Course guides
340354 - ESTA-C3O43 - Statistics

Unit in charge: Vilanova i la Geltrú School of Engineering
Teaching unit: 749 - MAT - Department of Mathematics.

Degree: BACHELOR'S DEGREE IN INFORMATICS ENGINEERING (Syllabus 2010). (Compulsory subject).
BACHELOR'S DEGREE IN INFORMATICS ENGINEERING (Syllabus 2018). (Compulsory subject).

Academic year: 2020  ECTS Credits: 6.0  Languages: Catalan

LECTURER

Coordinating lecturer: Simo Mezquita, Ester
Others: Batlle Arnau, Carles

PRIOR SKILLS

Ability to apply the basic tools of differential and integral calculus in one real variable.

REQUIREMENTS

FOMA

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:
1. CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.

Transversal:
2. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
3. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

TEACHING METHODOLOGY

In the lectures the instructor presents some motivating ideas, the fundamental concepts and some relevant developments, intermingled with key examples and the resolution of representative problems.

In the lab classes the students learn how to solve some statistical questions, using R-STUDIO. In the last sessions, several short exercises, to be solved in the lab, will be assigned and graded afterwards.

LEARNING OBJECTIVES OF THE SUBJECT

- Be able to use the basic techniques to extract statistical information from a database.
- Be able to use the basic theory of probability.
- Be able to use the distribution models that govern random behavior.
- Be able to use the techniques of statistical inference to find, from an observation of the population, certain characteristics of the population as a whole.
- Be able to use the regression techniques to make predictions.

CONTENTS

1. Descriptive statistics

Description:
1.1 Variables. Types.
1.2 Graphical and statistical tools for analyzing one-dimensional variables.
1.3 Graphic and statistical tools for analyzing two-dimensional variables.

Specific objectives:
Ability to use the basic techniques to extract statistical information from a database.

Related activities:
Activity 1

Related competencies:
- CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
- 06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.
- 07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

Full-or-part-time: 1h
Theory classes: 1h
### 2: Probability

**Description:**
2.1 Definition of probability  
2.2 Conditional probability  
2.3 Independence of events  

**Specific objectives:**
Understand the basic theory of probability  

**Related activities:**
Activity 3  
Activity 5  

**Related competencies:**
. CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.  
06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.  
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.  

**Full-or-part-time:** 1h  
Theory classes: 1h

### 3: Random variables

**Description:**
3.1 Definition and types of random variables.  
3.2 Density function and distribution function of random variables.  
3.3 Expectation and variance of a random variable.  
3.4 Distribution models: Binomial, Poisson, Exponential and Normal.  

**Specific objectives:**
Understand distribution models that govern random behavior.  

**Related activities:**
Activity 3  
Activity 5  

**Related competencies:**
. CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.  
06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.  
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.  

**Full-or-part-time:** 1h  
Theory classes: 1h
4. Inference

**Description:**
4.1 Sampling.
4.2 Estimation of parameters.
4.3 Confidence intervals.
4.4 Hypothesis tests.

**Specific objectives:**
Ability to apply the statistical inference to find, from an observation of the population, certain characteristics of the population as a whole.

**Related activities:**
Activity 2
Activity 4
Activity 5

**Related competencies:**
CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.

06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 1h
Theory classes: 1h

5. Regression

**Description:**
5.1 Simple linear regression model.
5.2 Validation of the model.
5.3 Transformation of variables.

**Specific objectives:**
Learn regression techniques to make predictions.

**Related activities:**
Activity 4
Activity 5

**Related competencies:**
CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.

06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.

**Full-or-part-time:** 1h
Theory classes: 1h
ACTIVITIES

1. FIRST LAB TEST

**Description:**
The student will have to solve problems, with the help of R-STUDIO, using statistical descriptive techniques of content 1.

**Specific objectives:**
Confirm the domain of the descriptive statistical techniques using R.STUDIO

**Material:**
Statement of the test and class material.

**Delivery:**
The written solution of the problems proposed.

**Related competencies:**
- CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
- 07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
- 06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

**Full-or-part-time:** 1h
Theory classes: 1h

2. SECOND LAB TEST

**Description:**
The student will have to perform an assignment, with the help of R.STUDIO, using the techniques of contents 4 and 5.

**Specific objectives:**
- Be able to use linear regression tools and statistical inference with R-STUDIO.

**Material:**
Statement of test and class material.

**Delivery:**
The work will have to hand a week after the last session of laboratory.

**Related competencies:**
- CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
- 07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
- 06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

**Full-or-part-time:** 2h
Laboratory classes: 2h
3. FIRST THEORETICAL EXAM

Description:
The student will have to solve, in person and in writing, problems on the contents 2 and 3 of probability and random variables.

Specific objectives:
- Be able to use basic probability theory.
- Be able to use distribution models of aleatory variables.
- Be able to use central limit theorem.

Material:
Statement of test and summary table of theory

Delivery:
The written solution of the proposed exercises

Related competencies:
- CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
- 07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
- 06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

Full-or-part-time: 2h
Theory classes: 2h

4: SECOND THEORETICAL EXAM

Description:
The student will have to solve, in person and in writing, problems on contents 4 and 5.

Specific objectives:
- Be able to use statistical inference tools.
- Be able to use linear regression tools.

Material:
Statement of the test and summary table of theory

Delivery:
The written solution of the proposed problems.

Related competencies:
- CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
- 07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
- 06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

Full-or-part-time: 2h
Theory classes: 2h
5: FINAL EXAM

Description:
The student will have to solve, in person and in writing, problems about contents 2, 3, 4 and 5.

Specific objectives:
Be able to use the basic techniques of the subject.

Material:
Statement of test and summary table of theory

Delivery:
The written solution of the proposed problems.

Related competencies:
. CE1. Ability to solve arithmetic problems related to engineering. Aptitude to apply knowledge concerning: linear algebra, geometry, differential geometry, differential and integral calculus, differential and partial equations, numerical methods, numerical algorithms, statistics and optimization.
07 AAT N1. SELF-DIRECTED LEARNING - Level 1. Completing set tasks within established deadlines. Working with recommended information sources according to the guidelines set by lecturers.
06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

Full-or-part-time: 2h
Theory classes: 2h

6. RE-EVALUATION TEST

Description:
The student will have to solve, in person and in writing, problems about contents 2, 3, 4 and 5.

Specific objectives:
Be able to use the basic techniques of the subject.

Material:
Statement of test and summary table of theory

Delivery:
The written solution of the proposed problems.

Full-or-part-time: 2h
Theory classes: 2h

GRADING SYSTEM

A1=laboratory exam with R-STUDIO
A2=assignment with R-STUDIO
A3=first partial exam
A4=second partial exam
A5=final exam
A6=re-evaluation test

FINAL GRADE = MAX (0.1*A1+0.1*A2+0.4*A3+0.4*A4, 0.1*A1+0.1*A2+0.8*A5)
(all partial scores on a 0-10 scale)
EXAMINATION RULES.

- The conditions for conducting the individual written tests will be announced with sufficient time.
- Attendance at laboratory sessions and activities A1 and A2 are compulsory.
- Activities 4 and 5 will be done on the same day and, therefore, only one can be done.
- Only activity 5 can be re-evaluated
