**Qualification system**

Short-term tests for continuous assessment (25%)
Long answer test (40%)
Team works, reports and oral presentations (35% = 25% + 10%)

The final mark is the sum of the following partial qualifications:

Final Mark = 0.40 Npf + 0.25 Nac + 0.35 Ntip

Npf: Final test mark.
Nac: Continuous evaluation mark.
Ntip: team works, reports and oral presentations marks.

The long and the short term tests are part multiple choice questions and the other part is made of brief questions to be developed. Their length range varies between 1.5 and 2.5 hours.

The rating of the team work, reports and oral presentations, will consider the adaptation level of students to the team work, the accuracy achieved in the developed topics and the presentation level.

Only those students who did the final examination and who obtained an overall grade for the course between 3 and 4.9, will have the chance to make a new reassessment exam, which will take place a few days after the global notes are published, according to the timetable set by the FNB.

This exam will consist of a series of multiple choice tests and short development questions about all course topics that the student should overcome in at least a 60% to obtain so a 5 points score as overall final grade of the course.

**Regulations for carrying out activities**

The midterms exams will represent a 25% of the total assessment, a team work about a specific subject and its media and oral presentation will represent the other 35 per cent, while the final exam will count for the 40% of the final mark.

It will be considered absent, the student that did not take the final exam, which represents 40% of the mark.

As for the final reevaluation exam of the subject whose maximum score will be 5, it is required a minimum mark of 6 out of 10.
