310009 - Graphic Expression II

Coordinating unit: 310 - EPSEB - Barcelona School of Building Construction
Teaching unit: 752 - RA - Departamento de Representación Arquitectónica
Academic year: 2017
Degree: BACHELOR’S DEGREE IN ARCHITECTURAL TECHNOLOGY AND BUILDING CONSTRUCTION (Syllabus 2015). (Teaching unit Compulsory)
BACHELOR’S DEGREE IN BUILDING CONSTRUCTION SCIENCE AND TECHNOLOGY (Syllabus 2009). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: Catalan, Spanish

Teaching staff
Coordinator: FERNANDO CISNEROS SOROLLA
Others: BENITO MECA ACOSTA - RAFAEL CARLOS MARAÑON GONZALEZ

Degree competences to which the subject contributes

Specific:
1. FE-1 Ability to understand and make the graphical documentation of a project, to do data gathering, surveying of plans and geometric control of construction units.

Transversal:
3. TEAMWORK - Level 1. Working in a team and making positive contributions once the aims and group and individual responsibilities have been defined. Reaching joint decisions on the strategy to be followed.
310009 - Graphic Expression II

Teaching methodology

Learning method Based on Projects (ABP).

It is a strategy on which the students carry out projects. ABP is based on the student, who is the center of the learning and the professor help him/her and makes this process easier. But it is the student who find out his/her learning needs when he/she confronts the project. The student could fulfill these learning needs searching the available resources in Atenea, library, www, etc.

The ABP objectives are:
Integrate knowledge and abilities of different fields.
Develop mental abilities with a high level on Bloom's taxonomy: application, analysis, synthesis and evaluation.
Promote the autonomous self-learning and independent work.
Promote the teamwork both in class as outside.
Promote the self-assessment.

A ABP session includes all these stages:
Project presentation.
Important item list.
Search of the available resources by the students.
Development of the first proposals.
Discussion of the first proposals by the students and the professor.
Election of the developed solution.
Project resolution.
Correction with professor during the fulfilment of the project.
Delivery of the finished practice.
Correction of the practice with the professor.
Delivery to the student of the corrected practice.

Learning objectives of the subject

At the end of the course, students should be able to:

Introduce the student to the fundamental concepts of the basic project.
Achieve that the student familiarizes with the graphic representation of the plans that conform the basic project.
Identify, differentiate and interpret the graphic representation of the elements that take part in an architectural project.
Choose and apply the most suitable representation system to use in each case.
Enumerate and apply the regulations in a basic project.
Apply the design criteria in the different spaces of a residential building.
Choose and apply the most suitable dimensional control system in the plans of the project.
Use with ability the graphic expression as a tool to communicate with both student and work environment.

### C1 Basic project and town-planning rules.

**Description:**
- 1.1 Introduction to architectural project
  - 1.1.1. Project definition.
  - 1.1.2. Kind of projects: Residential, industrial, equipment, etc.
- 1.2. Basic project and executive project.
  - 1.2.1. Parts of a basic project.
- 1.3. Urban regulations.
  - 1.3.0. Urban certificate.
  - 1.3.1. Minimum plot
  - 1.3.2. Maximum occupancy
  - 1.3.3. Building coefficient.
  - 1.3.4. Regulatory maximum height.
  - 1.3.5. Distance to the limits of the plot.
- 1.4. Introducing the basic project to develop along the course.
  - 1.4.1. Urban regulations.
  - 1.4.2. Blueprint of the plot.
  - 1.4.3. Graphic representation.
  - 1.4.4. Delivery of the draft.
- 1.5. The blueprint of architecture and building.
  - 1.5.1. Definition.
  - 1.5.2. Elements that forms it.
  - 1.5.3. Composition.

**Related activities:**
Activities 5, 6, 8 and 9.
The activities 5 and 9 will be the midterm exam and final exam.

**Learning time:** 3h
- Theory classes: 1h
- Self study: 2h
C2 Study of spaces in the night zone. Bedrooms.

### Description:
- **2.1.** A person as a measurement.
- **2.2.** Spaces of a dwelling.
  - **2.2.1.** Zone definition.
  - **2.2.2.** Kind of zones: day zone, night zone, passage area, service area, etc.
  - **2.2.3.** Relation between zones.
- **2.3.** Night zone.
  - **2.3.1.** Relation between the night zone spaces.
- **2.4.** Bedroom.
  - **2.4.1.** Definition.
  - **2.4.2.** Types: principal, double, individual, suite.
  - **2.4.3.** Spaces inside a bedroom.
- Analysis of the conditions and necessities.
- Distribution and uses.
- **2.5.** Ordinances.
  - **2.5.1.** Concept.
  - **2.5.2.** Usable space.
  - **2.5.3.** Minimum side.
  - **2.5.4.** Minimum height.
  - **2.5.5.** Illumination spaces. Windows, balconies.
  - **2.5.6.** Passage openings. Doors.
- **2.6.** Design criteria: spaces, circulation, furniture, use spaces.
- **2.7.** Electric facilities representation. Facilities legend.
- **2.8.** Representation of the furniture in the detail drawings.
- **2.9.** Text.
- **2.10.** Dimension.
- **2.11.** Process phases: from the sketch to the detailed drawing.
  - **2.11.1.** Conceptual phase.
  - **2.11.2.** Reflection phase.
  - **2.11.3.** Definition phase of the proposal
  - **2.11.4.** Graphic expression of each phase.
- **2.12.** Interior perspective: axonometric and conical.

### Related activities:
Activities 2, 5, 6, 8 and 9.
Activities 2, 6 and 8 correspond to project 1, project 2 and project 3 in the continuous evaluation.
Activities 5 and 9 will be midterm exam and final exam.
### C3 Study of spaces in the night zone. Bathrooms.

**Description:**
   2.1. Definition.
   2.2. Situation in the dwelling. Orientation. Relation with other spaces.
   2.3. Types: complete bathroom, small bathroom.
   2.4. Analysis of the conditions and needs.
3. Ordinances and regulations.
   3.1. Minimum side.
   3.2. Minimum height.
   3.3. Illumination spaces.
   3.4. Ventilació de l'habitatge. CTE. Air circulation of the dwelling. CTE.
   3.5. Passage openings. Doors.
   3.5. Types of bathrooms.
5. Facilities representation:
   3.6.1. Water facilities.
   3.6.2. Electric facilities.
   3.6.3. Drainage facilities.
   3.6.4. Ventilation facilities. CTE:
   3.6.5. Facilities legend.
6. Walls representation.
   3.7.1. Interior walls
   3.7.2. Façade walls.
7. Text.
   3.9. Dimension. Walls, bathrooms and openings situation.
8. Interior perspective: axonometric of the facilities and conical perspective with two vanishing points.

**Related activities:**
Activities 2, 5, 6, 8 and 9.
Activities 2, 6 and 8 correspond to project 1, project 2 and project 3 in the continuous evaluation.
Activities 5 and 9 will be midterm exam and final exam.
C4 Elements of vertical communication. Stairs. Ramps.

Learning time: 2h
Self study: 2h

Description:
4.1.1. Elements of a stairs.
4.1.2. Slope line.
4.1.3. Minimum passage.
4.1.4. Stairwell
4.2. Typologies according to the forms. Straight. Curves. Mixed.
4.3. Regulations and ordinances.
4.3.1. Minimum area.
4.3.3. Formula of the ideal step.
4.3.4. Flight of stairs. Minimum number of steps.
4.3.5. Landing. Landings between floors.
4.3.6. Maximum height to save.
4.3.7. Stairwell.
4.3.8. Handrail.
4.3.9. Stair lighting.
4.4. Recommendations for the design of the stairs.
4.5. Graphic representation of the scale. Graphic agreements.
4.6. Introduction to the vertical section of the stairs.
4.6.1. Section types.
4.6.2. Election of the section drawing.
4.7. Texts.

Related activities:
Activities 3, 4, 5, 6, 7, 8 and 9.
Activities 6 and 8 correspond to project 2 and project 3 in the continuous evaluation.
Activities 5 and 9 will be midterm exam and final exam.
### C5 Study of the night zone of a -house-

**Learning time:** 2h  
**Self study:** 2h

<table>
<thead>
<tr>
<th>Description:</th>
</tr>
</thead>
</table>
| 5.1. Definition of the night zone.  
5.2. Relation between spaces of the night zone. Position.  
5.3. Circulation spaces: corridor and hall.  
5.4. Regulations and ordinances.  
5.5. Distribution drawing. Scale 1/50.  
5.5.1. Furniture  
5.5.2. Bathrooms  
5.5.3. Joinery  
5.6.1 Exterior joinery: fixed, frame, oscillating, tilt and turn, sliding, rotary, guillotine.  
5.6.2. Interior joinery: blind, stained glass, a sheet glass, two glass sheets, frame, sliding.  
5.7. Study of the vertical structure.  
5.7.1. Traditional structure.  
5.7.2. Structure drawing.  
5.8. Dimension drawing.  
5.8.1. Acotació de plànols de distribució. Dimensioning distribution drawing.  
5.9. Texts. Box.  
5.10. Calculations of the usable spaces and total floor areas. Surface boxes.

</thead>
<tbody>
<tr>
<td>Self study: 2h</td>
</tr>
</tbody>
</table>

#### Description:
- 12.1. Concept and purpose of the plot distribution.
- 12.2. Determinants for the building situation in the plot: Orientation, Access, views, predominant wind, plot topography, user necessities, urbanistic regulations, garden, etc.
- 12.3. Plot distribution plan.
- 12.3.1. Plan and vertical section.
- 12.3.3. Textures and wefts.
- 12.3.4. Representation scale.
- 12.3.5. Levels compared to the reference plan 0.00.
- 12.4. Urbanistic regulations.
- 12.4.1. Minimum plot.
- 12.4.2. Employment.
- 12.4.3. Building coefficient.
- 12.4.4. Separation at the limits of the plot.
- 12.4.5. Maximum regulation height.
- 12.4.6. Compliance of the urbanistic document.
- 12.5. Texts. Box.
- 12.6. Dimensions.

#### Related activities:
- Activities 6, 8 and 9.
- Activities 2, 6 and 8 correspond to project 2 and project 3 in the continuous evaluation.
- Activity 9 will be final exam.
Planning of activities

### A1 SKETCH AND DWELLING PLAN.

**Description:**
To carry out a sketch and a plan of each student’s house.
The plan will be 1/50.
The activity will carry out individually.

**Support materials:**
- Activity and drawing tools.
- Atenea PDF notes.

**Descriptions of the assignments due and their relation to the assessment:**
Activity resolution done by the students, the professor will give them corrected the next week.
In class, we put in common all the errors and the important objectives of the activity.
It represents part of the continuous evaluation.

**Specific objectives:**
- At the end of the activity the student should be able to:
  - Do a sketch in the correct scale for the details, furniture and plan.
  - Achieve a good level of proportions and lines.
  - Know and apply the values and conventions of line graphs.
  - Knowing how to take measurements using measuring tools commonly used. Distancer and laser tape measure.
  - Know how to dimension a plan: How to draw the dimension and references lines, the most appropriate symbol at the point of its intersection and draw and situate correctly the numbers.

**Hours:** 6h
- Practical classes: 2h
- Self study: 4h

---

### A2 HOUSING REFURBISHMENT

**Description:**
The plant and the vertical section of the dwelling will be studied in scale 1/50.
At the end a descriptive report of the project will be done.
Professor correction.

**Support materials:**
- Activity, drawing tools and calculator for doing the practices.
- Atenea PDF notes.

**Descriptions of the assignments due and their relation to the assessment:**
Activity resolution done by the students, the professor will give them corrected the next week.
In class, we put in common all the errors and the important objectives of the activity.
It represents part of the continuous evaluation.

**Hours:** 17h 30m
- Theory classes: 1h
- Laboratory classes: 8h
- Guided activities: 0h 30m
- Self study: 8h
### A3 Staircase of a Single Family Home

**Description:**
- The activity consists in solving the staircase of a single family house. The students will solve the plans and vertical sections to define the staircase. The activity will be individual.

**Support materials:**
- Activity, drawing tools, and calculator for doing the practices.
- Atenea PDF notes.

**Specific objectives:**
- At the end of the activity, the student should be able to:
  - Do a descriptive report of the project.
  - Know and apply the orientation concept.
  - Apply regulations and criteria for allocation spaces.
  - Allocate and distribute spaces in a dwelling.
  - Distribution by its use.
  - Draw walls, joinery, toilet, furniture, flooring, etc.
  - Represent ventilation facilities and fume extraction.
  - Dimension.
  - Calculate useful, illumination, and building area.
  - Write extra information in the plan by notes and legends.

**Hours:**

### A4 Projections Deduction

**Description:**
- The activity consists in interior or exterior projections of a building, deducted by plants, scale 1/50. The activity will be individual.

**Support materials:**
- Activity, drawing tools, and calculator for doing the practices.
- Atenea PDF notes.

**Specific objectives:**
- At the end of the activity, the student should be able to:
  - Know and apply the design criteria and the regulations of the staircase in a single family house.
  - Know how to draw the different projections that define a staircase.
  - Know and use the correct representation graphic of a staircase.
  - Know how to dimension the different projections of a staircase.

**Hours:**

<table>

**A5 MID-TERM EXAM.**

<table>
<thead>
<tr>
<th>Description:</th>
<th>Hours: 8h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Individual exam in class. Questions related with the contest done in class. (4:00h). At the end of the test the professor will do the correction and in the next session he will explain the common errors and the important objectives of the contest.</td>
<td>Practical classes: 4h</td>
</tr>
<tr>
<td>Support materials: Exam questions, drawing tools and calculator for doing the exam.</td>
<td>Self study: 4h</td>
</tr>
</tbody>
</table>

**Specific objectives:**
At the end of the activity the student should be able to:
- Solve vertical sections and elevations.
- Will has to know and apply the correct criteria that determine the vertical plan selection which generate the vertical section.
- Represent the different constructive elements that appear in the projections, in elevation as in section, typical in basic projects in scale 1/50.

**A6 SINGLE FAMILY HOUSE.**

<table>
<thead>
<tr>
<th>Description:</th>
<th>Hours: 29h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Study of a project of a remote single family house. This practice will be done by groups. The building will be ground floor and various floors with an interior staircase. The roof will be leaning. Study of the plants, vertical section and a building elevation, scale 1/50. Study of the kitchen, its plant and a vertical section, scale 1/20. At the end the student will do a descriptive report of the project. Professor correction.</td>
<td>Theory classes: 1h</td>
</tr>
<tr>

A7 STAIRCASE OF A MULTI-FAMILY BUILDING.

Description:
The activity consist in solve the staircase of a multi-family building.
The students will solve the plants and vertical sections, necessary for the staircase solution.
The activity will be individual.

Support materials:
Activity, drawing tools and calculator for doing the practices.
Atenea PDF notes.

Descriptions of the assignments due and their relation to the assessment:
Activity resolution done by the students, the professor will give them corrected the next week.
In class, we put in common all the errors and the important objectives of the activity.
It represent a part of the continuous evaluation.

Specific objectives:
At the end of the activity the student should be able to:
Do a descriptive report of the project.
Know and apply the urbanistic factors of the urban document.
Know and apply the orientation concept.
Apply regulations and criteria for allocation spaces.
Allocate and distribute spaces in a single family dwelling with different floors.
Distribution by its use.
Solve the staircase applying regulations and design criteria.
Draw walls, joinery, toilet, furniture, flooring, etc.
Represent ventilation facilities, fume extraction and evacuation.
Draw the plant and the vertical section of the staircase.
Represent in various scales. 1/50 and 1/20.
Dimension.
Calculate useful, illumination and building area.
Write extra information in the plan by notes and legends.
**Specific objectives:**
At the end of the activity the student should be able to:
Know and apply the design criteria and the regulations of the staircase in a multi-family building.
Know how to draw the different projections that define a staircase.
Know and use the correct representation graphic of a staircase.
Know how to dimension the different projections of a staircase.

**A8 MULTI-FAMILY BUILDING.**

**Description:**
Study of a multi-family building according to road order.
This practice will be done by groups.
The building will be ground floor and five more floors.
The roof will be plain.
Study of the plants, roof plant, vertical sections, facades and a ordered plan of the plot. Study of a bathroom and a kitchen.
Scale 1/50, 1/200 and 1/20.
At the end the student will do a descriptive report of the project.
Before the study of the project, the student must do a volumetric mockup of the project.
Professor correction.

**Support materials:**
Activity, drawing tools and calculator for doing the practices.
Atenea PDF notes

**Descriptions of the assignments due and their relation to the assessment:**
Activity resolution done by the students, the professor will give them corrected the next week.
In class, we put in common all the errors and the important objectives of the activity.
It represent a part of the continuous evaluation. 24,61%.
Specific objectives:
At the end of the activity the student should be able to:
- Do a descriptive report of the project.
- Know and apply the orientation concept.
- Apply regulations and criteria for allocation spaces.
- Allocate and distribute spaces in a dwelling and in the common spaces.
- Distribution by its use.
- Solve the staircase applying regulations and design criteria.
- Draw walls, joinery, toilet, furniture, flooring, etc.
- Know and apply the regulations of the ventilation facilities, fume extraction and evacuation.
- Represent ventilation facilities, fume extraction and evacuation.
- Solve and draw the roof.
- Represent the facades applying materials texture and shadows.
- Measure the projections.
- Calculate useful, illumination and building area.
- Write extra information in the plan by notes and legends.
- Apply urbanistic factors in the project and complete the urban document.

A9 FINAL EXAM.

Description:
Individual exam in class. Resolution of theoretical and practice questions related with learning objectives of all the contest of the subject. (04:00h)

Support materials:
Questions, drawing tools and calculator for doing the exam.

Descriptions of the assignments due and their relation to the assessment:
Exam resolution.
It represents 40% of the final qualification

Specific objectives:
At the end of the exam, the student has to achieve the specific objectives of the activities done until the exam.
Qualification system

The final mark is the addition of these partial marks:

$$N_{final} = 0.35 \, N_{ac} + 0.25 \, N_{pp} + 0.40 \, N_{pf}$$

$N_{final}$: Final mark.
$N_{ac}$: Continous evaluation mark.
$N_{pp}$: Midterm exam mark.
$N_{pf}$: Final exam mark.

The continous evaluation consist on delvering, during the scheduled terms, of the different practices done in class and out of it.

The midterm exam consist on solve various questions of the correspinding contents of the subject explained until now. The questions will be theoretical and about practical cases. The student has 4 hours to do it.

The final exam consist on solve various questions about all the subject content. The questions will be theoretical and about practical cases. The student has 4 hours to do it.

Regulations for carrying out activities

If some of the continous evaluation activities is not done, it will be considered as non-marked. In any case it is allowed to bring any material to the activities 5, midterm exam, and 9, final exam.

The class attendance and the fulfilment of the practices is obligatory sice the evaluation is continous.

The groups will be divided in sections which will be assisted by the designated professor. The students won't be able to change their group or section.

The practices will begin in class and could be completed out the schedule. The possible doubts of the students must be solved with the designated professor. Only if these doubts go too far the professor responsibilities, then can be dealt with the subject academic coordinator.

In the course of the classes the professors could only solve doubts related with the daily practice. For solving doubts related to other practices, the students must visit the professors during the assistance hours which appear on the web and in the door of the Teaching Unit.
