280656 - Operation and Maintenance of Marine Engines and Systems

Coordinating unit: 280 - FNB - Barcelona School of Nautical Studies
Teaching unit: 742 - CEN - Department of Nautical Sciences and Engineering
Academic year: 2019
Degree: BACHELOR'S DEGREE IN MARINE TECHNOLOGIES (Syllabus 2010). (Teaching unit Compulsory)
BACHELOR'S DEGREE IN MARINE TECHNOLOGIES/BACHELOR'S DEGREE IN NAVAL SYSTEMS AND TECHNOLOGY ENGINEERING (Syllabus 2016). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: Catalan, Spanish

Teaching staff

Coordinator: RAMON GRAU MUR
Others: Segon quadrimestre:
CLARA BOREN ALTES - 1
RAMON GRAU MUR - 1

Opening hours

Timetable: They will be communicated at the beginning of semester once set class schedules

Degree competences to which the subject contributes

Specific:
2. Knowledge of the organization and project management of repair, installation, modification, redesign and maintenance of machines and systems of ships, within the scope of its special ad, ie, operation and exploitation.
4. Knowledge and capacity for implementation and management of energy audits.

Transversal:

Teaching methodology

Receive, understand and synthesize knowledge.
Document practical cases.
Develop reasoning and critical thinking and defend it orally or in writing.
Perform an individual work.
Application of knowledge through the engine room simulator.

Learning objectives of the subject

Conocer los elementos, la operación i el mantenimiento de los sistemas marinos.

Competencias STCW Manila A-III/1
1. Maintain a safe engineering watch
1.1 Thorough knowledge of Principles to be observed in keeping an engineering watch
1.2 Safety and emergency procedures; change-over of remote/automatic to local control of all systems
1.3 Safety precautions to be observed during a watch and immediate actions to be taken in the event of fire or accident, with particular reference to oil systems
1.4 Knowledge of engine-room resource management principles
4. Operate main and auxiliary machinery and associated control systems
4.1 Basic construction and operation principles of machinery systems
4.2 Safety and emergency procedures for operation of propulsion plant machinery, including control systems
4.3 Preparation, operation, fault detection and necessary measures to prevent damage for the following machinery items and control systems
5. Operate fuel, lubrication, ballast and other pumping systems and associated control systems
5.1 Operational characteristics of pumps and piping systems, including control systems
5.2 Operation of pumping systems
5.3 Oily-water separators (or-similar equipment) requirements and operation
7. Maintenance and repair of electrical and electronic equipment
7.1 Safety requirements for working on shipboard electrical systems, including the safe isolation of electrical equipment required before personnel are permitted to work on such equipment
7.2 Maintenance and repair of electrical system equipment, switchboards, electric motors, generator and DC electrical systems and equipment
7.3 Detection of electric malfunction, location of faults and measures to prevent damage
7.4 Construction and operation of electrical testing and measuring equipment
7.5 Function and performance tests of the following equipment and their configuration
7.6 The interpretation of electrical and simple electronic diagrams
9. Maintenance and repair of shipboard machinery and equipment
9.1 Safety measures to be taken for repair and maintenance, including the safe isolation of shipboard machinery and equipment required before personnel are permitted to work on such machinery or equipment
9.2 Appropriate basic mechanical knowledge and skills
9.3 Maintenance and repair, such as dismantling, adjustment and reassembling of machinery and equipment
9.4 The use of appropriate specialized tools and measuring instruments
9.5 Design characteristics and selection of materials in construction of equipment
9.6 Interpretation of machinery drawings and handbooks
9.7 The interpretation of piping, hydraulic and pneumatic diagrams

The final grade is the sum of the following partial grades:

\[ N_{\text{final}} = 0.5 \times N_t + 0.5 \times N_s \]

- **Nfinal**: Final qualification
- **Nt**: Qualification of the theory part
- **Ns**: Evaluation rating simulator

To take into account the theory note, a minimum grade of 3.0 must be obtained in the control of the theoretical part. A final re-evaluation test will be carried out for students who meet the requirements established by the center's regulations, which will consist of a single test in which the entire subject of the course will be evaluated.

### Regulations for carrying out activities

If any of the evaluation activities is not carried out, it will be considered as not punctuated. A student who doesn't complete any of the assessment activities will receive the qualification of absent.
