Course guide
230001 - CAL - Calculus

Unit in charge: Barcelona School of Telecommunications Engineering
Teaching unit: 749 - MAT - Department of Mathematics.
Degree: BACHELOR'S DEGREE IN TELECOMMUNICATIONS TECHNOLOGIES AND SERVICES ENGINEERING (Syllabus 2015). (Compulsory subject).

Academic year: 2023  ECTS Credits: 6.0  Languages: Catalan, Spanish

LECTURER

Coordinating lecturer: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/responsables-assignatura

Others: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/professorat-assignat-idioma

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Generical:
12 CPE N1. They will be able to identify, formulate and solve engineering problems in the ICC field and will know how to develop a method for analysing and solving problems that is systematic, critical and creative.

TEACHING METHODOLOGY

Problem solving classes
On campus lessons
Individual work (no face to face lessons)
Short answer controls and homework
Final exam (long answer exam)

LEARNING OBJECTIVES OF THE SUBJECT

Achieving sufficient level of one variable Calculus to deal with, or to base the treatment of phenomena that can be described in these terms. Also support of parties other subjects that require mastery of real functions of one variable. Introduction to functions defined by series, the Laplace Transform and its use to solve elemental differential equations and system of differential equations.

Learning outcomes:

Clearly expresses the process of planning and problem solving, and problems that require the use of calculus of one variable. Comprehend and dominates the most useful methods for solving problems in the field of one variable. He/she is able to confront the equations and numerical description of problems with descriptive statement. He/she uses more than one source, and uses it as complementary to observe the events described in the main text. Identifies problems and models from open situations. Study alternatives for their resolution.

Total learning time: 150 h

CONTENTS

**Unit 1. Real numbers**

**Description:**

**Full-or-part-time:** 11h 30m
- Theory classes: 5h
- Self study: 6h 30m

**Complex numbers**

**Description:**

**Full-or-part-time:** 6h 54m
- Theory classes: 3h
- Self study: 3h 54m

**Unit 3. Functions**

**Description:**

**Full-or-part-time:** 16h 06m
- Theory classes: 7h
- Self study: 9h 06m

**Unit 4. Function limits**

**Description:**

**Full-or-part-time:** 16h 06m
- Theory classes: 7h
- Self study: 9h 06m
### Unit 5. Continuity

**Description:**

**Full-or-part-time:** 9h 21m
- Theory classes: 4h
- Self study: 5h 21m

### Unit 6. Differentiability

**Description:**

**Full-or-part-time:** 16h 06m
- Theory classes: 7h
- Self study: 9h 06m

### Unit 7. Taylor polynomials

**Description:**

**Full-or-part-time:** 11h 30m
- Theory classes: 5h
- Self study: 6h 30m

### Unit 8. Local study of functions

**Description:**

**Full-or-part-time:** 9h 12m
- Theory classes: 4h
- Self study: 5h 12m

### Unit 9. Primitives

**Description:**
Definition. Calculation of immediate primitives, by parts and using change of variable. Calculation of rational primitives, trigonometric and irrational.

**Full-or-part-time:** 16h 06m
- Theory classes: 7h
- Self study: 9h 06m
Unit 10. Riemann’s Integral

Description:
Definition of Riemann integral. Properties. Fundamental Theorem of Calculus. Applications of the definite integral

Full-or-part-time: 9h 12m
Theory classes: 4h
Self study: 5h 12m

Unit 11. Indefinite integrals.

Description:

Full-or-part-time: 9h 12m
Theory classes: 4h
Self study: 5h 12m

Unit 12. Series of numbers and power series

Description:

Full-or-part-time: 13h 48m
Theory classes: 6h
Self study: 7h 48m

ACTIVITIES

FINAL EXAMEN

Description:
Final exam

Full-or-part-time: 3h
Theory classes: 3h

CONTROL

Description:
Short answer controls

Full-or-part-time: 3h
Theory classes: 3h
GRADING SYSTEM

Kind of exams to do and weight on the final evaluation:

Final exam: 60%
Continuous evaluation: 40%

On this subject will be evaluated the degree competences:

- Self-directed learning (Elementary level)
- Ability to identify, formulate and solve engineering problems (Elementary level)

EXAMINATION RULES.

The standard ones for this kind of controls
