Course guide
230080 - AL - Linear Algebra

Last modified: 13/05/2022

Unit in charge: Barcelona School of Telecommunications Engineering
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR’S DEGREE IN TELECOMMUNICATIONS TECHNOLOGIES AND SERVICES ENGINEERING (Syllabus 2015). (Compulsory subject).

Academic year: 2022 ECTS Credits: 6.0 Languages: Catalan, Spanish

LECTURER

Coordinating lecturer: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/responsables-assignatura

Others: Consultar aquí / See here: https://telecos.upc.edu/ca/estudis/curs-actual/professorat-responsables-coordinadors/professorat-assignat-idioma

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Generical:
2. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology

Transversal:
1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

TEACHING METHODOLOGY

Application lectures
Expositive lectures
Personal work (non classroom)
Short-answer questions (Test)
Proves de resposta llarga (Examen Final)

LEARNING OBJECTIVES OF THE SUBJECT

To introduce the basic concepts of linear algebra.

Learning outcome:
He/she expresses clearly the process of planning and solving exercises and problems that require the use of linear algebra.
He/she understands and masters the most useful methods to solve problems in the area of this subject.
He/she addresses numerical description and formulation of problems with descriptive description.
He/she makes use of more than one source and uses it in a complementary manner to observe the events described in the main text.
He/she identifies problems and models from open situations and explores alternative resolutions.
### STUDY LOAD

<table>
<thead>

**Total learning time:** 150 h

### CONTENTS

(ENG) **Tema 1. Matrices and determinants.**

**Description:**
Matrices and sub-matrices. Operations and properties.
Elementary transformations. Echelon forms.
Rank of a matrix. Inverse matrix.
Systems of linear equations. Discussion and resolution of systems.
Gaussian elimination. Gauss-Jordan elimination.
Determinants: definition and properties.
Calculation of determinants. Orthogonal matrices.
Minors and calculating the rank of a matrix by minors. Cramer’s rule.
Traces and cofactors. Laplace’s formula. Adjugate matrix.

**Related competencies:**
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 23h
Theory classes: 10h
Self study: 13h
(ENG) Tema 2. Vectorial spaces.

Description:
Definition, properties, and examples.
Linear independence.
Generating system, basis and dimension.
Components and change of basis.
Vector subspaces. Implicit equations.
Intersection, sum and direct sum. Grassmann formula.
The four subspaces associated to a matrix.

Related competencies:
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

Full-or-part-time: 28h 45m
Theory classes: 12h 30m
Self study: 16h 15m

(ENG) Tema 3. Euclidean space.

Description:
Inner product, norm, and angle.
Cauchy-Schwarz and triangular inequalities, Pythagorean theorem.
Orthogonality. Orthonormal and orthonormal basis.
Change of basis. Positive definite matrices.
Orthogonal complement. Orthogonal projection and best approximation.
Best approximation for a linear system: least squares. Quadratic error.
Orthogonality of the fundamental subspaces.
Euclidean vector spaces of infinite dimension. Orthogonal polynomials and trigonometric functions.
Introduction to unitary space.

Related competencies:
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

Full-or-part-time: 34h 30m
Theory classes: 15h
Self study: 19h 30m
**(ENG) Tema 4. Linear transformations.**

**Description:**
Invariant subspaces.  

**Related competencies:**
08 CRPÈ N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.  
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.  

**Full-or-part-time:** 23h  
Theory classes: 10h  
Self study: 13h

---

**(ENG) Tema 5. Diagonalization of endomorphisms and singular value decomposition**

**Description:**

**Related competencies:**
08 CRPÈ N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.  
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.  

**Full-or-part-time:** 28h 45m  
Theory classes: 12h 30m  
Self study: 16h 15m
ACTIVITIES

(ENG) Test (Test)

Full-or-part-time: 1h
Theory classes: 1h

(ENG) Test (Test)

Full-or-part-time: 1h
Theory classes: 1h

(ENG) Exam (Final Exam)

Full-or-part-time: 3h
Theory classes: 3h

GRADING SYSTEM
