TEACHING METHODOLOGY

In the first part of the course, lecture notes and collection of exercises are handed out to the students. Communication between students and with the teachers is performed by means of a forum for questions and answers. The second part of the course consists of developing a final work on the student's choice.

LEARNING OBJECTIVES OF THE SUBJECT

Part I. Fundamentals.
1. Learn MATLAB programming language. Learn how to write efficient and reliable code in MATLAB.
2. Learn MATLAB standard libraries. Get familiar with the most commonly used MATLAB packages.
Part II. Applications.
3. Get more insight into MATLAB. Develop a whole project written in MATLAB.

EXAMINATION RULES.

In every unit in the first part of the course the student is asked to submit the solutions to the proposed exercises in the scheduled time.

The Final Work consists of

(1) A 12-page report containing a brief theoretical introduction about the chosen subject, a description of the work done and a description of the achieved goals, including the functionalities of the MATLAB code developed.

(2) The set of source MATLAB files.

(3) A demo file showing the functionalities implemented.
