Degree competences to which the subject contributes

Specific:
1. CE25. Knowledge and ability to apply material engineering.

Transversal:
2. SELF-DIRECTED LEARNING - Level 2: Completing set tasks based on the guidelines set by lecturers. Devoting the time needed to complete each task, including personal contributions and expanding on the recommended information sources.
3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 2. Using strategies for preparing and giving oral presentations. Writing texts and documents whose content is coherent, well structured and free of spelling and grammatical errors.
4. TEAMWORK - Level 2. Contributing to the consolidation of a team by planning targets and working efficiently to favor communication, task assignment and cohesion.
5. EFFECTIVE USE OF INFORMATION RESOURCES - Level 2. Designing and executing a good strategy for advanced searches using specialized information resources, once the various parts of an academic document have been identified and bibliographical references provided. Choosing suitable information based on its relevance and quality.

Teaching methodology

In the theory classes the basic concepts of the subject will be explained. In the classes of problems the basic techniques for the resolution of problems will be explained and the proposed problems will be discussed, from the student's contributions. In the practical exercises will explain the basic knowledge to perform the different proposed tests and the obtained results will be interpreted and discussed.
In the out-class activities the professor supervises student's work by means of the analysis of his evolution through the evaluation activity and the guided activities. Biblio

Learning objectives of the subject

- Understand and contrast the fundamental concepts of crystalline structure and microstructure of the different types of materials
- Select the chemical/physical/mechanical magnitudes of the materials necessary in accordance with the specifications of
a product.
- Understand the relation between the microstructure, the processing and the materials properties.
- Select of materials based on their chemical, thermal, electrical, magnetic and mechanical properties
- Applies the standards of tests.
- It uses and it interprets the tests and it analyzes the results

**Related activities:**
- Activity 1: Expositive class
- Activity 2: Exercises of content 1
- Activity 3: Steel diagram 1ª part (computer program)
- Activity 4: Practice of steel metallography
- Activity 11: Test of steel knowledge
- Activity 18: Final test

**Specific objectives:**
Fundamental knowledge acquisition on the Faith alloys
### Content 2: Heat treatments ferrous alloys

#### Learning time:
- Theory classes: 3h
- Practical classes: 4h
- Laboratory classes: 8h
- Guided activities: 0h 40m
- Self study: 17h

#### Description:
- Heat treatments
- Surface treatments

#### Related activities:
- Activity 1: Expositive class
- Activity 5: Exercises of content 2
- Actividad3: Steel diagram 2ª part (computer program)
- Actividad6: Practice of micro-hardnesses
- Actividad7: Practice of hardenability: Jominy test
- Actividad8: Practice of pyrometry
- Actividad11: Test of steel knowledge
- Actividad18: Final test

#### Specific objectives:
- Fundamental knowledge acquisition of the heat treatments of ferric alloys
### Content 3: Classification of steels

<table>
<thead>
<tr>
<th>Description:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plain carbon steels.</td>
</tr>
<tr>
<td>Low-alloy steels</td>
</tr>
<tr>
<td>Alloy steels and super-alloy steels.</td>
</tr>
<tr>
<td>Special steels.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Related activities:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activity 9: Seminary of steel classification</td>
</tr>
<tr>
<td>Actividad10: Works in small group of content 3</td>
</tr>
<tr>
<td>Actividad11: Test of steel knowledge</td>
</tr>
<tr>
<td>Actividad18: Final test</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Specific objectives:</th>
</tr>
</thead>
<tbody>
<tr>
<td>It relates the microstructure, the processing and the properties of steel</td>
</tr>
<tr>
<td>It selects materials based on his physical, chemical, thermal and mechanical properties</td>
</tr>
</tbody>
</table>
## Content 4: Cast Irons

<table>
<thead>
<tr>
<th><strong>Description:</strong></th>
<th><strong>Learning time:</strong> 17h 40m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Properties of Cast Irons</td>
<td>Theory classes: 2h</td>

<tr>
<td></td>
<td>Guided activities: 0h 40m</td>
</tr>
<tr>
<td></td>
<td>Self study : 11h</td>
</tr>
</tbody>
</table>

### Related activities:
- Actividad1: Expositive class
- Actividad12: Exercises of content 4
- Actividad13: Practice of metallography of Cast Irons
- Actividad18: Final test

### Specific objectives:
- Know ferrous materials
### Content 5: Non ferric alloys

**Learning time:** 24h 40m  
- Theory classes: 4h  
- Practical classes: 3h  
- Laboratory classes: 4h  
- Guided activities: 0h 40m  
- Self study: 13h

**Description:**  
Aluminum and its alloys  
Magnesium and its alloys  
Titanium and its alloys  
Copper and brasses

**Related activities:**  
Actividad1: Expositive class  
Actividad14: Exercises of content 5  
Actividad15: Practice of non ferric alloy characterization  
Actividad18: Final test

**Specific objectives:**  
Know non ferrous materials
### Content 6: Materials non metallic

<table>
<thead>
<tr>

</tr>
<tr>
<td>Self study: 13h</td>
</tr>
</tbody>
</table>

#### Description:
- Ceramic and glasses. Mechanical ceramic properties and glasses
- Polymers. Thermo-mechanical polymer properties
- Composites.

#### Related activities:
- Actividad1: Expositive class
- Actividad16: Exercises of content 6
- Actividad17: Practice ceramic
- Actividad18: Final test

#### Specific objectives:
- Know non metallic materials
340052 - MAES-M5O02 - Structural Materials

**Qualification system**

Individual written tests: 70%
Development of the laboratory practices: 20%
Presentation and evaluation of proposed problems (individual or in group): 10%

The evaluation of the course will be based on the following indicators:

- **T**, Theory,: average midterm 1, PT1, and midterm 2, PT2.
- **P**, Exercises or completed questionnaires: mean of the different performed exercises.
- **L** Labs: weighted average of the different scheduled practices.
- **F**, Final Theory Test.

The qualification of this matter will be obtained by applying the most favorable of the following ratios:

1. Theory, T: 70% of the final note (average of the two partials)
   Solved exercises, P: 10% of the final
   Labs, L: 20% of the final
   Final score T = 0.7T +0.2P +0.1 L

2. Theory, F: 70% of the final exam
   Solved exercises, P: 10% of the final note
   Labs, L: 20% of the final note
   Final Score = 0.7 F +0.1 P +0.2 L

The laboratory practices, the tests carried out via Campus Digital and the activities carried out in the classroom during the regular period of classes (problems and / or presentations of work) will not be re-evaluated.

**Regulations for carrying out activities**

All the planned activities in this subject have a part in which the students have to attend in person and another part in which the students have to do an independent learning. Before the classes of problems the students will individually discuss individually or in small groups the proposed problems and will have to present their solution. The evaluation of this task will influence in the evaluation. For the practical exercises in the laboratory the students have to previously know the fundamentals of each test and knowledge that results are expected for each test.
