Course guide
320116 - APA - Algorithms and Audiovisual Programming

Unit in charge: Terrassa School of Industrial, Aerospace and Audiovisual Engineering
Teaching unit: 739 - TSC - Department of Signal Theory and Communications.

Degree: BACHELOR'S DEGREE IN AUDIOVISUAL SYSTEMS ENGINEERING (Syllabus 2009). (Compulsory subject).

Academic year: 2022  ECTS Credits: 6.0  Languages: Catalan, Spanish

LECTURER

Coordinating lecturer: Vallverdu Bayes, Sisco
Others: Nogueiras Rodriguez, Albino

PRIOR SKILLS

Students will be expected to have passed all of the subjects related to mathematics and IT/programming, as well as Signals and Systems, Digital Image Processing and Digital Audio Processing.

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. AUD: Ability to build, exploit and manage telecommunication services and applications, understood as capture systems, analogue and digital manipulation, coding, transport, representation, processing, storage, reproduction, management and presentation of audiovisual services and multimedia information.
2. AUD: Ability to create, encode, manage, promote and distribute multimedia content, on the basis of the criteria of usability and accessibility of audiovisual services and interactive broadcasts.

TEACHING METHODOLOGY

- Face-to-face lecture sessions.
- Face-to-face practical work sessions.
- Independent learning and exercises.
- Preparation and completion of group activities subject to assessment.

In the face-to-face lecture sessions, the lecturer will introduce the basic theory, concepts, methods and results for the subject and use examples to facilitate students' understanding.

Students will be expected to study in their own time to become familiar with the concepts, using their own notes taken in theory classes and the compulsory and recommended reading lists. It is particularly important that students read in their own time the assigned articles from the scientific literature.

Students are expected to complement in-class programming activities with independent learning activities outside of class in order to gain sufficient algorithm-coding practice in the appropriate programming language (MATLAB or C++).

LEARNING OBJECTIVES OF THE SUBJECT

This subject will cover audio- and video-signal processing applications that use PC technology. Students will learn to develop and program systems that operate in real time, and receive a hands-on overview of the various theoretical concepts by means of specific practicals.
STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours large group</td>
<td>30,0</td>
<td>20.00</td>
</tr>
<tr>
<td>Hours small group</td>
<td>30,0</td>
<td>20.00</td>
</tr>
<tr>
<td>Self study</td>
<td>90,0</td>
<td>60.00</td>
</tr>
</tbody>
</table>

Total learning time: 150 h

CONTENTS

PYTHON FOR SIGNAL PROCESSING

Description:
Python for signal processing

Full-or-part-time: 40h
Theory classes: 8h
Laboratory classes: 8h
Self study: 24h

Advanced

Description:

Tasques vinculades:

- Construcció d’una llibreria algebraica bàsica
- Definició de vectors i matrius amb POO
- Operacions algebraiques usant sobrecarga d’operadors
- Altres mètodes magics
- Filtrat de senyals
- Disseny i implementació de filtres FIR i IIR
- Filtratge per blocs
- Estimació espectral
- L’espectrograma i les seves limitacions
- Mètodes clàssics
- Estimador de màxima entropia

Full-or-part-time: 40h
Theory classes: 8h
Laboratory classes: 8h
Self study: 24h

SIGNAL PROCESSING APPLICATIONS

Description:

Full-or-part-time: 70h
Theory classes: 14h
Laboratory classes: 14h
Self study: 42h
GRADING SYSTEM

- Exams: 40% (20% first term, 20% second term)
- Laboratory: 40%
- Final project: 20%

For those students who meet the requirements and submit to the reevaluation examination, the grade of the reevaluation exam will replace the grades of all the on-site written evaluation acts (tests, midterm and final exams) and the grades obtained during the course for lab practices, works, projects and presentations will be kept.

If the final grade after reevaluation is lower than 5.0, it will replace the initial one only if it is higher. If the final grade after reevaluation is greater or equal to 5.0, the final grade of the subject will be pass 5.0.
