280668 - Naval Engines

Coordinating unit: 280 - FNB - Barcelona School of Nautical Studies
Teaching unit: 742 - CEN - Department of Nautical Sciences and Engineering
Academic year: 2018
Degree: BACHELOR'S DEGREE IN NAVAL SYSTEMS AND TECHNOLOGY ENGINEERING (Syllabus 2010). (Teaching unit Compulsory)
ECTS credits: 9 Teaching languages: Spanish

Teaching staff
Coordinator: MANUEL RODRIGUEZ CASTILLO
Others: Primer quadrimestre:
GERMAN DE MELO RODRIGUEZ - 1
IGNACIO ECHEVARRIETA SAZATORNIL - 1
MANUEL RODRIGUEZ CASTILLO - 1

Degree competences to which the subject contributes

Specific:
1. Knowledge of marine diesel engines, gas turbines and steam plants.

General:
2. ABILITY TO SHAPE, DESIGN AND IMPLEMENT COMPLEX SYSTEMS IN THE FIELD OF NAVAL ENGINEERING. Ability to conception, design and implementation of processes, systems and/or services in the field of naval technical engineering, including the drafting and development of projects in the field of specialization, knowledge of basic materials and technologies, decision making, managing the activities being projects within their specialty, conducting measurements, calculations and valuations, managing specifications, regulations and mandatory standards, assessment of the social and environmental impact of technical solutions adopted, economic, material and human resources involved in the project, with a systematic and comprehensive vision assessment.
280668 - Naval Engines

**Teaching methodology**

Internal Combustion Engines

- Acquire, understand and synthesize knowledge.
- And solve problems.
- Prepare technical reports.
- Adopt solutions in practical cases.
- Perform the memory of a lab or work.
- Analyze results.
- Relate knowledge from different disciplines.
- Develop critical thinking and reasoning and defend it orally or in writing.

Steam and gas turbines

- Ability to learn new methods and theories to equip themselves with the versatility to adapt to new situations.
- Ability to solve problems with initiative, decision making, creativity, and critical thinking skills to communicate and transmit knowledge and skills.
- Ability to carry out inspections, measurements, evaluations, appraisals, surveys, studies, reports, work plans and on site certifications steam turbine and gas.
- Ability to analyze and assess the social and environmental impact of technical solutions.
- Ability to design and planning of marine facilities for gas and steam turbines.

Steam generators

- Acquire, understand and synthesize knowledge.
- And solve problems.
- Prepare technical reports.
- Adopt solutions in practical cases.
- Perform the memory of a lab or work.
- Analyze results.
- Relate knowledge from different disciplines.
- Develop critical thinking and reasoning and defend it orally or in writing.

**Learning objectives of the subject**

Internal Combustion Engines (MCI)
- Theoretical and practical understanding of the operation of internal combustion engines.
- Knowledge of various types and facilities on board. Marine engines.
- Knowledge of computing powers, jobs, income, consumption, etc..
- Use and apply the knowledge gained in the design and selection of marine diesel engines.

Steam and gas turbines (TVG)
- Cognitive analysis and understanding of the work cycles of steam turbines and gas
- Knowledge of the different parts of a steam turbine and gas.
- Knowledge of calculating speeds triangles tobero pallets and pallets.
- Knowledge of the calculation of the Powers, jobs, income, etc..
- Understanding various types of turbines and their installation on board.
- Using the knowledge gained to design and dimensioning of the turbines.

Steam generators (GV)
280668 - Naval Engines

In-depth knowledge of the steam generators.
Use and apply knowledge gained in the design and selection of steam generators.

# 280668 - Naval Engines

## Content

| Application and classification of internal combustion engines (MCI). | Learning time: 2h  
Theory classes: 2h |
| --- | --- |
| **Description:**  
Study on the different applications of internal combustion engines and ranking. |

| Fundamental concepts and general definitions of MCI. | Learning time: 2h  
Theory classes: 2h |
| --- | --- |
| **Description:**  
Schematic and nomenclature of the reciprocating engine. The engine ignition. The compression ignition engine. Differences between MECh and MEC. Working fluid. |

| Thermal cycles. | Learning time: 2h  
Theory classes: 2h |
| --- | --- |
| **Description:**  

| Engine operating cycles two and four times. | Learning time: 2h  
Theory classes: 2h |
| --- | --- |
| **Description:**  
Indicated cycle and mean pressure indicated. Differences between actual and theoretical cycles. Study diagram indicated. Pressure diagram. |

| Organizational study of the engine. | Learning time: 2h  
Theory classes: 2h |
| --- | --- |
| **Description:**

### Refrigeration

**Learning time:** 2h  
**Theory classes:** 2h

**Description:**  
Refrigerants. Systems and cooling elements.  

### Scavenging

**Learning time:** 2h  
**Theory classes:** 2h

**Description:**  

### Motor starting.

**Learning time:** 2h  
**Theory classes:** 2h

**Description:**  

### Supercharger.

**Learning time:** 2h  
**Theory classes:** 2h

**Description:**  
Supercharging systems and components.  

### Rotary engines.

**Learning time:** 2h  
**Theory classes:** 2h

**Description:**  

**Cicles de treball de les turbines de vapor.**
280668 - Naval Engines

Degree competences to which the content contributes:

(ENG) Classificació de les turbines.

Degree competences to which the content contributes:

(ENG) Parts de les turbines: paletes, toveres, directrius i tobero-paletes.

Degree competences to which the content contributes:

(ENG) Estudi dinàmic de les turbines de flux axial i radial.

Degree competences to which the content contributes:

(ENG) Estudi de les turbines d’acció.

Degree competences to which the content contributes:

(ENG) (CAST) Estudio de las turbinas de reacción.

Degree competences to which the content contributes:

(ENG) Estators de les turbines.

Degree competences to which the content contributes:

(ENG) Rotors de les turbines.

Degree competences to which the content contributes:

(ENG) Paletes o àleps de les turbines.

Degree competences to which the content contributes:

(ENG) Regulació de la potència de les turbines de vapor.

Degree competences to which the content contributes:
Degree competences to which the content contributes:

(ENG) Condensadors.

Degree competences to which the content contributes:

(ENG) Instal · lacions de vapor.

Degree competences to which the content contributes:

(ENG) Cicles de treball de les turines de gas.

Degree competences to which the content contributes:

(ENG) Parts d'un grup motor de turines de gas: compressor, cambra de combustió i turbina.

Degree competences to which the content contributes:

(ENG) Combustió i combustibles de les turines de gas.

Degree competences to which the content contributes:

(ENG) Cicles combinats.

Degree competences to which the content contributes:

(ENG) Tipus de generadors de vapor i parts que els componen.

Degree competences to which the content contributes:

(ENG) Accessoris de calderes.

Degree competences to which the content contributes:

(ENG) Combustibles utilitzats en generadors de vapor.
A final test of reevaluation students who meet the requirements of the regulations will be made center, consisting of a single test in which all of the matter that will be assessed during the course.

If you have not done laboratory activities, work or evaluation, is considered not scored.

It is considered not submitted when not perform any tests.
