importance of proper communication, as well as how technical concepts must be properly summarized, transmitted and documented in accordance with the purpose of the device designed. It is also of vital importance and at the same time is overlooked, the role of engineers have into the specification of user skills or the training they should receive in order to manage properly the designed devices.
The course will pay special attention on all these concepts. It will be organized into theoretical lectures and practical classes.
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours large group</td>
<td>30.0</td>
<td>40.00</td>
</tr>
<tr>
<td>Self study</td>
<td>45.0</td>
<td>60.00</td>
</tr>
</tbody>
</table>

Total learning time: 75 h

CONTENTS

Module 1: Theory

Description:
1. Introducing Motorcycles
2. Motorcycle Mechanics
3. Dynamic Principles
4. Chassis Design
5. Alternative and Advanced Designs

Related activities:
Theoretical Sessions
Activity 1: Assignments

Full-or-part-time: 45h
Theory classes: 20h
Self study: 25h

Module 2: Applied Activities

Description:
1. Motorcycle Racing Session
2. Manufacturing Practice

Related activities:
Practical Sessions
Activity 2: Project Design

Full-or-part-time: 30h
Theory classes: 10h
Self study: 20h

GRADING SYSTEM

Activity 1: 50%
Activity 2: 50%
