310603 - Geographic Information and Cartography

Coordinating unit: 310 - EPSEB - Barcelona School of Building Construction
Teaching unit: 751 - DECA - Department of Civil and Environmental Engineering
Academic year: 2018
Degree: BACHELOR'S DEGREE IN GEOINFORMATION AND GEOMATICS ENGINEERING (Syllabus 2016).
( Teaching unit Compulsory)
ECTS credits: 6

Teaching languages: Spanish

Teaching staff
Coordinator: ROGELIO LOPEZ BRAVO
Others: ROGELIO LOPEZ BRAVO

Degree competences to which the subject contributes

Basic:
CB2EGG. The students must know how to apply their knowledge to the work or vocation in a professional way and possess the competences that are used to be demonstrated by the elaboration and defense of arguments and the resolution of problems inside their own field of study.
CB1EGG. The students have demonstrated possess and comprehend knowledge in a field of study that comes from high school, and is used to a level that, while is supported in advanced textbooks, it also includes some aspects that involve knowledge from the field of study in the vanguard.

Specific:
CE16EGG. Knowledge and application of methods and geometric techniques inside the scope of the different engineerings
CE9EGG. (ENG) Coneixement, utilització i aplicació de les tècniques de tractament. Anàlisi de dades espacials. Estudi de models aplicats a l'enginyeria i arquitectura. (Mòdul comun a la branca Topografia)
CE7EGG. Knowledge, using and application of instruments and appropriate topographic methods in order to carry out raisings and surveyings.

General:
CG6EGG. Reunite and interpret information of the ground and all of this geographic and economically related with the ground.
CG5EGG. Determine, measure, evaluate and represent the ground, tridimensional objects, points and trajectories.

Transversal:
CT3. TEAMWORK: Being able to work in an interdisciplinary team, whether as a member or as a leader, with the aim of contributing to projects pragmatically and responsibly and making commitments in view of the resources that are available.
06 URI. EFFECTIVE USE OF INFORMATION RESOURCES. Managing the acquisition, structure, analysis and display of information from the own field of specialization. Taking a critical stance with regard to the results obtained.

Teaching methodology
Combination of masterful class, participatory with practices of individual and cooperative character. It also includes a part of self-sufficient learning. In the medium groups it will be done exercises related with the subject.

Learning objectives of the subject

Conocer los conceptos fundamentales en Cartografía.
Entender las principales superficies topográficas y su presentación así como los diferentes elementos geográficos.
310603 - Geographic Information and Cartography

Conocer los procesos de la Generalización Cartográfica
Normativa y calidad en Cartografía
Difusión de la Cartografía

### Study load

| Total learning time: 150h | Hours large group: 24h 16.00% | Hours medium group: 36h 24.00% | Hours small group: 0h 0.00% | Self study: 90h 60.00% |
# 310603 - Geographic Information and Cartography

## Content

<tr>
<th>C1 FUNDAMENTAL CONCEPTS</th>
<th>Learning time: 21h</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Theory classes: 3h</td>
</tr>
<tr>
<td></td>
<td>Practical classes: 6h</td>
</tr>
<tr>
<td></td>
<td>Self study : 12h</td>
</tr>
</tbody>
</table>

**Description:**
Introduction to basic concepts in cartography and its relationship with the rest of the subjects of the Degree in Geomatics and Surveying

**Related activities:**
Exercises and related scales, slopes, profiles and practical reference systems

**Specific objectives:**
Knowledge of the basics of cartography (scale, plan ...)

<table>
<thead>
<tr>
<th>C2 GEOGRAPHIC ELEMENTS.</th>
<th>Learning time: 23h</th>

<tr>
<td></td>
<td>Self study : 12h</td>
</tr>
</tbody>
</table>

**Description:**
Determination of the main reference systems on the Earth's surface.

**Related activities:**
Laboratory practices in developing some map projections in its graphical representation.
Exercises related to geographic coordinates

**Specific objectives:**
Learn the use of concepts related to geographic coordinates
Basic knowledge of the need of the most representative cartographic projections
### C3 GRAPHIC SEMIOLOGY

**Learning time:** 23h  
- Theory classes: 4h  
- Practical classes: 2h  
- Laboratory classes: 3h  
- Guided activities: 1h  
- Self study: 13h

**Description:**  
Cartography as a means of communication through the cartographic design. Study of visual perception and visual mapping variables used

**Related activities:**  
Laboratory practices using visual variables

**Specific objectives:**  
Correct use of language mapping

### C4 THE MAPPING PROCESS

**Learning time:** 19h  
- Theory classes: 3h  
- Practical classes: 1h  
- Laboratory classes: 2h  
- Guided activities: 1h  
- Self study: 12h

**Description:**  
Exposure of the different phases comprising the mapping process

**Related activities:**  
Mapping project approach

**Specific objectives:**  
The student knows the tasks within each phase of the mapping process
C5 CARTOGRAPHIC GENERALIZATION.

Description:
Study of all processes performed when changing graphic scale or purpose of the map

Related activities:
Directed laboratory practices

Specific objectives:
Knowledge of the sequence of operations performed in the process of generalization.

Learning time: 22h
Theory classes: 4h
Practical classes: 1h
Laboratory classes: 3h
Guided activities: 1h
Self study: 13h

C6 THEMATIC CARTOGRAPHY

Description:
Study of data sources and application. Creating thematic maps

Related activities:
Laboratory practices aimed at creating thematic maps

Specific objectives:
Development of thematic mapping and linking with visual variables

Learning time: 23h
Theory classes: 4h
Laboratory classes: 4h
Guided activities: 1h
Self study: 14h

C7 LAWS AND REGULATIONS. BROADCAST QUALITY AND MAPPING

Description:
Different regulations cartographic standardization

Related activities:
Research and presentation of different regulations

Specific objectives:
Study of different regulations affecting the cartographic product

Learning time: 19h
Theory classes: 2h
Laboratory classes: 1h
Guided activities: 2h
Self study: 14h
## Planning of activities

### A1 FUNDAMENTAL CONCEPTS

**Hours:** 8h  
- Practical classes: 6h  
- Self study: 2h

**Description:**
Realization of exercises about scales, slopes, equidistances, etc. It will be done in groups of 3 people and individually.

**Support materials:**
The documentation of the students will be done across Atenea or at the library of the school.

**Descriptions of the assignments due and their relation to the assessment:**
It will be delivered on the date fixed by the teacher.

**Specific objectives:**
The student must be capable of resolving basic exercises of Cartography.

### A2 GEOGRAPHIC ELEMENTS

**Hours:** 5h  
- Practical classes: 3h  
- Self study: 2h

**Description:**
Realization of exercises about geographic coordinates. It will be done in groups of 3 people and individually.

**Support materials:**
The documentation of the students will be done across Atenea or at the library of the school.

**Descriptions of the assignments due and their relation to the assessment:**
It will be delivered on the date fixed by the teacher.

**Specific objectives:**
The student must be capable of resolving basic exercises of Cartography.

### A3 CARTOGRAPHIC PROJECTIONS

**Hours:** 6h  
- Practical classes: 2h  
- Laboratory classes: 2h  
- Self study: 2h

**Description:**
Graphic development of some cartographic projections. Individual project.

**Support materials:**
The practice will be developed in the computing room.

**Descriptions of the assignments due and their relation to the assessment:**
It won't be necessary the delivery of the practice but it's mandatory the assistance and development of

**Specific objectives:**
Know and develop cartographic projections of geometric character and its drawing in CAD.
### A4 GRAPHIC SEMIOLOGY

**Hours:** 10h  
Practical classes: 2h  
Laboratory classes: 3h  
Guided activities: 1h  
Self study: 4h

**Description:**  
Application of the visual variables explained in the unit. Individual project.

**Support materials:**  
It will be facilitate across Atenea

**Descriptions of the assignments due and their relation to the assessment:**  
It will be done a delivery for its revision and evaluation, in case it is necessary, at the date fixed by the teacher.

**Specific objectives:**  
Knowledge and application of the visual variables

### A5 CARTOGRAPHIC PROCESS

**Hours:** 14h  
Practical classes: 1h  
Laboratory classes: 2h  
Guided activities: 1h  
Self study: 10h

**Description:**  
Development of flux diagrams of the cartographic product. Search of processes in different official organisms.  
Work in group

**Descriptions of the assignments due and their relation to the assessment:**  
Presentation in class in prefix days

**Specific objectives:**  
The student must know the different steps of the cartographic processes. The student will start its own project.

### A6 GENERALIZATION

**Hours:** 10h  
Practical classes: 1h  
Laboratory classes: 3h  
Guided activities: 1h  
Self study: 5h

**Description:**  
From a selected cartography it will be done a change of scale or graphic object. Individual project

**Support materials:**  
The material will be shown across Atenea

**Descriptions of the assignments due and their relation to the assessment:**  
The last day of class will be carried out a delivery for its evaluation.

**Specific objectives:**  
Practical knowledge of the different operations that are done in the cartographic generalization
### A7 THEME CARTOGRAPHIC

**Description:**
Carrying out different theme maps. Individual project

**Support materials:**
The practice will be carried out in the computing room with different software

**Descriptions of the assignments due and their relation to the assessment:**
The last day of class will be carried out a delivery for its evaluation in case it is necessary.

**Specific objectives:**
Knowledge and application of the different products of theme cartography and the application software.

#### Hours:
- Laboratory classes: 4h
- Guided activities: 1h
- Self study: 7h

---

### A8 LEGISLATION AND REGULATIONS

**Description:**
Oral exposition in class of the regulations of official institutions. Group project.

**Support materials:**
The student will look for information in the bibliography and the institutions.

**Descriptions of the assignments due and their relation to the assessment:**
It will be carried out a brief oral exposition in class

**Specific objectives:**
Knowledge of official institutions, web pages and regulations.

#### Hours:
- Laboratory classes: 1h
- Guided activities: 2h
- Self study: 10h

---

**Qualification system**

It will be done two partial test, once in the middle of the course and the other one at the end with a valuation of 30% of the final mark each one. Laboratory activities and individual projects: 30% of the final mark Group projects: exposition and contents: 10% of the final mark To pass the subject the marks of the previous activities have to be over 3.5. At the end of the course it will be a re-evaluation exam for the students with final mark over 3.5, where all the contents of the subject will be evaluated.

The attendence and work in class will be valued.

**Regulations for carrying out activities**

Continuous attendance to class. All the evaluation activites will be mandatory.
Bibliography

**Basic:**
