310014 - Building Construction Law

Coordinating unit: 310 - EPSEB - Barcelona School of Building Construction
Teaching unit: 732 - OE - Department of Management
Academic year: 2018
Degree: BACHELOR'S DEGREE IN ARCHITECTURAL TECHNOLOGY AND BUILDING CONSTRUCTION (Syllabus 2015). (Teaching unit Compulsory)
BACHELOR'S DEGREE IN BUILDING CONSTRUCTION SCIENCE AND TECHNOLOGY (Syllabus 2009). (Teaching unit Compulsory)
ECTS credits: 6
Teaching languages: Catalan, Spanish

Teaching staff
Coordinator: Ana Belén Almécija Casanova
Others: ANA BELÉN ALMÉCJIA CASANOVA - BLANCA BALLESTER CASANELLA - JUAN CARLOS PIQUE HERNANDEZ - ALFONS CONESA PAGES

 degree competences to which the subject contributes

Specific:
1. FB-8 Basic knowledge of the legal regulations of the Public Administration and the procedures of public and private procurement.
2. FE-18 Knowledge of the law of the construction and the contractual relations which occur in the different phases of the construction process, as well as the specific legislation, rules and regulations of the prevention and coordination in matters of safety and occupational health in construction.
3. FE-22 Knowledges of the organisation of the professional work and studies, offices and professional societies, the regulations and rules related with the functions which the Building Engineer develops and the responsibility framework associated to the activity.
4. FE-31 Knowledge of the functions and responsibilities of the agents which intervene in the construction and their professional or managerial organisation, as well as the administrative, managerial and processing procedures.

Transversal:
6. SELF-DIRECTED LEARNING - Level 2: Completing set tasks based on the guidelines set by lecturers. Devoting the time needed to complete each task, including personal contributions and expanding on the recommended information sources.

Teaching methodology
- Presentation method / lecture: Oral presentation by the academic staff on the subject contents.
- Explanatory and participative lesson incorporating time for participation and intervention of students with short duration activities in the classroom.
- Exercises and problem solvings: the students are asked to develop appropriate solutions applying correct procedures, processing the available information and interpreting the results.
- Case study: intensive and comprehensive analysis of an event, issue or actual case in order to learn from it, interpret it, solve it, generate hypotheses, compare their data, reflect on it, complete their knowledge, diagnose it and sometimes try out possible alternative solution procedures.

Learning objectives of the subject

The course aims primarily to introduce students to the legal world related to the construction sector through the study of civil and administrative regulations that apply to the different phases of construction from the management point view, with special emphasis on administrative and civil procurement rules and regulations related to environmental protection in...

**(ENG) C5: Environmental protection in construction**

**Learning time:** 30h
- Theory classes: 6h
- Practical classes: 6h
- Guided activities: 0h
- Self study: 18h

**Description:**
This content Works on:

**Related activities:**
Will be held in Activity 1, corresponding to practices carried out in the classroom and end of the course work and activities 2 and 3, corresponding to the partial and final testing of the subject.
Planning of activities

(ENG) PRACTICES (CONTENT 1, 2, 3, 4 and 5)  

**Description:** Deliveries will consist on practices throughout the course, beginning in the classroom, individually, and delivered to the teacher on the indicated date, as in some cases part of the practice may require data and legislation available only outside the classroom. A final paper on the course is also required.

**Support materials:** All material (notes, books) that students may need are available in ATENEA.

**Descriptions of the assignments due and their relation to the assessment:** Correction and verification by the faculty of the achievement of specific objectives reached by the students. Represents 40% of the final qualification.

**Specific objectives:** At the end of practice, the student should:
- Know the regulatory system and specific Spanish Autonomous Community of Catalonia as a basis for the study of the subject.
- Be able to interpret and develop the main contracts that affect the construction industry, and understand and organize professional societies for the practice of the profession.
- Know the essential aspects of real estate, registration charges which may affect the property and the systematic registration for the protection of property; understand the organizational structure of public administration, its operation, as well as relations with the government through the administrative act, the administrative procedure and the various forms of government procurement.
- Know and apply the rules on environmental protection for construction.

</tbody>
</table>

Specific objectives:
- After the test, students should:
  - Know the regulatory system and specific Spanish Autonomous Community of Catalonia as a basis for the study of the subject.
  - Be able to interpret and develop the main contracts that affect the construction industry, and understand and organize professional societies for the practice of the profession.
  - Know the essential aspects of real estate, registration charges which may affect the property and the systematic of registration for the protection of property.
  - Understand the organizational structure of public administration, its operation, as well as relations with the government through the administrative act, the administrative procedure and the various forms of government procurement.
  - Know and apply the rules on environmental protection for construction.

Qualification system
The final score is the sum of the following partial grades:
- Training: 40% of the final grade
- Partial Test: 20% of the final grade
- Final test: 40% of the final grade

FINAL MARK: PRACT 1 (40%) + PARTIAL TEST (20%) + FINAL MARK (40%)

Regulations for carrying out activities
All the proposed continuous evaluation activities must be delivered to the teaching staff. The final test is individual, written and without any kind of support material.
