Transversal:
03 TLG. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.
06 URI. EFFECTIVE USE OF INFORMATION RESOURCES. Managing the acquisition, structure, analysis and display of information from the own field of specialization. Taking a critical stance with regard to the results obtained.

TEACHING METHODOLOGY

The proposed class on "Strategic Management & Innovativeness" promotes the interlocking between theory rooted in the strategic management frame and practical applications throughout the class sessions (2 hours per week). Accordingly, the student’s involvement and commitment in both theory and practical sessions is critical to ensure an efficient learning process.

LEARNING OBJECTIVES OF THE SUBJECT

The core objective of this course is to equip students with the knowledge necessary for better understanding the conditions under which managerial actions and techniques embedded in the strategy-making’s arsenal turn advantageous for the different units that form organizations.

The proposed course on ‘Strategic Management & Innovativeness’ embraces two areas: an exploitative approach to management in which incumbent organizations pursue superior performance through the development and efficient implementation of different management techniques; and an exploratory approach to management that deals with the ways through which new businesses capitalize on their available resources and capabilities.

**Full-or-part-time:** 16h 40m
Theory classes: 4h 40m
Guided activities: 2h
Self study: 10h
Configuration of the organization’s output portfolio

Description:
Topics addressed in this part include:

4.1 Product portfolio: Main characteristics, and complexity in its configuration
4.2 The Costs and Benefits of Product Portfolio Complexity
4.3 Business Performance: The multidimensionality of performance in organizations
4.4 Complexity and Performance: Analysis based on benchmarking

Full-or-part-time: 20h
Theory classes: 6h
Guided activities: 4h
Self study: 10h

GRADING SYSTEM

Students’ evaluation will take into consideration their involvement in the different debates in class as well as their commitment in the development of the different tasks assigned to them. Additionally, it will include the results of the different case studies (continuous assessment) and a final exam that helps evaluate the knowledge and learning of student during the course. A detailed description of the final mark’s components is presented below:

In class work (SC): Short case studies 30%
Take home assignments (LC): Case studies 30%
In class participation and involvement (PC): 10%
Final Exam (FE) 30%

Final Grade= (0.30 x SC) + (0.30 x LC) + (0.10 x PC) + (0.30 x FE)
