Course guides
230904 - ALN - Linear Algebra

Unit in charge: Barcelona School of Telecommunications Engineering
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR’S DEGREE IN ELECTRONIC ENGINEERING AND TELECOMMUNICATION (Syllabus 2018).
(Compulsory subject).

Academic year: 2021 ECTS Credits: 6.0 Languages: Catalan, Spanish

LECTURER

Coordinating lecturer: Muñoz Lopez, Francisco Javier

Others:

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
CE3. (ENG) GREELC: Comprensió i domini dels conceptes bàsics sobre les lleis generals de la macànica, termodinàmica, camps i ones i electromagnetisme i la seva aplicació per a la resolució de problemes propis de l'enginyeria. (Mòdul de formació bàsica).

General:
2. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.

CG3. (ENG) GREELEC: Coneixment de matèries bàsiques i tecnologies que el capacitin per a l'aprenentatge de nous mètodes i tecnologies, així com que el dotin d'una gran versatilitat per adaptar-se a noves situacions.

Transversal:
1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

CT6. (ENG) GREELEC: APRENENTATGE AUTÒNOM: Detectar deficiències en el propi coneixement i superarles mitjançant la reflexió crítica i l’elecció de la millor actuació per ampliar coneixements.

Basic:
CBS. (ENG) GREELEC: Que els estudiants puguin desenvolupar habilitats d'aprenentatge per emprendre estudis superiors amb un alt grau d'autonomia.

TEACHING METHODOLOGY

Application lectures
Expositive lectures
Personal work (non classroom)
Short-answer questions (Test)
Proves de resposta llarga (Examen Final)
LEARNING OBJECTIVES OF THE SUBJECT

To introduce the basic concepts of linear algebra.

Learning outcome:
He/she expresses clearly the process of planning and solving exercises and problems that require the use of linear algebra.
He/she understands and masters the most useful methods to solve problems in the area of this subject.
He/she addresses numerical description and formulation of problems with descriptive description.
He/she makes use of more than one source and uses it in a complementary manner to observe the events described in the main text.
He/she identifies problems and models from open situations and explores alternative resolutions.

Total learning time: 150 h

CONTENTS

(ENG) Tema 1. Complex numbers and polynomials

Description:
Definition, and properties of complex numbers.
Real and imaginary part, module and argument.
Conjugate. Euler's formula.
Binomial, polar, exponential representation.
Formula of Moivre.
Roots and powers of complex numbers.
Polynomials: definition and properties.
Factoring of polynomials.
Fundamental theorem of the Algebra

Related competencies:
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

Full-or-part-time: 6h 50m
Theory classes: 3h
Self study : 3h 50m
### (ENG) Tema 2. Matrices and determinants.

**Description:**
Matrices and sub-matrices. Operations and properties.
Elementary transformations. Echelon forms.
Rank of a matrix. Inverse matrix.
Systems of linear equations. Discussion and resolution of systems.
Gaussian elimination. Gauss-Jordan elimination.
Determinants: definition and properties.
Calculation of determinants. Orthogonal matrices.
Minors and calculating the rank of a matrix by minors. Cramer’s rule.
Traces and cofactors. Laplace’s formula. Adjugate matrix.

**Related competencies:**
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 17h 40m
Theory classes: 8h
Self study: 9h 40m

### (ENG) Tema 3. Vectorial spaces.

**Description:**
Definition, properties, and examples.
Linear independence.
Generating system, basis and dimension.
Components and change of basis.
Vector subspaces. Implicit equations.
Intersection, sum and direct sum. Grassmann formula.
The four subspaces associated to a matrix.

**Related competencies:**
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 28h 45m
Theory classes: 12h 30m
Self study: 16h 15m
(ENG) Tema 4. Euclidean space.

**Description:**
Inner product, norm, and angle.
Cauchy-Schwarz and triangular inequalities, Pythagorean theorem.
Orthogonality. Orthonormal and orthonormal basis.
Change of basis. Positive definite matrices.
Orthogonal complement. Orthogonal projection and best approximation.
Best approximation for a linear system: least squares. Quadratic error.
Orthogonality of the fundamental subspaces.
Euclidean vector spaces of infinite dimension. Orthogonal polynomials and trigonometric functions.
Introduction to unitary space.

**Related competencies:**
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 34h 30m
Theory classes: 15h
Self study : 19h 30m

---

(ENG) Tema 5. Linear transformations.

**Description:**
Definition and properties. Associated matrix.
Rank of a linear transformation.
Kernel and image. Rank-nullity theorem.
Injective and exhaustive transformations.
Endomorphisms. Change of basis. Equivalent matrices.
Invariant subspaces.

**Related competencies:**
08 CRPE N1. ABILITY TO IDENTIFY, FORMULATE AND SOLVE ENGINEERING PROBLEMS Level 1. To identify the complexity of the problems presented in the subjects. To set out correctly the problem correctly from the statements suggested. To identify the possible options for its resolution. To choose an option, apply it and to identify the need to change it in case of fail. To provide tools and methods to test whether the solution is correct or at least consistent. To identify the role of creativity in science and technology.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 23h
Theory classes: 10h
Self study : 13h
(ENG) Tema 6. Diagonalization of endomorphisms.

Description:
Eigenvalues and eigenvectors.
Characteristic polynomial and traces of an endomorphism.
Eigenspaces, algebraic and geometric multiplicities.
Diagonalization conditions.
Complex eigenvalues of real matrices.
Symmetric endomorphisms.
Orthogonal basis of eigenvectors.
Orthogonal diagonalization of symmetric matrices. Spectral theorem.
Positive definite and semidefinite matrices.
Singular value decomposition.

Related competencies:

Full-or-part-time: 28h 45m
Theory classes: 12h 30m
Self study: 16h 15m

ACTIVITIES

(ENG) Test (Test)

Description:
First test

Full-or-part-time: 1h
Theory classes: 1h

(ENG) Test (Test)

Description:
Second test

Full-or-part-time: 1h
Theory classes: 1h

(ENG) Exam (Final Exam)

Description:
Final test

Full-or-part-time: 3h
Theory classes: 3h
GRADING SYSTEM

Two tests along course: 40%
Final exam: 60%
