REQUIREMENTS
Microeconomics I and II, as well as Introduction to Game Theory are required. Microeconomics III is recommended.

TEACHING METHODOLOGY
The lectures will cover theoretical, experimental and empirical material. There is no single reference textbook but rather each instructor will provide a list of articles and other references pertinent to the topics covered. Seminars will serve to deepen the understanding of the material presented in class. The students will be asked to participate in and possibly also design some behavioral experiments related to the materials presented in class.

LEARNING OBJECTIVES OF THE SUBJECT
The course aims to cover advanced topics in microeconomics, from individual and decision-making, communication to competition and price formation.

The student should become familiar with some of the contemporary research in the areas of behavioral decision-making, strategic communication, competition and price formation. He/she should learn how to how think about and how to model key questions arising in these areas.
