Part I. Fundamentals.
1. Learn MATLAB programming language. Learn how to write efficient and reliable code in MATLAB.
2. Learn MATLAB standard libraries. Get familiar with the most commonly used MATLAB packages.

Part II. Applications.
3. Get more insight into MATLAB. Develop a whole project written in MATLAB.

Teaching methodology
In the first part of the course, lecture notes and collection of exercises are handed out to the students. Communication between students and with the teachers is performed by means of a forum for questions and answers. The second part of the course consists of developing a final work on the student's choice.

Learning objectives of the subject
Part I. Fundamentals.
1. Learn MATLAB programming language. Learn how to write efficient and reliable code in MATLAB.
2. Learn MATLAB standard libraries. Get familiar with the most commonly used MATLAB packages.
Part II. Applications.
3. Get more insight into MATLAB. Develop a whole project written in MATLAB.

## Content

### Unit 1. Matlab Fundamentals and Graphics

**Learning time:** 30h  
Guided activities: 30h

**Description:**  
Understanding MATLAB programming language. Basic management of scalars, vectors and matrices. Basic 2-D and 3-D graphics. Basic mathematical functions, including linear algebra, complex numbers and polynomials.

### Unit 2. M-files Programming

**Learning time:** 30h  
Guided activities: 30h

**Description:**  
Learn structured MATLAB programming, including command files and function files. Learn how to write efficient MATLAB programs.

### Unit 3. Toolboxes

**Learning time:** 24h  
Guided activities: 24h

**Description:**  
Familiarize with the main MATLAB toolboxes.

### Unit 4. Graphics User Interface

**Learning time:** 24h  
Guided activities: 24h

**Description:**  
Learn how to build a GUI application in MATLAB.

### Final Work

**Learning time:** 42h  
Guided activities: 42h

**Description:**  
Develop an entire MATLAB application
230206 - MAE - Matlab and Its Applications in Engineering

Qualification system

Final grade is computed according the following weights:
Part I (exercises): 30% of final grade
Part II (final work): 70% of final grade

Regulations for carrying out activities

In every unit in the first part of the course the student is asked to submit the solutions to the proposed exercises in the scheduled time.
The Final Work consists of
(1) A 12-page report containing a brief theoretical introduction about the chosen subject, a description of the work done and a description of the achieved goals, including the functionalities of the MATLAB code developed.
(2) The set of source MATLAB files.
(3) A demo file showing the functionalities implemented.
