340227 - LUMI-E7P09 - Light Technology

Coordinating unit: 340 - EPSEVG - Vilanova i la Geltrú School of Engineering
Teaching unit: 709 - EE - Department of Electrical Engineering
Academic year: 2019
Degree: BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL DESIGN AND PRODUCT DEVELOPMENT ENGINEERING (Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
ECTS credits: 6
Teaching languages: Catalan

Teaching staff
Coordinator: Caumons Sangra, Ramon

Degree competences to which the subject contributes

Specific:
1. CE29. Knowledge of DOMÒTIQUES installation and LUMINOTÈCNIQUES.

Transversal:
2. SUSTAINABILITY AND SOCIAL COMMITMENT - Level 3. Taking social, economic and environmental factors into account in the application of solutions. Undertaking projects that tie in with human development and sustainability.
3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 2. Using strategies for preparing and giving oral presentations. Writing texts and documents whose content is coherent, well structured and free of spelling and grammatical errors.
4. TEAMWORK. Being able to work as a team player, either as a member or as a leader. Contributing to projects pragmatically and responsibly, by reaching commitments in accordance to the resources that are available.

Teaching methodology
- In the lectures will be presented and developed the theoretical foundations of programmed materials. Consist of theoretical explanations complemented by activities to encourage participation, discussion and critical analysis by students.
- In the kinds of problems were raised and solved exercises for the areas covered. Students have to solve, individually or in groups, indicating problems.
- Within hours of laboratory practice, students will take the required and delivered its report of the activity along with appropriate calculations and critical considerations.
- It will realised group work during the year related to a specific topic of the course.

Learning objectives of the subject
- General views on these Principles and applications of electricity and the Vision
- Describe different las fuentes de luz
- Qualify for the lighting calculation lighting of facilities inside and outside Area.
### Study load

<table>
<thead>
<tr>
<th>Total learning time: 150h</th>
<th>Hours large group: 45h 30.00%</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

3.1 Photoelectric cells. Luxímetres
3.2 Representation systems feature bright lamps and luminaires.
3.3 Control and distribution of luminous flux. Lights.
3.4 Classification of the lights.
3.1 Photoelectric cells. Luxímetres
3.2 Representation systems feature bright lamps and luminaires.
3.3 Control and distribution of luminous flux. Lights.
3.4 Classification of the lights.
(ENG) Tema 4 Enllumenat d'internors

Learning time: 25h
Theory classes: 7h 30m
Laboratory classes: 2h 30m
Self study: 15h

Description:
4.1 Intermediate Lighting obtain. Regulations.
4.2 Quality of the installation of lighting
4.3 Calculation methods
4.4 Calculation of interior lighting

(ENG) Tema 5 Enllumenat viari

Learning time: 25h
Theory classes: 7h 30m
Laboratory classes: 2h 30m
Self study: 15h

Description:
5.1 Factors of a certain street lighting installation. Regulations
5.2 Influence of traffic demands in street lighting
5.3 Characteristics luminotècnicas a street lighting installation
5.4 geometric features

(ENG) Tema 6 Enllumenat d'àrees

Learning time: 25h
Theory classes: 7h 30m
Laboratory classes: 2h 30m
Self study: 15h

Description:
6.1 General characteristics of the illumination projectors.
6.2 Illuminated advertising
6.3 Lighting facades and monuments.
6.4 Lighting protection and security surveillance.
6.5 Lighting of parks and gardens.
6.6 Lighting sport.
PRACTICES

Description:
Laboratory. Lighting.
Lighting studio

Learning time: 0h
Guided activities: 0h

Qualification system

60 % theory.
40 % practices.

RE EVALUATION:
If the EPSEVG establishes reevaluation for this subject, it will be done according to its regulations. The re-evaluable part would correspond to the exams (60%).

Regulations for carrying out activities

- The written tests are classroom and individual.
- In classes of problems and/or laboratory practices will be assessed, where appropriate, prior work together with presentation of results of the activity.
- In addition to the project report submitted with all calculations the oral presentation will also be evaluated, in which it necessarily must involve all group members.

Bibliography
