The aim of this course is to train students in understanding the techniques and tools for describing social networks and www. The course will teach techniques for ranking (ex. google’s pagerank for web pages), recommender systems (ex. amazon’s recommendations of similar products), Auctions of advertisements (i.e. google’s adwords), Finding influencers in social networks, finding communities in social networks, finding text similarity between documents by meaning (i.e. similarity between posts in blogs).
## Content

### Ranking Systems.

**Description:**
Description algorithms for sorting websites by relevance. Algorithms for graphs made of links between pages: Pagerank and HITS.

**Related activities:**
Individual Deliverable

**Specific objectives:**
Understanding google's Pagerank and HITS equations from different points of view; flow graph, random walk, probability of visiting a node.

**Learning time: 10h**
- Theory classes: 4h
- Self study: 6h

### Recommender systems

**Description:**
Description of the recommender systems based on Collaborative and content based. Description of different recommender systems; Amazon, Netflix, Facebook.

**Related activities:**
Individual Deliverable

**Specific objectives:**
Be able to adapt the general methods of recommender systems to specific situations.

**Learning time: 10h**
- Theory classes: 4h
- Self study: 6h

### Auctions of web advertisements

**Description:**
Description of systems for making auctions of online advertisements. Summary of the modified Vickrey auction system used by google's AdWords.

**Related activities:**
Individual Deliverable

**Learning time: 10h**
- Theory classes: 4h
- Self study: 6h
Social Networks as graphs

**Description:**
Techniques for finding influencers and communities in graphs. Specific properties of twitter type graphs and facebook type graphs.

**Related activities:**
Individual Deliverable
