GRADING SYSTEM

The final grade, Nfinal, is highest of Nmig and Npf

Nfinal = Maxim( Nmig, Npf)
where: Nmig = 0,40 Nac + 0.60 Npf
Npf: grade of final test,
Nac: continuous grade.

The final test consist of same theoretical questions about concepts related to the course' learning aims, and a set of problems that require the application of the methods studied. Its duration is 3 hours.
The continuous grade consist of two or tree test (each one hour long), and the supervised activities carried out during the semester.

Reevaluation: If you have obtained a grade between 3 and 4.9, you can choose to reassessment will consist of a final test similar to the one described above.

EXAMINATION RULES.

- If some of activities of the continuous grade are missed, the continuous grade is 0.
- Those who do not appear in the final test and do not carry out any of the activities of the continuous assessment are considered "Not Presented"
