**Content**

**Implementation of a small social network in the cloud.**

**Learning time:** 20h

Theory classes: 20h

**Description:**
This seminar will implement a small social network servers Amazon Web Services (AWS). servers on the network will be used to create web pages and manage databases on the social network. In addition the information structure of the social network will be adapted to the structure of AWS.

**Related activities:**
Practical activities with a computer. Groups of two students.

**Specific objectives:**
Understand how systems hosted in the cloud work, how to manage a small database, the web interface implementation and administration of a Unix system.

**Qualification system**

Performance of the implemented network, 100% of the marks

**Regulations for carrying out activities**

Network implementation

**Bibliography**

**Others resources:**
Lab with computers with internet connexion
