**CONTENTS**

The meaning of technology: society, culture, power and the idea of progress as related to technological development

**Description:**
The subject of class lectures and discussions will include the following: technology's connotations and diverse interpretations in today's world; technology's interrelation with the concepts of culture, politics or nature; the ambivalences in the relationship between "progress" and technological development. From weapons of mass destruction to genetically-modified food or cyber surveillance, we live in an age of intense debate about technology's place in our culture. While technologies continue to change, this debate has become vibrant and vital.

**Full-or-part-time:** 2 h
Guided activities: 1 h
Self study : 1 h
