Teaching methodology

The subject introduces students to the challenge of creating a company. The final objective of the project is to elaborate a Business Plan of a company in the context of the aeronautical sector. The methodology used is known as PBL, Project-Based Learning. Through the proposed project students will know the basic elements involved in the creation of a company and its external constraints.

This methodology will involve teamwork, autonomous learning and individual responsibility to the group. The faculty will guide and provide the tools to enable students to apply the knowledge of the acquired knowledge autonomously. The oral presentations of intermittent activities will allow the analysis and evaluation of the work done by the groups. The Business Plan document will be the evidence of the learning achieved and will allow the evaluation of the final work.
On completion of Management, students will be able to:
· understand the concepts behind the definition of a business plan;
· interpret basic business information;
· understand the factors involved in making business decisions;
· understand the main elements of economic activity and their functions as part of a system;
· identify the elements that regulate business activity;
· understand the regulation of the aeronautical market;
· write a general interest article following suggested criteria for effective written communication;
· present a Business Plan following suggested criteria for effective spoken communication;
· write a Business Plan.
· identify appropriate sources of documentation for preparing specific communicative tasks;
· make effective use of multimedia resources.
