### Degree competences to which the subject contributes

**Specific:**
1. TEX: A background of woven structures

### Teaching methodology

- Sessions of theory
- Sessions of practical work at class
- Sessions of practical work at laboratory

### Learning objectives of the subject

- **GLO1.** To know the weaving technologies and processes.
- **GLO.** To know all representation and structuring processes for woven fabrics and the effects of their combinations on fabric appearance.
- **GLO3.** To be able to select the most appropriate process in terms of the fabric to be produced and its purpose, as well as the technical and economic requirements involved.
- **GLO4.** To be able to design, manufacture and purchase any type of fabric.

### Topic 3: COMPLEX STRUCTURES

**Description:**
- 1.8. Two-sided and multiple fabrics.
- 1.9. Long yarn float in fabrics.
- 1.10. Double-layers and multiple layers fabrics.
- 1.11. Leno weave.
- 1.12. Narrow fabrics.
- 1.13. Terry fabrics.
- 1.15. Circular weaves.
- 1.16. 2D and 3D fabrics.

**Related activities:**
1,3

**Specific objectives:**
SO4. To become acquainted with the complex weaves used in fabric design, as well as with the technical and production requirements involved.
SO5. To know how to choose the machinery to produce woven structures in function of the product to produce.

### Learning time:
- Theory classes: 8h
- Laboratory classes: 8h
- Self study: 24h

### Topic 4: DESCRIPTION OF PREPARATION SYSTEMS

**Description:**
- 1.18. Production and quality management.

**Related activities:**
1,2,3

**Specific objectives:**
OE6. To know how to choose the preparation system in function of the fabric to produce.

### Learning time:
- Theory classes: 4h
- Laboratory classes: 4h
- Self study: 12h
### Topic 5: ANALYSIS OF THE WEAVING MACHINE PERFORMANCE IN TERMS OF THE DESIGN TO BE PRODUCED

**Description:**
1.20. Specificities of machines as a function of the target article.
1.22. Importance of drawing-in-draft.
1.23. Density regulators.
1.24. Warp stress control.
1.25. Double beams.
1.27. Weaving triangle and evolution of looms.

**Related activities:**
1, 2, 3

**Specific objectives:**
OE7. To know the operation of weaving machines to prevent and correct complications during the design process.

**Learning time:**
30h
- Theory classes: 6h
- Laboratory classes: 6h
- Self study: 18h

### Topic 6: SELECTION CRITERIA FOR WEAVING SYSTEMS

**Description:**
1.28. Approaching the target product as a function of the particular machine.
1.29. Trends in weaving machinery.
1.30. Factors influencing the choice of a weaving system.

**Related activities:**
1, 2, 3

**Specific objectives:**
OE8. To know how to choose the best system to weave in function of the design

**Learning time:**
15h
- Theory classes: 3h
- Laboratory classes: 3h
- Self study: 9h
Qualification system

Exams: 60% (30% 1st, 30% 2nd)
Laboratory: 15%
Other deliverables: 25%

Recovery mechanism: The unsatisfactory results of the first partial exam can be redirected by means of a written test to be carried out on the day set for the final exam. This test can be accessed by all students with a mark less than 5.0 of the assessment act, with a score of between 0 or 10. The mark obtained by the application of the conversion will replace the initial qualification as long as it is higher.

For those students who meet the requirements and submit to the reevaluation examination, the grade of the reevaluation exam will replace the grades of all the on-site written evaluation acts (tests, midterm and final exams) and the grades obtained during the course for lab practices, works, projects and presentations will be kept. If the final grade after reevaluation is lower than 5.0, it will replace the initial one only if it is higher. If the final grade after reevaluation is greater or equal to 5.0, the final grade of the subject will be pass 5.0.
