

295504 - FETRA - Transport Phenomena

Coordinating unit: 295 - EEBE - Barcelona East School of Engineering

Teaching unit: 713 - EQ - Department of Chemical Engineering

Academic year: 2018

Degree: BACHELOR'S DEGREE IN ENERGY ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN MATERIALS ENGINEERING (Syllabus 2010). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ENERGY ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Teaching unit Optional)

ECTS credits: 6 Teaching languages: Catalan

Teaching staff

Coordinator: Planas Cuchi, Eulalia

Others: Pastor Ferrer, Elsa

Águeda Costafreda, Alba

Opening hours

Timetable: Ask for your attention time directly to the Professor by email

Prior skills

Fundamentals of Chemistry, thermodynamics, differential equations, numerical computation

Requirements

To have attended the courses that provide the required skills

Degree competences to which the subject contributes

Specific:

- CEQUI-19. Understand mass and energy balances, biotechnology, mass transfer, separation operations, chemical reaction engineering, the design of reactors, and the recovery and processing of raw materials and energy resources.
- CEB-01. Solve mathematical problems that may arise in engineering. Apply knowledge of linear algebra; geometry; differential geometry; differential and integral calculus; differential equations and partial differential equations; numerical methods; numerical algorithms; statistics and optimisation.
- CEQUI-27. Understand spatial vision and graphic representation techniques, whether using traditional metric and descriptive geometry methods or computer assisted design applications.

295504 - FETRA - Transport Phenomena

Teaching methodology

Lectures of theory and problems, participatory problem seminars, work on a case study

Learning objectives of the subject

The course aims to introduce students in the joint study of the transfer of energy, matter and momentum. Give them to know the basic laws of these three phenomena, closely related, so they can formulate mathematical models that represent the fundamentals of the real problems of chemical processes. At the end of the course the student should be able to:

- OE1. Apply the laws governing the transfer of momentum, energy and matter and interrelate the three phenomena.
- OE2. Formulate mathematical models that represent complex real systems both steady state and unsteady.
- OE3. Propose models for the individual and global transport coefficients necessary for solving real problems.

Study load

Total learning time: 150h	Hours large group:	60h	40.00%
	Hours medium group:	0h	0.00%
	Hours small group:	0h	0.00%
	Guided activities:	0h	0.00%
	Self study:	90h	60.00%

295504 - FETRA - Transport Phenomena

Content

<p>INTRODUCTION TO TRANSPORT PHENOMENA</p>	<p>Learning time: 5h Theory classes: 2h Self study : 3h</p>
<p>Description: What is chemical engineering?. Historical evolution of the chemical engineering discipline. Onset of transport phenomena as a discipline within chemical engineering. Fundamentals of property balances, integral and differential forms.</p> <p>Related activities: Theory lessons. Problem solving lessons. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1</p>	
<p>VELOCITY EQUATIONS FOR MOLECULAR TRANSPORT</p>	<p>Learning time: 20h Theory classes: 6h Laboratory classes: 2h Self study : 12h</p>
<p>Description: Introduction: behavior and physical states of matter. Transport of momentum: Newton's Law, viscosity, non-Newtonian fluids. Transport of heat energy: Fourier's Law, thermal conductivity. Transport of mass: Fick's law, diffusivity. General velocity equation.</p> <p>Related activities: Theory lessons. Problem solving lessons. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1</p>	
<p>THE BALANCE EQUATIONS</p>	<p>Learning time: 19h 10m Theory classes: 4h Laboratory classes: 9h 45m Self study : 5h 25m</p>
<p>Description: The mass balance: the continuity equation, the combination of balance and rate equation. The momentum balance: equation of motion. The energy balance: energy equation. No dimensional conservation equations</p> <p>Related activities: Theory lessons. Problem solving lessons. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1</p>	

295504 - FETRA - Transport Phenomena

<p>STEADY STATE MOLECULAR TRANSPORT</p>	<p>Learning time: 27h 45m Theory classes: 7h 30m Laboratory classes: 3h Self study : 17h 15m</p>
<p>Description: Momentum transfer: speed profiles. Heat transport: temperature profiles. Mass transport: concentration profiles. Simultaneous transport of properties. Using non-dimensional conservation equations. Study of diffusion with chemical reaction</p> <p>Related activities: Theory lessons. Lessons of resolution of exercises. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1, OE2</p>	
<p>UNSTEADY-STATE MOLECULAR TRANSPORT</p>	<p>Learning time: 18h 45m Theory classes: 4h 30m Laboratory classes: 2h Self study : 12h 15m</p>
<p>Description: Balance equations. Solving the balance equations: application to finite and semi-infinite media</p> <p>Related activities: Inverse learning of theory lessons. Lessons of resolution of exercises. Independent learning. Assessment activities A1, A2</p> <p>Specific objectives: OE1, OE2</p>	
<p>FLOW TURBULENCE</p>	<p>Learning time: 11h 28m Theory classes: 4h 30m Laboratory classes: 1h Self study : 5h 58m</p>
<p>Description: Description and approaches to the study of turbulence. Mean values technique. Equations of transport under turbulent conditions. Universal velocity distribution</p> <p>Related activities: Theory lessons. Lessons of resolution of exercises. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1, OE2</p>	

295504 - FETRA - Transport Phenomena

<p>BOUNDARY LAYER THEORY</p>	<p>Learning time: 6h 15m Theory classes: 1h 30m Laboratory classes: 1h Self study : 3h 45m</p>
<p>Description: Introduction. The Prandtl theory: fundamental equations. Boundary layer on flat surfaces: laminar and turbulent regimes.</p> <p>Related activities: Theory lessons. Lessons of resolution of exercises. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1,OE2</p>	
<p>INDIVIDUAL AND GLOBAL TRANSPORT COEFFICIENTS</p>	<p>Learning time: 18h Theory classes: 4h Laboratory classes: 2h Self study : 12h</p>
<p>Description: Individual transport coefficients. Momentum: the friction factor. Individual coefficients of heat and mass transfer. Theories about the transport coefficients: film, penetration, etc.. Global transport coefficients. Transfer units.</p> <p>Related activities: Theory lessons. Lessons of resolution of exercises. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1, OE2, OE3</p>	
<p>ANALOGY BETWEEN THE TRANSPORT PHENOMENA</p>	<p>Learning time: 6h Theory classes: 1h 30m Laboratory classes: 0h Self study : 4h 30m</p>
<p>Description: Basic relationships. Description of different analogies: Reynolds and Sherwood-Karman, Prandtl-Taylor and Colburn, Karman and Sherwood.</p> <p>Related activities: Theory lessons. Problem solving lessons. Independent learning. Assessment activities A1</p> <p>Specific objectives: OE1, OE2, OE3</p>	

295504 - FETRA - Transport Phenomena

Planning of activities

<p>A1-QUESTIONNAIRES</p>	<p>Hours: 4h 10m Theory classes: 2h Self study: 2h 10m</p>
<p>Description: Test questionnaires. Continuous evaluation which will be carried out along the semester</p> <p>Support materials: Notes from class.Slides. Reading. Exercises solved in class</p> <p>Descriptions of the assignments due and their relation to the assessment: Answers to the questions of the questionnaire which will be handed in by the end of the activity</p> <p>Specific objectives: OE1, OE2, OE3</p>	
<p>A2-RESOLUTION WITH MATLAB OF A NON-STEADY STATE CASE</p>	<p>Hours: 7h Laboratory classes: 2h Self study: 5h</p>
<p>Description: Inverse learning through videos and validations by means of Atenea quiz. Resolution of a case in a non-steady state by the MATLAB program</p> <p>Support materials: Videos and quiz in Atenea. The description of the problem to be solved will be uploaded on Atenea. Notes of the class. Slides. MATLAB program</p> <p>Descriptions of the assignments due and their relation to the assessment: Solution of the quiz. Solution to the exercise, which will have to be introduced into Atenea</p> <p>Specific objectives: OE1, OE2</p>	
<p>A3-PARTIAL EXAM</p>	<p>Hours: 4h 10m Theory classes: 2h Self study: 2h 10m</p>
<p>Description: Exam consisting in the resolution of a problem</p> <p>Support materials: Notes from class. Slides. Exercises solved in class</p> <p>Descriptions of the assignments due and their relation to the assessment: Answer to the questions of the exam</p> <p>Specific objectives: OE1, OE2</p>	

295504 - FETRA - Transport Phenomena

A4-FINAL EXAM	Hours: 9h Theory classes: 3h Self study: 6h
<p>Description: Final exam of the course based on the resolution of exercises</p> <p>Support materials: Notes of the class. Slides. Solved exercises. Bibliographic material of support</p> <p>Descriptions of the assignments due and their relation to the assessment: Answers to the questions of the exam</p> <p>Specific objectives: OE1, OE2, OE3</p>	

Qualification system

FINAL RATE:

$$NF = 0.5 \cdot NEF + 0.25 \cdot NEP + 0.15 \cdot NAC + 0,15 \cdot NAC + 0,1 \cdot NT$$

Where,

NEF: Rate of the final exam

NEP: Rate of the partial exam

NAC: Average rate of the continuous assessment questionnaires

NT: Rate of the task of solving a problem using Matlab

The course will have a reevaluation exam according to the calendar and rules of the EEBE

Regulations for carrying out activities

The partial and final exams can be made using all available bibliographic material: lecture notes, reference books, collection of problems, etc. continuous assessment tests (questionnaires) can only be done using class notes, readings and book problems.
