Course guide

330513 - ME - Mathematics for Engineering

Unit in charge: Manresa School of Engineering
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR’S DEGREE IN AUTOMOTIVE ENGINEERING (Syllabus 2017). (Compulsory subject).

Academic year: 2022  ECTS Credits: 4.5  Languages: Catalan, English

LECTURER

Coordinating lecturer: Cors Iglesias, Josep M.
Domenech Blásquez, Margarita

Others:

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
CE1. Ability to solve mathematical problems that may arise in engineering. Ability to apply knowledge about: linear algebra; geometry; differential geometry; differential and integral calculus; differential equations and partial derivatives; numerical methods; numerical algorithms; statistics and optimization.

Generical:
CG3. Knowledge of basic and technological subjects that will enable students to learn new methods and theories and that will endow them with the versatility needed to adapt to new situations.

Transversal:
1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 2. Designing and executing a good strategy for advanced searches using specialized information resources, once the various parts of an academic document have been identified and bibliographical references provided. Choosing suitable information based on its relevance and quality.
2. SELF-DIRECTED LEARNING - Level 2: Completing set tasks based on the guidelines set by lecturers. Devoting the time needed to complete each task, including personal contributions and expanding on the recommended information sources.
3. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.

Basic:
CB1. Students will be able to demonstrate their knowledge of a field of study that builds on secondary education and is usually found at a level that, while supported by advanced textbooks, also includes aspects that involve knowledge of the latest developments in the field of study.
CB2. Students will be able to apply their knowledge to their work or vocation in a professional manner and demonstrate that they possess the competencies that are typically demonstrated by elaborating and defending arguments and solving problems in the field of study.

TEACHING METHODOLOGY

MD1 Master class or conference (EXP)
MD2 Problem solving (PR)
MD5 Project or activity (PR)
MD7 Assessment activities (EV)
LEARNING OBJECTIVES OF THE SUBJECT

Learning the basic concepts of differential equations, in order to develop analytical skills and logical thinking, increasing the ability to abstract and generalize. Apply knowledge to solve problems, establishing methods and algorithms for solving them. Obtain and interpret results with computer tools.

STUDY LOAD

<table>
<thead>
<tr>
<th>Type</th>
<th>Hours</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours small group</td>
<td>22.5</td>
<td>20.00</td>
</tr>
<tr>
<td>Hours large group</td>
<td>22.5</td>
<td>20.00</td>
</tr>
<tr>
<td>Self study</td>
<td>67.5</td>
<td>60.00</td>
</tr>
</tbody>
</table>

Total learning time: 112.5 h

CONTENTS

Content title 1: Ordinary Differential Equations

Description:

Specific objectives:
Ability to solve initial value and boundary value problems of ordinary differential equations.

Related activities:
1,2,3,4,5

Full-or-part-time: 82h 30m
Theory classes: 16h 30m
Laboratory classes: 16h 30m
Self study : 49h 30m

Content title 1: Partial Differential Equations

Description:

Specific objectives:
Ability to solve problems with boundary conditions of differential equations in stationary dimensional one partial derivatives.

Related activities:
1,2,3,4,5

Full-or-part-time: 30h
Theory classes: 6h
Laboratory classes: 6h
Self study : 18h
### ACTIVITIES

#### Title of activity 1: Theoretical classes

**Description:**
Presentation of the theoretical part and its applications.

**Specific objectives:**
Those corresponding to the contents 1,2.

**Material:**
Digital campus documents and basic bibliography.

**Full-or-part-time:** 36h
- Theory classes: 18h
- Self study: 18h

#### Title of activity 2: Classes of problems

**Description:**
Approach and problem solving.

**Specific objectives:**
Those corresponding to the contents 1,2.

**Material:**
Exercise statements on the digital campus and basic bibliography.

**Full-or-part-time:** 36h 30m
- Laboratory classes: 15h
- Self study: 21h 30m

#### Title of activity 3: Laboratory classes

**Description:**
Implementation of theoretical results. Numerical and symbolic manipulation.

**Specific objectives:**
Those corresponding to the contents 1,2.

**Material:**
Scripts on the digital campus.

**Full-or-part-time:** 17h 30m
- Laboratory classes: 6h
- Self study: 11h 30m
Title of activity 4: Written partial tests

Description:
Three control tests.

Specific objectives:
Those corresponding to the contents 1,2.

Material:
Test statements.

Delivery:
Individual answers.

Full-or-part-time: 16h 30m
Theory classes: 4h 30m
Self study: 12h

Title of activity 5: solvent use of the information

Description:
Activity conducted by BCUM

Delivery:
Individual answers.

Full-or-part-time: 6h
Laboratory classes: 1h 30m
Self study: 4h 30m

GRADING SYSTEM

Grade will be calculated from the following expression:

\[ NFC = 0.05 \times MA + 0.35 \times EP_1 + 0.35 \times EP_2 + 0.25 \times EP_3 \]

where \( MA \) is the result of test about "solvent use of the information", \( EP_1 \), \( EP_2 \) and \( EP_3 \) the grades of the partial exams.

Final grade of the course will be calculated from the following expression

\[ NF = \max \{NEF, NFC\} \]

where \( NEF = 0.05 \times MA + 0.95 \times EF \) and \( EF \) the grade of the final exam

EXAMINATION RULES.

An unperformed activity carries a grade of zero in that activity.

BIBLIOGRAPHY

Basic:
RESOURCES

Other resources:
Notes and / or slides related to the theoretical and practical classes.
List of problems.
