280660 - Electric Propulsion and Power Electronics

Degree competences to which the subject contributes

- Understanding the basics of electrical machines.
- Understand the schemes and connections of different types of machines and applications.
- Understand the regulation systems of V, f, P, Q in synchronous generators in island and parallel.
- Understand the regulation and control systems of electrical motors.
- Having the ability to do calculations and solve problems of electrical machines, using the corresponding equivalent circuits.

Moreover, one objective of this course is to provide knowledge, understanding and proficiency of skills STCW A-III/1:
1. Having knowledge about the operation of electrical distribution systems, generation plant, generators and their .
synchronization, and motors starting associated control circuits.
2. Understand the use of measuring equipment and electrical testing for locating common faults and maintenance and repair.
3. Having the basic knowledge for the maintenance of electrical machines and their control systems. Use and safe operation of electrical equipment.

Competencies required and defined in Section A-III/1 (Minimum requirements for certification of officers in charge of the watch in unattended machinery or service engineers designated camera unattended machinery (propulsion power of 750 kW or more) of the International Convention on Standards of Training, Certification and Watchkeeping for seafarers.

"This course will evaluate the following STCW competences: "
E1. Monitor the operation of electrical, electronic and control systems and E3. Operate generators and distribution systems

This competence are assessed according to the section "evaluation" of this record.

**Description:**
Having knowledge about the operation of electrical distribution systems, generation plant, generators, motors and starter. Construction and operational systems and DC electrical equipment on board properties. Having the basic knowledge for the maintenance of electrical machines and their control systems. Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment and 7. Maintenance and repair of electrical and electronic equipment. KUPs 7.1 to 7.4

**Description:**
Having knowledge about the operation of electrical distribution systems, generation plant, generators and their synchronization, associated control circuits. Operational and construction in the AC electrical systems and equipment onboard features. Having the basic knowledge for the maintenance of electrical machines and their control systems. Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment and 7. Maintenance and repair of electrical and electronic equipment. KUPs 7.1 to 7.4

**Description:**
Having knowledge about the operation of electrical distribution systems, motors and starters, associated control circuits. Operational and construction in the AC electrical systems and equipment onboard features. Having the basic knowledge for the maintenance of electrical machines and their control systems. Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment and 7. Maintenance and repair of electrical and electronic equipment. KUPs 7.1 to 7.4
## Start systems

**Description:**
Having knowledge about the operation of electrical distribution systems, motors and starters, associated control circuits. Operational and construction in the AC electrical systems and equipment onboard features. Having the basic knowledge for the maintenance of electrical machines and their control systems.

Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment and 7. Maintenance and repair of electrical and electronic equipment. KUPs 7.1 to 7.4

**Learning time:** 3h
- Theory classes: 2h
- Laboratory classes: 1h

## Electrical Equipment

**Description:**
Automation, static converters, Protection, Measuring Equipment.
Having knowledge about the operation of electrical distribution systems, generation plant, generators and their synchronization, motors and starting associated control circuits.

Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment and 7. Maintenance and repair of electrical and electronic equipment. KUP 7.1 to 7.4

**Learning time:** 3h
- Theory classes: 2h
- Laboratory classes: 1h

## Energy balance

**Description:**
Having knowledge about the operation of electrical distribution systems, power plant.

Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment

**Learning time:** 2h
- Theory classes: 2h

## Harmonic and transient

**Description:**
Having knowledge about the operation of electrical distribution systems, generation plant, generators and their synchronization, and start motors.

Competences in accordance with STCW Code Section A-III/1: 6. Operate electrical, electronic and control systems. KUP 6.1 Electrical equipment

**Learning time:** 2h
- Theory classes: 2h
- **Faults and troubleshooting**

**Learning time:** 4h
- Theory classes: 2h
- Laboratory classes: 2h

**Description:**
Understand the use of measuring equipment and electrical testing for locating common faults, power failures and maintenance and repair. Safety requirements for work on electrical systems on board. Use and safe operation of electrical equipment.

Having the basic knowledge for the maintenance of electrical machines and their control systems.

Competences in accordance with STCW Code Section A-III/1: 7. Maintenance and repair of electrical and electronic equipment. KUPs 7.1 to 7.4

---

**Planning of activities**

<table>
<thead>
<tr>
<th>Laboratory Practices</th>
<th>Hours: 10h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Laboratory classes: 10h</td>
</tr>
</tbody>
</table>

**Description:**
Practice 5. Reviews and equipment for locating faults in electrical machines.

---

**Qualification system**

During the course there will be continuous evaluations, according to the following percentages:

Continuous evaluations 30% (Lab. practices, Lab. exams, Works, Expositions)
Partial Exam 40%
Final Exam 30%

Reevaluation: Test that includes the concepts and objectives set for the final test.

**Regulations for carrying out activities**

Attendance and completion of the hands-on labs, is a compulsory requirement.
